13. Other Water Rights Used:

14. Remarks:

Water is diverted from the Big Wood River into the Bypass Canal where it is rediverted into either the Baseline Canal in the SENW Sec. 25 or into the Dittoe Ditch in the SWSW Sec. 25, T1N, R18E, where it shall remain undelivered and allowed to sink to mitigate for the use of ground water under this right.

The right holder shall maintain a measuring device and lockable controlling works of a type approved by the Department in a manner that will provide the watermaster suitable control of the diversion of Big Wood River water for mitigation.

The use of ground water under rights 37-20886, 37-20887, 37-20888, 37-20889, 37-20890, 37-20891, 37-20892 and 37-20893 when combined shall not exceed a total diversion rate of 0.56 cfs, a total annual maximum diversion volume of 98.0 af at the well head, and the irrigation of 28 acres.

Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.

After specific notification by the Department, the right holder shall measure the ground water diversion or shall enter into an agreement with the Department to determine the amount of water diverted from power records and shall annually report the information to the Department.

Diversion of ground water is limited to those times water is available for diversion under this right and priority from the Big Wood River and is actually diverted into the bypass Canal for mitigation purposes.

The right holder shall accomplish the change authorized by this transfer within one (1) year of the date of this approval.

THIS RIGHT IS A COMBINATION OF OLD RIGHT NOS. 37-105D AND 37-105E.

Approval of this transfer does not preclude the opportunity for review of the validity of this water right in the ongoing Snake River Basin Adjudication.

Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 37.

This right is a split from former right 37-20886.

Please print or type. Attach pages with additional information. Instructions are included at the end of this form.
Incomplete forms will be returned.

1. Please list the water right number(s) and/or adjudication claim number(s) (if any) for each water right to be changed. List just the adjudication claim number if there is no corresponding water right record on file with the department. Indicate, by checking in the space provided (under the "split" heading), if the change in ownership is limited to a portion of a water right in which case division of the existing water right or adjudication claim record will be required.

6. If the change in ownership affects the entire water right for each water right or adjudication claim number listed in item 1, THEN SKIP THIS ITEM AND GO TO ITEM 7. If the change in ownership divides the water right(s) among multiple owners, you must describe, in detail, your portion of each water right after the change. Fill in the appropriate spaces in the box(es) below to describe your water right(s) after the change (one water right per box, you may copy this page as necessary). If your quantity of water is greater than a proportionate split, you must attach documentation to show justification for a larger amount. If you are not sure how to identify your portion of the original water right or adjudication claim records, please contact the nearest IDWR office for assistance.

Re: Irrigation Water Rights
28 Acres SENW, and NESW,
Section 1, T. 01 S., R. 18 E. B.M.
Blaine County, Idaho

Dear Dr. Schmid:

At the request of Jim Herrett, we have examined the records of the Idaho Department of Water Resources (IDWR) pertaining to eight (8) Snake River Basin Adjudication (SRBA) Claim Reports numbered consecutively as 37-20886 through 37-20893, all reported to represent varying amounts of water with varying priorities which have been transferred to the subject 28-acre parcel as above described and as shown on Exhibit A.

Each of the adjudication claim reports suggests a diversion of surface water from the Big Wood River in the SE1/4 SW1/4 of Section 12, T. 01N, R. 18E.B.M. in Blaine County, into the Bypass Canal where it is rediverted into the Baseline Canal in the SENW of Section 25 or into the Dittoe Ditch in the SWSW of Section 25, T.1N, R.18E.B.M. where it is "allowed to sink to mitigate for the use of groundwater" under each of the eight recommended claim reports. The rights total 1.31 CFS.

The total permitted diversion from the wells located in Lot 3 (SE1/4 NW1/4) of Section 1, T.01S., R. 18E.B.M. of the subject property pursuant to these 8 rights is .56 CFS, which is 28 miner's inches of water. A miner's inch is 9 gallons per minute, and is the statutorily permitted amount of constant flow per acre for irrigation in Idaho. These rights also limit the diversion of said .56 CFS to times when an equivalent amount of water is available for diversion from Wood River pursuant to the most senior of the 8 rights. The use of the water is also limited to the period of April 15th to October 15th each year and to an annual total diversion volume of 98 acre feet, which totals 3.5 acre feet per acre for 28 acres, the recognized amount for beneficial use for irrigation for a season in Blaine County.

The transfer of these 8 SRBA recommended rights to the 28 acres of the subject parcel was approved on May 16, 1903 (Exhibit B). They all appear to be listed properly in the approved transfer. Since IDWR is required to look at all aspects when considering a transfer, an approval of a transfer indicates that the rights are in good standing.

We have found evidence of the original transfer of the rights from surface water to groundwater in 1999. The transfer order for Transfer #70147 dated May 16, 2003, validated the 8 rights in all respects. None could have been forfeited since the May 16, 2003 date. We thus conclude that appropriate permissions exist to get the Wood River water to the location where it is allowed to sink. We have made no effort to determine average deliveries to the parcel in the past because such data on deliveries prior to Transfer #70147 would not represent the present situation.

If you purchase the parcel, you should file a Notice of Change in water right ownership with IDWR (Exhibit C).

While these rights will be recommended by IDWR for inclusion in the Basin 37 Decree of the SRBA Court, in the near future you will receive an inquiry from IDWR asking if you agree with the rights as reported. As part of a later public notice process, it's possible that someone with a water right could argue that they would be impacted and injured if your rights are to be so decreed. While possible, it's highly unlikely because of IDWR's recent approval of Transfer #70147.

