

Memorandum

Date: April 27, 2022

From: Craig L. Saxton

RE: 87-12311, 87-12312, 87-12356, 87-12357

87-12311 (Split into 87-12356 and 87-12357):

87-12311 represented two different development periods for two different water uses. The right was split into 87-12356 and 87-12357 to represent the 1905 domestic use and the 1947 irrigation use (respectively).

Fees originally paid under N037212 for claims 87-12311, 87-12312, 87-12313, and 87-12314 were overpaid by \$26.

I split claim 87-12311 into 87-12356 and 87-12357, to represent the two different development periods for IRRIGATION and DOMESTIC uses. The result was one claim for IRRIGATION in which fees had been accounted for, and one new claim for *de minimis* DOMESTIC use in which \$25 previously overpaid can be applied. Therefore, no additional filing fees are required as the result of splitting 87-12311 into 87-12356 and 87-12357.

Variable fees under N037212

	Paid	Filing Fee
87-12311	\$ 56.00	Split into 87-12356 & 87-12357
87-12356		\$ 52.00
87-12357		\$ 25.00
87-12312	\$ 74.00	\$ 50.00
87-12313	\$ 55.00	\$ 54.00
87-12314	\$ 51.00	\$ 54.00
Total Paid:	\$ 236.00	
Total Due:		\$ 235.00
Difference:		\$ 1.00

87-12356:

This recommendation reflects and accomplished change in POD. The domestic use developed from the original well dug in 1905 was moved to this well when it was drilled in 1967. Therefore the domestic use described in this right was recommended with the original 1905 priority even though it is diverted out of a new well

87-12357:

This recommendation reflects and accomplished change in POD. The irrigation use developed in 1947 from the original well dug was moved to this well when it was drilled in 1967. Therefore

this right is recommended with a priority date that pre-dates the actual well construction date because of the accomplished transfer in POD.

87-12312:

The recommended POD was established in 1905. However, on 12/21/1967, a second well was completed. The use developed from this well was transferred to the new well drilled in 1967 (POD for 87-12356 & 87-12357). At that time, a new 42-111(b) use was developed from the 1905 constructed well and is recommended under this right. Therefor even though the recommended POD is the older of the two wells developed on this property, this well supplies water for the right developed in 1967.
