NOTES:

1. This record of survey supersedes and corrects the drawing of January 16, 1982, by deleting the line identified therein as the "approximate present Indian Creek drainage easement", which line was included at the request of the then property owner. Since January 16, 1981, it has been determined that the alleged Indian Creek drainage easement is not a matter of record and that the proposed location did not coincide with the ancient drainage course of Indian Creek.
2. An ancient drainage channel for Indian Creek crosses this property on an undetermined location.

Fritz,

Attached is a modified POU based upon our previous conversation and a subsequent review of the rights. Initially we had discussed that acre limit would be the claimed 92 acres but in my review I noted that the rights have been split twice since the initial 92 acre claims were filed. One split was for 2.6 acres for Northridge V and the second was for 0.5 acres for Northridge VI. This leaves a maximum of 89.9 acres associated with the current claims. I have looked over the information you have provided and the available aerial photos and am willing to recognize a POU up to the maximum 89.9 acres as shown on the claims.

Normally the department will round quarter/quarter acreage greater than 10 acres to the nearest whole acre, however where the rights were split into additional rights where the POU is less than 10 acres it sometimes becomes necessary to recognize the POU to tenths even if they exceed 10 acres per quarter/quarter. This is the case here.

As there is no change to the recommended diversion rate, the acre change results in a reduction to the application rate from 2.7 inches per acre to 2.2 inches per acre.

Please let me know if this is acceptable.
