11. **I object because:**
 - ☐ This water right should not exist.
 - ☐ This water right was not recommended, but should be recommended with the elements described above.

E. REASONS SUPPORTING OBJECTION(S):

The recommendation describes PODs and POUs on private land, state & federal lands with a priority date of 12-31-1880 and a year-round season of use. Use of stockwater on federal land is limited to spring & summer. There does not appear to be a basis for an 1880 priority on private, state, or federal lands. The "base property" associated with the use on federal land was patented in 1939 and the recommendation does not describe the land to which the use on federal land is appurtenant as required by I.C. 42-1402.

 - ☐ This water right should not exist.
 - ☐ This water right was not recommended, but should be recommended with the elements described above.

E. REASONS SUPPORTING OBJECTION(S):

No justification exists for recommended reduction of Quantity from originally claimed .14 cfs to .02 cfs. The claimed amount has been customarily used. Stock watering occurs from and along the source streams in various parcels (places of use) and the recommended diversion rate of .02 cfs evidently assumes only a single diversion point will be used at a given time.

Notes

T1N R13E Sections 4, 5, 8, 9, 9, 16, 17, & 20; T2N R13E Sections 32 & 33

- Many of the claimed PODS were in the valley bottom along streams. Carter and Steve felt this suggested in-stream use. They recommended splitting the right into in-stream use and troughs. The spring PODs that are not in valley bottoms or along streams require additional evidence from the claimant documenting water is present and used.
- Created in-stream POU by buffering the NHD and some additional digitized lines.
- Some of claimed POU excluded in Sections 8, 17, & 20 where tax records indicate land owned by different private party.
- Sources should be:
 - West Fork Threemile Creek tributary to Camas Creek
 - Unnamed stream tributary to McMahan Creek
 - Lansing Creek tributary to Camas Creek
 - Unnamed Stream tributary to East Fork Corral Creek
 - East Fork Corral Creek tributary to Corral Creek
 - Unnamed Stream tributary to West Fork Corral Creek
 - West Fork Corral Creek tributary to Corral Creek
 - Unnamed Stream tributary to Rough Creek
 - Rough Creek tributary to East Fork Corral Creek
- Claim 37-13289 split into:
 - 37-21653 for 0.02 cfs for undeveloped springs (in-stream use)
 - 37-21654 for 0.12 cfs for developed springs (toughs)
- Data used for review: 2004 aerial photo, Camas Co Tax Records, Idaho Ownership (idown.shp), & USGS 1:24,000 Topo

RE: Water Right Claims – Danny & Valerie Van Horn

Dear Matt:

Thank you for discussing the pending recommendations on Water Right 37-13289 with me. The claims for this water right, and others were filed by a predecessor owner to Mr. & Mrs. VanHorn, and included many springs and locations for stock water use that either may not be in the correct place, or may not exist.

I am not privy to the maps which accompanied your February 16th letter or the .shp files which you have prepared for this claims and other claims on the VanHorn property. As you are aware, there are numerous claims on this ranch which you are or will be evaluating, and as we discussed and concurred, it would be efficient for us to meet and discuss all of the claims at the same time.

I will be available on the following dates and will try to coordinate other business in Boise with a visit to your office to discuss these claims. The potential dates are the afternoon of Tuesday March 14th (which is preferred for my schedule), or anytime on the 15th or the 17th

Please let me know as soon as possible your available dates. Thank you for your consideration on this matter

Sincerely,

Charles E. Brockway, P.E., Ph.D.

RE: Snake River Basin Adjudication claim 37-13289

Mr. & Mrs. Van Horn,

You filed Snake River Basin Adjudication (SRBA) claim 37-13289 for 0.14 cfs for stockwater from springs. A map submitted with the claim identified 211 springs that served as points of diversion of for the stockwater. Many of the claimed springs are in valley bottoms close to stream channels. It appears that these springs that are close to streams represent in-stream stockwater use, so I have created an in-stream place of use for those points of diversion and plan to recommend it as a water right for the SRBA (see attached map). I also plan to recommend the stockwater use at the troughs as an additional water right for the SRBA. The springs that are not located near streams will be excluded from the place of use unless you submit documentation that there is enough water present at each spring for stockwater use (see attached map).

The claimed place of use includes land owned by Carl Rey, the State/Federal government, and other private parties. The place of use on the attached maps includes land owned by Carl Rey and State/Federal land. I have excluded claimed land in Sections 8, 17, & 20 (SW corner of POU) that the Camas County tax records indicate is owned by other private parties.

