RE: Snake River Basin Adjudication (SRBA)
Claim No.(s): A37-01236C, A37-07621F, A37-11598
Change of Ownership Notification

Dear Claimant(s):

We have been notified that you have purchased property with the above referenced Snake River Basin Adjudication claim(s), and our records have been changed, accordingly. **The enclosed copies are for your records**, please review these documents for accuracy in all respects. In the course of investigating this ownership change, it became apparent that there is a discrepancy between the legal description on your warranty deed, and our records for claim number A37-07621F, regarding the location of the acres irrigated in section 11. If you wish to change your claim, please contact an Adjudication Agent in this office, who can easily assist you.

I am also enclosing a profile report of Adjudication Claim number A37-01036B which is also appurtenant to your property. If you wish to change ownership on this claim, please contact this office.

Sincerely,

Vikie Hancock

CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount that can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. The following rights are also diverted through the point of diversion described above: 37-07621B and 37-07621D.

State of Idaho
Department of Water Resources**WATER RIGHT LICENSE**

WATER RIGHT NO. 37-07621C

CONDITIONS/REMARKS:

6. This right when combined with all other rights shall provide no more than .02 cfs per acre nor exceed a combined annual diversion volume of 749.0 afa.
7. Lands irrigated in Section 3, T2S, R21E are supplied water from the West Canal, and lands irrigated in Section 22, T1S, R21E, and Section 11, T2S, R21E are supplied water from the East Canal.
8. Water diverted under this right is exchanged with Little Wood River diverted into both the East and West Canals.
9. The Department retains the jurisdiction to change the amount of canal conveyance loss assessed to this right to an amount greater or lesser than the 20 percent that has historically been assessed.
10. The right holder shall first use the full allotment of surface water appurtenant to the above lands prior to using water under this right. The surface water cannot be sold, leased, or removed from the lands above without the approval of the Director.

This license is issued pursuant to the provisions of Section 42-219, Idaho Code. Witness the seal and signature of the Director, affixed at Boise, this 20TH day of JUNE, 1995.

Date: June 9, 1995
From: Jim Johnson
To: File 37-07621
Subject: Review of field exams

=====

After reviewing the complete file and the recommendations made by the examiner I am of the opinion that the rate licensed for each portion of the water should be prorated using 5.82 cfs (well diversion) and total acres irrigated using 286 acres. This is a departure from the examiner recommendations, but I think it is justified.

The rates for each portion is summarized as follows:

37-07621B Richard Olsen	33 acres	0. ⁶⁵ ~~66~~ cfs
37-07621C Ray Sweat etal	214 acres	4.20 cfs
37-07621D Rod Mc Coy	39 acres	0.77 cfs

Other components of the license will fall in place using these adjustments.

Standard conditions reflecting the well water used in exchange for Little Wood River should also be used along with the Watermaster control condition.

Conveyance loss considerations should be reflected on the licenses but the loss should not be calculated. Actual loss amounts have not been determined they are only estimated.

The volumes listed for irrigation should be identified as field head gate volumes and do not include conveyance loss.

Rod explained to me how the watermaster administers the delivery of water under this right.

When the well is turned on, the watermaster measures the discharge and keeps an account on how much volume is being supplied to the East Canal. When the users sharing the ownership of the well divert water from the West Canal, the watermaster releases water from storage.

For example, Mr. Mc Coy will inform the watermaster when he wants to turn on his pump to divert water from the West Canal. The watermaster will release water from the reservoir and deliver it to the head of the West Canal.

Mr. Mc Coy didn't have any knowledge what the rates of diversion the water master was using when releasing the water from the reservoir.

Conveyance Loss

The field examiner identified a 20% loss was assessed by the watermaster. How the watermaster applies the loss to the storage credit is not known, or even if 20% is even used.

I do not propose to identify a conveyance loss on the licenses since we do not have any confirmed information. I don't think it is necessary based upon the procedure used by the watermaster in the accounting of water diverted under this right . The use of water under this right and its relationship to surface water delivery has been occurring without problems for many years. If problems do occur in the future the watermaster has enough latitude to make adjustments.
