New Claim Nos.: 37-21358 & 37-21359

Dear Claimant,

Enclosed are copies of your new claims for irrigation use. Please review the documents for any data entry errors and let me know of any corrections necessary.

These new claims will be included in our future Basin 37 Director's Report to the Court. The investigation of these claims, and the subsequent issuance of the Director's Report for this basin, is not scheduled to begin until next year. At that time, you may be contacted for additional information that will help us correctly describe your water right in the decree.

Don't hesitate to contact the Department with any questions regarding this or any other SRBA claims.

Sincerely,

RE: Right Number: 37-21359 and 37-21358

Dear Mr. Anders,

This letter shall serve as my confirmation and testimony to you regarding both of the above claim numbers that I spent each summer since 1954 with my great-grandparents(Snooks), grandparents(Perrys), great aunt and uncle(Brambles) on the property where the spring creek known as Clear Creek runs and both of these claims are located. My great-grandparents purchased the property (approx 53 acres) in or about 1950. They then built five log cabins for their children, grandchildren, and great-grandchild(me), to come and spend each summer. All the cabins were finally completed in 1956 and at that time we had permits for three wells which were used for domestic purposes and to water the garden and lawns which at that time were in their infancy. My grandmother loved to garden and each year the gardens got larger and larger. In 1959 the gardens and lawns had become so large that watering them by hoses was too time consuming and a constant chore. She hired two men and they devised a crude but efficient sprinkler system that consisted of rubber hoses buried in the ground and were fed by drawing water from Clear Creek with electric pumps. Since that summer of 1959 to the present the gardens and lawns have been continuously watered with water drawn from Clear Creek by electric pumps. My great aunt who lived in cabin further up the creek thought my grandmother's sprinkler system was so neat that she had one like it installed the following summer(1960). Originally we would have to turn on the pump manually and open one valve manually to sprinkle different sections of the garden. When one section was fully watered someone would then have to manually turn off the valve and open another valve to water another section of the garden. I can attest to this as it was often my job. The sprinkler system has been modified and upgraded over the years and eventually automatic valves and timers were installed. The gardens became quite famous and were known locally as the Dorothy Perry Gardens. She grew over 125 different varieties of perennial flowers. Eventually my grandmother opened the gardens to the public, free of charge, on Thursdays each summer for six weeks at the height of the summer bloom and my grandmother and girls that she would hire to help her gave informative tours and instructions on high altitude gardening. Year after year her plants adapted to the high altitude climate. At the garden tours she would sell seed packets and donate the money to the Ketchum library. Many of the perennial flowers that grace Blaine County today were from seeds from her garden. In 1983 her gardens were featured in "House and Garden" magazine.

I hope this additional information will be helpful to you in reaching your determination of the status of my claims. Should you have any questions please do not hesitate to contact me on my cell phone (208-724-1315). Thank you for your time and efforts in processing my claims.

Dear Mr. Anders:

I have known Jeffrey Huber since 1962, and during the summer of that year I was invited to visit him and his family in Ketchum.

During that visit, and in many subsequent visits (I moved to Idaho in 1970 as a permanent resident), I observed the extensive gardens on his family property, and the irrigation by which they were maintained and propagated, all from the Clear Creek stream, which I believe to be a "year round" spring creek (as opposed to a seasonal creek).

I have revisited that property many times over the years, almost on an annual basis, and can say with certainty that the gardens and lawns have been maintained and watered by irrigation and sprinkling provided by Clear Creek water, as observed and witnessed by me.

Dear Mr. Anders,

This letter shall serve as my affirmation to you that I have observed Mr. Jeff Huber, his grandparents, his great aunt and great uncle, and his aunt and uncle all water their gardens and lawns from water drawn from Clear Creek in Blaine County from the time I first met Mr. Huber, in the summer of 1968, continuously until the present. I first met Mr. Huber in the summer 1968 and was invited to his grandparents and great aunts homes that border Clear Creek in Blaine County. At that time they were drawing water from the creek into their sprinkler systems to water the extensive gardens and lawns. I have been a frequent visitor to Mr. Huber's property each summer from 1968 to the present and each year he or his ancestors have always watered their gardens and lawns with the creek water. Three summers ago I even helped him repair one of the two pumps that draw water from the creek. Please do not hesitate to contact me should you have any questions or need any further information.

Eventually my grandmother opened the gardens to the public, free of charge, on Thursdays each summer for six weeks at the height of the summer bloom and my grandmother and girls that she would hire to help her gave informative tours and instructions on high altitude gardening. Year after year her plants adapted to the high altitude climate. At the garden tours my grandmother would sell seed packets and donate the money to the Ketchum library. Many of the perennial flowers that grace Blaine County today were from seeds from her garden. In 1983 her gardens were featured in "House and Garden" magazine.
