CUSTOMER

SUSAN MC CARTHY PHONE 726-6951
FAX 726-1082

SUBJECT: ERRORS IN CLAIMS A37-02557P, A37-11924, A37-11925, A37-11926, A37-11927, A37-11928
phone call (X) walk-in (.)

She noted several data entry errors related to the above claims. In the remarks for A37-11924(B) it references 02557L as the base right. That is a surface water right.

A37-02557P does not show an AFA value. The original right did.

All surface water rights show an AFA value of 115.9. She had calculated that volumn to be 117.17 based upon the split acreage. In remarks for A37-11926B, remarks lists the diversion rate as 4.545, she thought that it should read 2.545.

In A37-11928 remarks list one right as 19928 rather than 11928.

She also noted that on each of the rights the ownership flag is set at 'No'. I asked that she send a letter to this office noting the error and that the department would then update the claims for that problem.

She received a copy of the A suffix rights rather than the B suffix rights. After the corrections (excluding the ownership issue) she would like a copy of each right faxed to her, preferably a profile report.

MEMORANDUM

TO: Russell &/or Michele Swift-Dion Transfer File (37-02557 Part)

FROM: Corey Skinner *CS*

DATE: September 10, 1996

SUBJECT: Staff Review

The enclosed transfer application, filed by Russell &/or Michele Swift-Dion, seeks to transfer a portion of water right license 37-02557L (SRBA claim A37-02557N). Originally, water right 37-02557 was licensed to divert 5.3 cfs of groundwater for the irrigation of 265.0 acres of farmground a couple of miles southeast of Bellevue (Sections 7 and 18, Township 01 North, Range 19 East).

Since the original license was issued, the place of use for water right 37-02557 has been subdivided into Bellevue Farms Subdivision. In recent years, the department has approved several transfers for individual lot owners within the subdivision to add their own wells to irrigate their own individual lots with their respective portion(s) of 37-02557. This has resulted in several splits of the base right.

The applicants of the enclosed transfer propose to drill a new well to irrigate their lot within the subdivision with their portion of 37-02557. The enclosed transfer application proposes to add a diversion point and split the water right (now 37-02557L & SRBA claim A37-02557N). Since the department has approved, as recently as last year, previous transfers of this nature based on the same water right in the same subdivision, the enclosed transfer should be pretty straightforward. However, there are some issues that complicate the matter.

The subdivision (more specifically Bellevue Farms Landowners Association) has SRBA claims filed on surface water over almost the entire subdivision. The subdivision has the following SRBA claims filed:

A37-11924A	A37-11925A	A37-11926A
A37-11927A	A37-11928A	

These SRBA claims are based on several old decrees, and a total diversion rate of 13.789 cfs has been claimed. The watermaster's 1995 decree book shows Bellevue Farms having portions of the decrees that these SRBA claims are based on. The claimed place of use for all of these claims overlap the place of use involved with the enclosed transfer application.

On August 27th, while in the area, I visited the property

MICROFILMED
NOV 27 1996

involved with the enclosed transfer application. I observed that the well licensed under 37-02557 diverts water into a small pond a few feet north of the well. This pond also collects surface water that is delivered from the north (I assume surface water covered under the subdivision's SRBA claims listed in the proceeding paragraph). Water is then diverted from this pond and used to irrigate lands to the east and to the south. An old ditch, runs from the pond to the west, but it is pretty obvious that the ditch has not been used for quite some time. The plat map copy submitted with the transfer application shows the old ditch as a "10' drainage easement". Mel Schulte's 05/15/95 memo (copy attached) and the enclosed sketch and photographs describe the present system.

The lot involved with the enclosed transfer application is west of the well licensed under 37-02557. From what I observed in the field, the only way for water to reach the lot involved with this transfer is through the old ditch west of the well. As can be seen in the attached photos, and the 1987 NAPP photo (437-187 Y 25 NW) the lot involved with this transfer does not appear to have been irrigated for quite some time.

It is obvious that possible partial forfeiture is an issue involved with the enclosed transfer application. My field observations indicate that the lot involved with this transfer has not been irrigated in the recent past with either the groundwater from the well licensed under 37-02577 or with the surface water claimed in the SRBA by the subdivision.

Determining the exact last date that the lot involved with this transfer was actually irrigated would be pretty difficult, and the partial forfeiture issue presently seems to be up in the air. In addition, the department has recently approved (last year) similar transfers in the same subdivision. For these reasons the enclosed transfer could probably be approved.

Previous approved transfers off this base right (37-02577) were approved with supplemental use conditions, probably due to the overlapping SRBA surface water claims filed by the subdivision. If this transfer were approved, the applicants would drill their own well and irrigate their lot. The applicant's lot is covered by the remaining base right (37-02577L and SRBA claim A37-02577N) and the subdivision's SRBA surface water claims. However, it does not appear that the applicant's lot is currently irrigated so if the transfer were approved and the applicants drilled a well to irrigate their lot, their well would more than likely be a primary irrigation source.

MICROFILMED
NOV 27 1996

SKETCH OF AREA INVOLVED WITH TRANSFER
(not to scale)

View looking up old ditch (indicated by arrows) towards the well licensed under 37-02557 to the east. The old ditch did not appear to have had water ran through it for quite some time. There was some sage growth in a few areas in the bottom of the ditch. In addition, the pond embankment currently prevents the well and surface water from entering the ditch. The concrete and wood structure is an old headgate (appeared abandoned) that delivered water, at one time, from the old ditch to land to the south.

Page 3
Swift-Dion Transfer Memo
(All photos taken during 08/27/96 site visit)

MICROFILMED
NOV 27 1996

View of one of the headgates that delivered water, at one time, from the old ditch to lands to the south. This photo of this particular headgate was taken to represent a typical sample of the headgates along the south side of the old ditch. A couple of headgates were in slightly worse condition and a couple were in slightly better condition.

View of Lot 6, Block 4, Bellevue Farms Subdivision (the property involved with this transfer application) from Quarter Horse Drive looking towards the east. Note the large sage growth and the general appearance of lack of recent irrigation. The arrow indicates the approximate location of the well licensed under 37-02557, that serves as the current source for the "groundwater use" on Lot 6 (the applicant's property).
