13. Other Water Rights Used:

14. Remarks:

This right is a combination of old rights 37-2617 and 37-2620 using the priority of the junior right.

Right No. 37-11914 is an enlargement of this right pursuant to Section 42-1426, Idaho Code.

This right is limited to the irrigation of 340 acres within the place of use described above in a single irrigation season.

The total instantaneous diversion of water from all points of diversion under Rights 37-2627A, 37-11911 and 37-11914 shall not exceed 16.83 cfs, nor a total combined annual volume of 5312.7 af.

Rights 37-2627A, 37-11911, and 37-11914 when combined shall not exceed a total rate of diversion of 16.83 cfs, nor a total combined annual volume of 5312.7 af, nor irrigation of more than 2711.3 acres within the place of use described above in a single irrigation season.

The total instantaneous diversion of water from all points of diversion for all ground water rights identified under this transfer No. 69624 and the surface water rights identified under transfer 69626 shall not exceed 72.78 cfs, nor a total combined annual volume measured at the field headgate of 9489.6 af for irrigation of 2711.3 acres in any one season.

The right holder shall make full beneficial use of all surface water rights available to the right holder for irrigation of the lands authorized to be irrigated under this right. The right holder shall limit the diversion of ground water under this right to those times when the surface water supply is not available or the surface water supply is not reasonably sufficient to irrigate the place of use authorized under this right.

This right shall not be used if the surface water right(s) appurtenant to the place of use is sold, transferred, leased or used on any other place of use.

Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 37M.

Prior to diversion of water under this approval, the right holder shall provide a means of measurement and lockable controlling works for all authorized points of diversion. The means of measurement and controlling works must be suitable for control of the diversions and acceptable to the watermaster.

The right holder shall accomplish the change authorized by this transfer within one (1) year of the date of this approval.

Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.

Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.

As between water rights decreed as enlargements pursuant to Section 42-1426, Idaho Code, the earlier priority right is the superior right.
2. This right is based upon an enlargement of right no. 37-11911 pursuant to Section 42-1426, Idaho Code.
3. This right is limited to the irrigation of 967 acres within the place of use described above in a single irrigation season.
4. The total instantaneous diversion of water from all points of diversion under Rights 37-2627A, 37-11911 and 37-11914 shall not exceed 16.83 cfs, nor a total combined annual volume of 5312.7 af.
5. Rights 37-11911 and 37-11914 when combined shall not exceed a total diversion rate of 6.18 cfs, nor a total combined annual volume of 1447 af, nor the irrigation of more than 1307 acres within the place of use described above in any one season.
6. Rights 37-2627A, 37-11911, and 37-11914 when combined shall not exceed a total rate of diversion of 16.83 cfs, nor a total combined annual volume of 5312.7 af, nor irrigation of more than 2711.3 acres within the place of use described above in any one season.
7. The total instantaneous diversion of water from all points of diversion for all ground water rights identified under this transfer No. 69624 and the surface water rights identified under transfer 69626 shall not exceed 72.78 cfs, nor a total combined annual volume measured at the field headgate of 9489.6 af for irrigation of 2711.3 acres in any one season.
8. The right holder shall make full beneficial use of all surface water rights available to the right holder for irrigation of the lands authorized to be irrigated under this right. The right holder shall limit the diversion of ground water under this right to those times when the surface water supply is not available or the surface water supply is not reasonably sufficient to irrigate the place of use authorized under this right.
9. This right shall not be used if the surface water right(s) appurtenant to the place of use is sold, transferred, leased or used on any other place of use.
10. Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 37M.
11. Prior to diversion of water under this approval, the right holder shall provide a means of measurement and lockable controlling works for all authorized points of diversion. The means of measurement and controlling works must be suitable for control of the diversions and acceptable to the watermaster.

MEMORANDUM

TO: FILES 37-02617 & 37-02620

FROM: PAM SKAGGS/STATE OFFICE

SUBJECT: TRANSFER 5044

DATE: February 4, 1998

=====

Transfer 5044 is the first of three transfer applications filed by the applicant to combine rights and identify current use on a large parcel of land. This transfer adds points of diversion and changes the place of use to create a 2711.3 acre common permissible place of use under Rights 37-02617 and 37-02620. ✓

These rights overlap the multiple surface rights that are modified under Transfer 5046, and the proposed place of use includes the additional groundwater right under Transfer 5045 less the portion moved north to supplement a separate system. ✓

Recommended conditions include watermaster control, measurement & lockable devices/multiple points of diversion, no new well, supplemental groundwater, irrigation overlap, permissible place of use, combined right limits and standard transfer conditions. ✓
