Section 42-1412(6), Idaho Code.

EXPLANATORY MATERIAL: BASIS OF CLAIM - Decreed

The right holder shall cease irrigation of 278 acres previously authorized under Rights 37-00182A, 37-00334E and 37-30011A and consolidate use of water on the remaining 271 acres.

Approval of Transfer 5551 does not grant any right-of-way or easement for use of a delivery system owned by person(s) other than the right owner.

* All 12 rights are limited to 591 acres

* All 12 rights are limited to 27.41 cfs, which is the sum of the surface water diversion rates. This comes to about 0.046 cfs per acre

* The four rights from Transfer 5563 are limited to 9.24 cfs + 2068.5.

Combined Limits for Molyneux Rights

- * The 3 rights in Transfer 70140 are limited to 396 acres.
- * The 5 rights in Transfer 5551 are limited to 195 acres.

Note: 396 acre + 195 acres = 591 acres

- * The volumes will not be listed as annual diversion volume limits for the individual surface water rights because the high diversion rates and conveyance loss will result in more than 3.5 AF/acre being diverted annually. Instead, the volumes will be listed in conditions as combined field headgate volumes.
- * The rate for 37-11430 is not additive because it is an enlargement right.

Chart of AW Molyneux's 3/24/1883 Water Rights

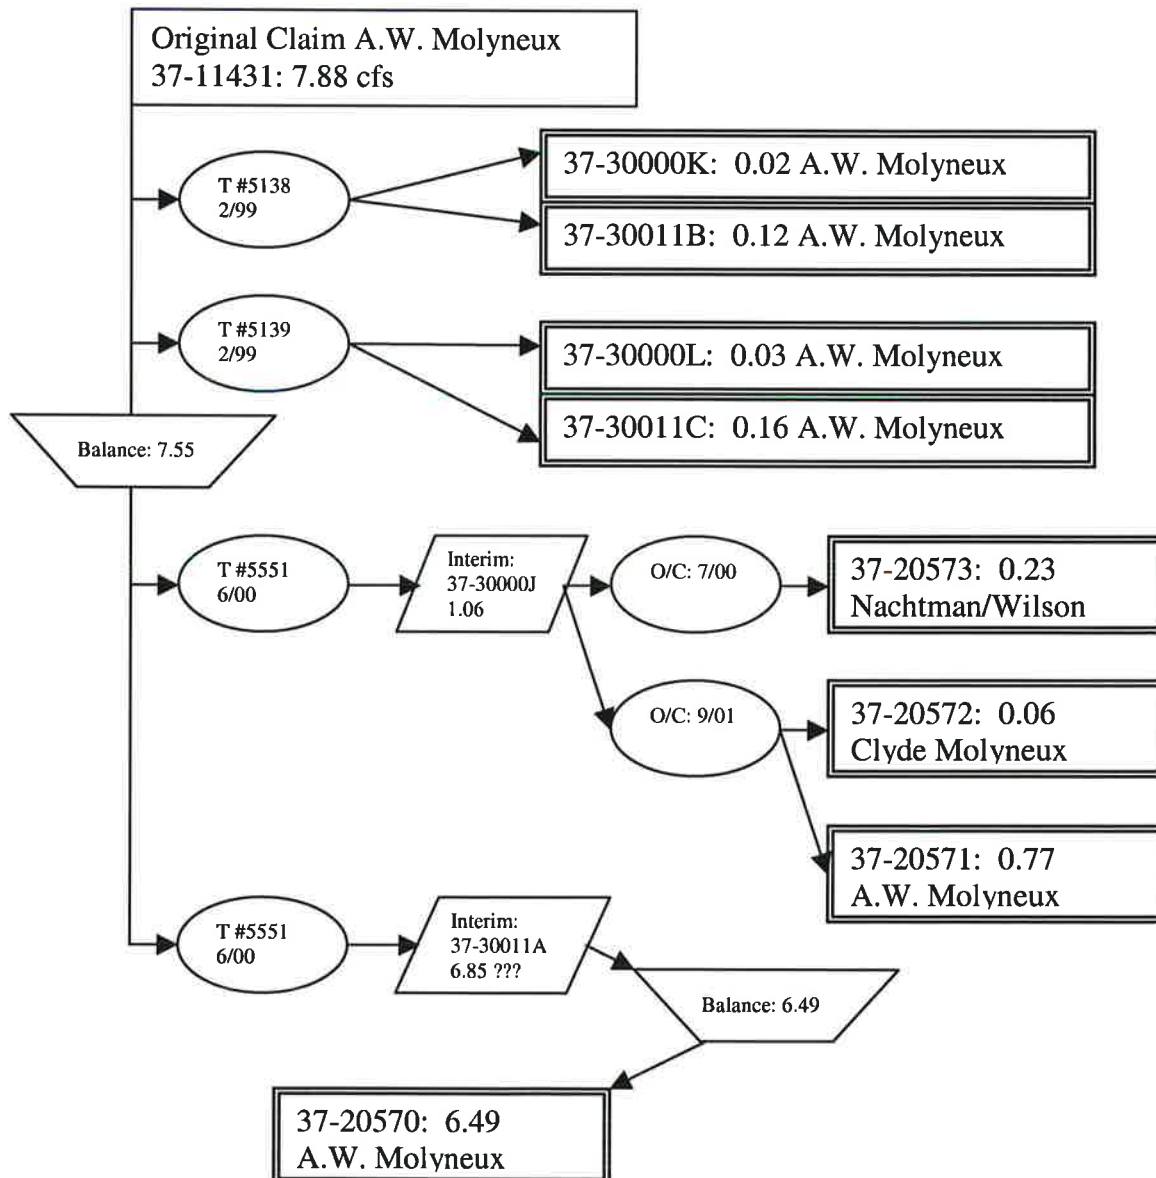

Problem: Total cfs under the various parts derived from 5 recent transfers exceeds the flow rate recognized by the 37-M Water master, and that rate claimed in the SRBA.

Water Right Data:

Water master Records indicate A. W. Molyneux has 7.88 cfs, per conversation notes by J. Stanton with Water master representative. The difference between rates is about 5% and may represent river loss in historical change in diversion point between Hiawatha and Bypass Canals.

CONDITIONS OF APPROVAL AND REMARKS

1. Use of water under this water right will be regulated by the watermaster of State Water District No. 37.
2. The right holder shall maintain a measuring device and lockable controlling works of a type approved by the Department in a manner that will provide the watermaster suitable control of the diversion.
3. The right holder shall accomplish the change authorized by this transfer within one (1) year of the date of this approval.
4. Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
5. Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.
6. This right when combined with all other rights shall provide no more than 3.5 afa per acre at the field headgate for irrigation of the lands above.
7. Approval of Transfer 5551 does not grant any right-of-way or easement for use of a delivery system owned by person(s) other than the right owner.
8. A portion of each right under Transfer 5551 is used for conveyance purposes and subject to final determination in the Snake River Basin Adjudication.
- * 9. Rights 37-00105C, 37-00106E, 37-00704G, 37-00883A and 37-30011A, when combined shall not exceed a total annual maximum diversion volume of 948.5 af at the field headgate, and the irrigation of 271 acres.
10. The period of use for the irrigation described in this approval may be extended to an ending date of 10/31 provided that beneficial use of the water can be shown and other elements of the right are not exceeded. The use of water after 10/15 is subordinate to all water rights having no subordinated late irrigation use and a priority date earlier than the date of this approval.
11. The right holder shall cease irrigation of 278 acres previously authorized under Rights 37-00182A, 37-00334E and 37-30011A and consolidate use of water on the remaining 271 acres.