Lastly, no opinion can obviously be given by the undersigned respecting the future availability of water under these rights. In normal years the priority of these rights should supply the necessary mitigation water to divert the .56 CFS to a total of 98 acre feet per irrigation season for use on the parcel.

There has been five straight years of drought. 2004 was an exceptionally short water year. From the 8 rights, there is .33 CFS of 83, .14 CFS of 84, and .13 CFS of 85. Therefore, before July 7th you could have diverted the full .56 CFS from the well but after the 7th to July 12th, only .47 CFS. After the 12th of July, only .33 CFS till it was cut August 13th.

Respectively,

BARKER, ROSHOLT & SIMPSON

As Modified by Transfer No. 74959

CONDITIONS OF APPROVAL

1. This right is limited to the irrigation of 120 acres within the place of use described above in a single irrigation season.
2. The rights listed below are limited to a total combined diversion rate of 9.24 cfs and to a total combined annual diversion volume of 2068.5 AF. Combined Right Nos.: 37-2658, 37-4421B, 37-7651, and 37-11430.
3. The rights listed below are limited to the irrigation of a combined total of 591 acres in a single irrigation season. Combined Right Nos.: 37-2658, 37-4421B, 37-7651, 37-11430, 37-20570, 37-20571, 37-20574, 37-20577, 37-20578, 37-20581, 37-20584, 37-20593, 37-22026, 37-22028, 37-22030, 37-22032, 37-22034, 37-22036, 37-22038 and 37-22040.
4. The rights listed below are limited to a total combined diversion rate of 27.59 cfs. Combined Right Nos.: 37-2658, 37-4421B, 37-7651, 37-11430, 37-20570, 37-20571, 37-20574, 37-20577, 37-20578, 37-20581, 37-20584, 37-20593, 37-22026, 37-22028, 37-22030, 37-22032, 37-22034, 37-22036, 37-22038 and 37-22040.
5. Right No. 37-11430 is an enlargement of this right pursuant to Section 42-1426, Idaho Code.
6. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 3.5 afa per acre at the field headgate for irrigation of the lands above.
7. The right holder shall use the full allotment of appurtenant surface water rights in conjunction with groundwater diverted under this right and shall only divert groundwater under this right when water from the appurtenant surface water rights cannot be delivered to the right holder.
8. If the surface water rights appurtenant to the place of use is sold, transferred, leased or used on any other place of use, this right to divert groundwater shall not be used without an approved transfer pursuant to Section 42-222, Idaho Code, or approval of the Department if a transfer is not required.
9. Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code and applicable Well Construction Rules of the Department.
10. After specific notification by the department, the right holder shall measure the diversion or shall enter into an agreement with the department to determine the amount of water diverted from power records and shall annually report the information to the department.
11. Pursuant to Section 42-1412(6), Idaho Code, this water right is subject to such general provisions necessary for the definition of the rights or for the efficient administration of water rights as may be determined by the Snake River Basin Adjudication court at a point in time no later than the entry of the final unified decree.
12. The right holder shall accomplish the change authorized by this transfer within one (1) year of the date of this approval.

IDAHO DEPARTMENT OF WATER RESOURCES
PRELIMINARY RECOMMENDATION OF WATER RIGHTS ACQUIRED UNDER STATE LAW

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

Water is diverted from the Big Wood River into the Bypass Canal where it is rediverted into either the Baseline Canal in the SENW Sec. 25 or into the Dittoe Ditch in the SWSW Sec. 25, T1N, R18E, where it shall remain undelivered and allowed to sink to mitigate for the use of ground water under this right.

This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.

EXPLANATORY MATERIAL: BASIS OF CLAIM - Decreed

After specific notification by the Department, the right holder shall measure the ground water diversion or shall enter into an agreement with the Department to determine the amount of water diverted from power records and shall annually report the information to the Department.

This right is a split from former right 37-20886 .

Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.

Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 37.

The right holder shall accomplish the change authorized by this transfer within one (1) year of the date of this approval.

The right holder shall maintain a measuring device and lockable controlling works of a type approved by the Department in a manner that will provide the watermaster suitable control of the diversion of Big Wood River water for mitigation.

RE: App For Transfer 72767

Dear Dr. Schmid;

A problem has arisen regarding your application to split off a portion of your water rights on your Bellevue property so that some of the property along Hwy. 75 can be watered from your domestic well. Although our records show that you have the right to irrigate 28 acres there, a re-reading of your property deed makes it clear that you only purchased 24.1 of the 28 irrigated acres from the Molyneux family. They retained 3.7 acres along Hwy 75 in the two tracts covered by these water rights, along with a proportional share of these rights. The Molyneux have sold the 3.9 acres to the Idaho Transportation Dept., but have retained the appurtenant water rights.

Not splitting the water rights when we received your Change of Water Right Ownership request was our error, and we are now in the process of correcting that using the split numbers generated by your application. We want to get this done before the SRBA Director's Report for this area comes out in early January so that the Molyneux will not have reason to object to our recommendations for these claims, which should save everyone a lot of grief.

Based on this information, your application cannot be approved as filed. Your propose to transfer water that you do not own onto land that you do not own, which we can obviously not allow. It would appear that only a joint application filed by the Molyneux family and the Transportation Dept. can be processed to change the point of diversion for this strip of land.

The best way to solve this problem seems to be for us to return your application to you. I will initiate a refund of your filing fee.

Please note that your water rights do not authorize the irrigation of any land in the SE/SW Sec. 1 (the south end of this property, which was unirrigated when the previous transfers were approved but which now appears to be irrigated).

Regards,
