

MEMORANDUM

Date: August 24, 2022
To: Transfer 86450
From: Brian Normandeau
Re: Review & Evaluation of Sufficiency of Information

This transfer proposes changing the place of use for water right 27-10866 to correct a clerical error that originated from the applicants SRBA claim. The decreed place of use was in the wrong quarter-quarter, and the right has always been used in the place of use proposed in this transfer. The parcel number on the decreed right matches the proposed place of use.

Authority to File:

The transfer applicants are Paula and Roger Petersen. They are the current water right owners per IDWR records, and the owners of the property at the proposed place of use per Bingham County parcel data. They were the property owners and water right claimants during the SRBA.

Water Right Validity:

Right 27-10866 was decreed 4/23/1999. Review of the applicant's transfer narrative and SRBA claim states this right has provided domestic water to this location since 1978. Aerial imagery shows there has consistently been a home at this location, indicating beneficial use of water for domestic purposes. No issues identified.

Injury to Other Water Rights:

The proposed change is to the place of use only, and does not appear to impact any other water users. No issues identified.

Enlargement of Use:

Approval of this transfer does not alter any elements of this water right, and is only correcting a mistake to the place of use legal description. No issues of enlargement identified.

Local Public interest:

No issues identified.

Beneficial Use/Conservation of Water Resources:

No issues identified.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.
