Re: Water Right 37-02557K (Hobson Family Trust)

Dear Mr. & Ms. Phillips:

I apologize for the confusion on this ownership change. In reviewing the initial ownership change, the documentation needed (a water right transfer) was not yet known or available in our office.

Crystal Vincent of Rosholt and Associates had sent me the correct material that was available to us at the time. We recently received all the needed documentation. When the water right transfer has been completed in the SRBA records, I then can proceed to put your name on the claim. When this has been processed, I will mail you a copy of the SRBA claim.

I again apologize for the inconvenience. Thank you for your time.

Sincerely,

MEMORANDUM

To: Bellevue Farms Subdivision files

From: Mel Schulte
Sr. Water Rights Agent *MTS*
Southern Region Office

Date: May 15, 1995

On May 12, 1995 I met with Susan McCarthy, Bill Carey, Phil Hobson and several other lot owners at the Bellevue Farms Subdivision. These individuals represent to be a subdivision water committee. The primary purpose of our meeting was to examine the irrigation delivery system in place. We also discussed in general the water rights appurtenant to the subdivision and their plans to try to develop an allocation agreement that would provide groundwater to the lots in the NWSW & SWNW, S7 that don't have appurtenant groundwater.

The irrigation system currently in place consists of the following: a small pond that collects surface water from a ditch entering from the North and/or groundwater from an irrigation well contiguous to the pond on the South. A pump in the pond diverts water to the South in a buried mainline to a polo field of about 40 acres located to the center of the subdivision. The polo field is currently irrigated by wheel lines.

From the pond a ditch delivers water to the East. There are pumps in two locations in this ditch to pressurize sprinkler systems to irrigate about 90 acres at the East end of the subdivision.

A second ditch takes water to the West from the pond. There does not appear to be irrigation from this ditch at the present time. There are numerous old headgates in the ditch and evidence of smaller irrigation ditches that have been used to deliver water to both the North and South from this ditch. The subdivision roads and several homes that have been built on some of the lots interfere with delivery of water through some of the smaller ditches. How long it has been since this part of the irrigation system has not been used is unknown.

The issue of forfeiture could be addressed for some of the lots located primarily on the West and South sides of the subdivision. However, there is not clear and convincing evidence that forfeiture could be proven if the issue is contested.

Pending transfer applications as of this date that were being held contingent on an examination of the irrigation system are recommended for approval.
