APPROVAL**

FINDINGS OF FACT

1. On February 11, 2003 the Department approved Transfer No. 70245 with the following condition attached to Rights 37-20822 and 37-20824:

Rights 37-20822 and 37-20824 when combined shall not exceed a total diversion rate of 0.23 cfs, a total annual maximum diversion volume of 70 af at the field headgate, and the irrigation of 20 acres.

2. The combined rate of diversion under both rights combined should have been limited to 0.30 cfs, not 0.23 cfs as indicated in the condition.

CONCLUSIONS OF LAW

1. The transfer approval should accurately describe each established water right as changed by the transfer pursuant to Section 42-222, Idaho Code.
2. The transfer approval incorrectly describes the combined rate of diversion limitation under Rights 37-20822 and 37-20824.
3. The Department should correct the transfer approval to limit the combined rate of diversion under Rights 37-20822 and 37-20824 to 0.30 cfs.

ORDER

IT IS THEREFORE HEREBY ORDERED that condition number one (1) on Rights 37-20822 and 37-20824 in Transfer Approval No. 70245 is **CORRECTED** as follows:

Rights 37-20822 and 37-20824 when combined shall not exceed a total diversion rate of 0.30 cfs, a total annual maximum diversion volume of 70 af at the field headgate, and the irrigation of 20 acres.

MEMORANDUM

Date: December 10, 2002
To: Transfer 70246 File
From: Corey Skinner
Re: Evaluation of Sufficiency of Information Submitted

Applicants (Kenneth and Kathy Schoessler) are subdividing their farm into four lots and will be selling the lots. Transfer 70245 proposes splitting off the proportionate portion of claims 37-20618 and 37-20620 for lot 1 of the subdivision and changing the point of diversion to a new well to be drilled on lot 1. Transfer 70246 proposes splitting off the proportionate portion of claims 37-20618 and 37-20620 for lot 2 of the subdivision and changing the point of diversion to a new well to be drilled on lot 2. The remaining portions of 37-20618 and 37-20620 will remain appurtenant to the rest of the farm (lots 3 and 4) and will be diverted from the original (existing) well. Nothing will change with these remaining portions so they are not being transferred. The applicants attorney indicated that the eventual owners of lot 3 and lot 4 will share the use of the existing well via a well sharing agreement.

Note that claims 37-20618 and 37-20620 are based on parts of overlapping licensed rights 37-7817 and 37-2556B which are limited to 1.73 cfs and 117 acres. Claims 37-20618 and 37-20620 are for 102 of the 117 licensed acres. Lots 1 and 2 are both 20 acres in size, so transfers 70245 and 70246 both involve a 20/102 portion of claims 37-20618 and 37-20620 and the appropriate combined use limits from the original licenses.

Examination of the Departments records indicate that surface water claims 37-11749, 37-11750, 37-11751, and 37-11752, all in the name of Hoffman, appear to overlap claims 37-20618 and 37-20620. However, examination of the claim files reveals that the surface water claims 37-11749, 37-11750, 37-11751, and 37-11752 were apparently historically used on property now owned by Hoffman, just to the north of the Schoessler property involved with transfers 70245 and 70246. There are various documents in the claim files indicating that the surface water is not used on the Schoessler property involved with transfers 70245 and 70246. I assume that the eventual recommendations for these claims will not include the Schoessler property involved with transfers 70245 and 70246. I placed memos in these claim files giving the eventual AJ agent a heads up with these surface water claims.

It should be noted that the data entry work for the approvals of Transfer 70245 and Transfer 70246 are based on Transfer 70245 being approved first. The untransferred portions of Transfer 70245 will serve as the base rights for Transfer 70246 and the untransferred portions of Transfer 70246 reflect approvals of both Transfer 70245 and Transfer 70246.

Transfer 70245 and transfer 70246 both should be straightforward and approvable.

- **Authority to File:**
Applicants are listed as the current owners on SRBA claims.
- **Water Right Validity:**
Rights involved with the transfer are still pending in the SRBA and NAPP photography indicates the property involved with the application was irrigated around 1987. Forfeiture does not appear to be an issue.
