Kelly~

These look fine to me with a couple minor changes. I suggest rewording the Q remark as follows and adding a period at the end:

The rights listed below shall provide no more than 0.02 cfs per acre nor more than 3.5 afa per acre at the field headgate for irrigation of the lands above in the place of use. Combined Right Nos. 37-21509, -37-21521, -37-21532, 37-21543, 37-21554 and 37-21565.

And for -21565, good catch, we want that uncontested overlap to parallel the others. One of its explanatory remarks could be changed to: This right is a split from former rights 37-480 and 37-667.

Great job, and I appreciate the quick work. Nice to get moving on these so soon.

Vicki, go ahead and start routing (making it clear the additional remarks in -21509 in source come from the transfer).

Let's try Al first since he originally let us know about the settlement.

Andria, I did not have notes on the attorney but guessed you. If I am wrong let me know.

I have drafted potential settlement documents for this group. Please note that I have included the transfer language relating to the ground water right 37-21509 being subordinated to surface water. This is the language used on the approved transfers associated with the numerous splits of 37-2557.

No objection was filed against 37-21565 but I have updated the remarks on this one also as an uncontested overlapping right.

Should we route the potential settlements as drafted for Barker and Hobdley to review or should we just draft SF-5s?

I have also drafted potential settlement documents based upon this format for the Eastfield claims and Pitt claims also and will route them later.

Don't worry about it Steve. We got the files and it will be an easy fix.

Vicki, when we got together we looked through the listing from the court (we like yours MUCH better) and figured we were going to have Kelly and Steve rotate through the telephone I.H.s – all the objections are similar – without much review. Kelly indicated he would come down to Twin for the in-person I.H.s with me. That right, gents?

If the Department can get Mr. Bloomfield his SF5 before he leaves the country on 4/14, that would be a big help. Thanks. See discussion with him below.

Unless the Department circulates the SF5, and it is signed and filed with the court before the , the initial hearing is still on. All that will happen is that we will tell the Special Master that the SF5 is being circulated. I will be happy to tell the court that we have agreed and that you need not attend, assuming that the paper work is not done before the last week of April. If the SF5 is filed, the court will vacate the hearing.

Albert-

How does this affect the hearing scheduled for April 23rd? Will you notify the Special Master that we have reached an agreement and are simply awaiting the recommendation from IDWR and that the hearing should be vacated? Please copy me on any communication you have with the court for my file. If I had the clerk's email address I would have copied her. I had previously discussed this with Janet Connell, clerk of the court.

Please keep me posted.

IDWR in all its recommendations includes the following language:

"This right when combined with all other rights shall provide no more than 0.02 cfs per acre at the field head gate for irrigation of the place of use described for this water right."

I like this language better because it does not contain a specific quantification of the diversion at the headgate, and the language is the type consistently approved by IDWR.