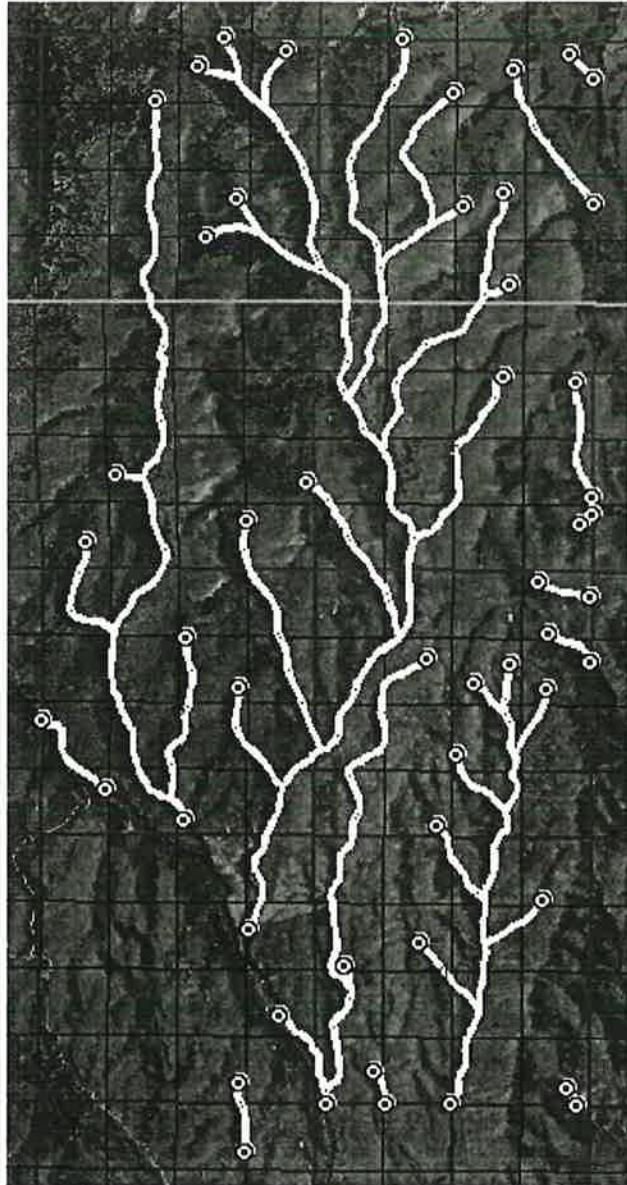

Feel free to contact me at (208) 287-4937 if you have any questions.

Sincerely,

Matt Anders

RE: Snake River Basin Adjudication claim 37-13289

Dear Fields Land Co.,

Fields Land Co. filed Snake River Basin Adjudication claim 37-13289 for 0.14 cfs for stockwater from springs. A map submitted with the claim identified 211 springs that served as points of diversion of for the stockwater. Many of the claimed springs are in valley bottoms close to stream channels. It appears that these springs that are close to streams represent in-stream stockwater use, so I have created an in-stream place of use for those points of diversion (see attached map). For the springs that are not located near streams, please submit documentation that enough water is present in these locations and that it is being used as stockwater (see attached map). I plan to recommend the stockwater use at the troughs as an additional water right.

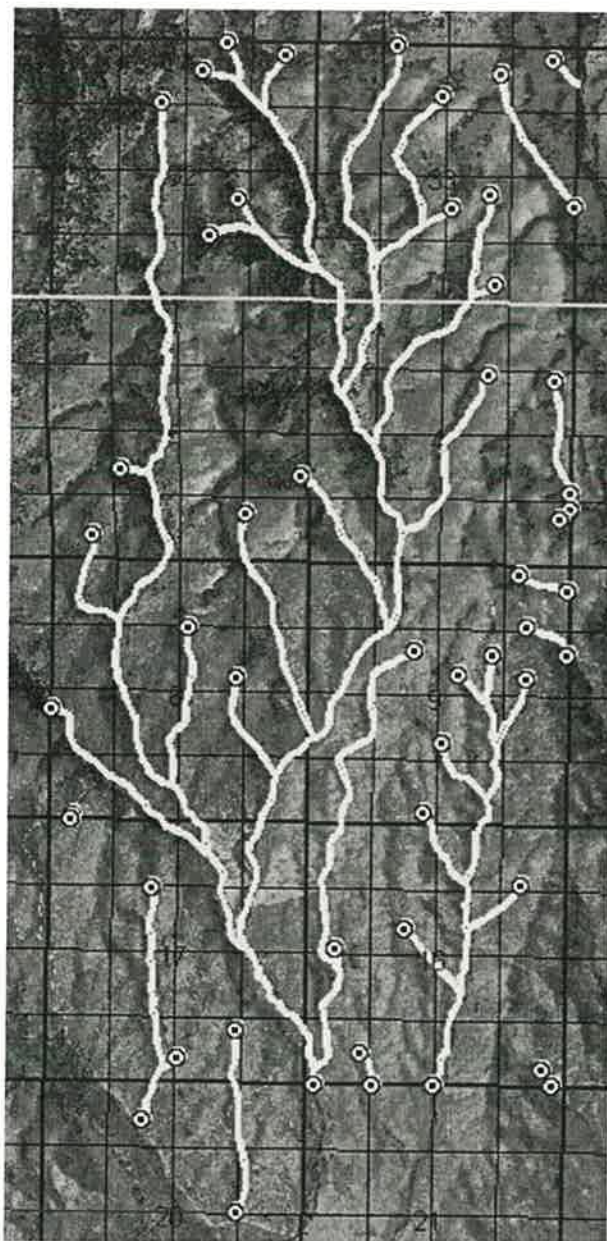

Feel free to contact me at (208) 287-4937 if you have any questions.

Sincerely,

Matt Anders
