5. General Information:

- a. Describe the complete diversion system, including how you will accommodate a measuring device and lockable controlling works should they be required now or in the future:

See attachment Labeled Part 1A.3
All monitoring systems with controlling devices are now in place.

- b. Who owns the property at the point(s) of diversion? Cris G. Davis and Lauretta M. Davis
If other than the applicant, describe the arrangement enabling the applicant to access the property for the diversion system:

- c. Are the lands from which you propose to transfer the water right subject to any liens, deeds of trust, mortgages, or contracts? Yes
If yes, ☒ attach a notarized statement from the holder of the lien, deed of trust, mortgage or contract agreeing to the proposed changes on official letterhead signed by an authorized representative. Label it **Attachment #6**. List the name of the entity and type of lien: Ireland Bank, mortgage.

It is the applicant's responsibility to provide notice to lien holder, trustee, mortgagor, or contract holder of the proposed changes that may impact or change the value of the water rights or affected real property. Any misrepresentation of legal encumbrance on this application may result in rejection of the application or cancellation of an approval.

- d. Are any of the water rights proposed for transfer currently leased to the Water Supply Bank? No
If yes, ☐ complete Attachment WSB.
- e. Describe the effect on the land now irrigated if the place or purpose of use is changed pursuant to this transfer:

The mainline systems will stay in place, but water for irrigation on the land would not be used there.

- f. Describe the use of any other water right(s) for the same purpose or land, or the same diversion system as right(s) proposed to be transferred at both the existing and proposed point(s) of diversion and place(s) use:

NA.

- g. To your knowledge, has/is any portion of the water right(s) proposed to be changed:

Yes No

- ☒ ☐ undergone a period of five or more consecutive years of non-use. (or parcel non-use)
☐ ☒ currently leased to the Water Supply Bank,
☐ ☒ currently used in a mitigation plan limiting the use of water under the right, or
☐ ☒ currently enrolled in a Federal set-aside program limiting the use of water under the rights?

If yes, describe:

(Ranging from D2 to D4)
per USDA maps

Over the last several years due to drought conditions the gravity flow system on some of the parcels could not be irrigated - Lack of pressure to run sprinklers. We have attempted some flood irrigation but without much success. Where these sections were primarily gravity flow systems allowing us to utilize our pumps & monitoring devices would allow better efficiency & use of the water on property under the transfer request. We were able to only run 1 line on the bottom end of the gravity system at times.

Attachment Part 1A.3

ATTACHMENT TO APPLICATION FOR WATER RIGHT ADJUSTMENTS

REESE CREEK 1885 WATER RIGHT #29-10131

Step 1 - Request to add 2 "new" diversion points per application

These 2 diversion points currently have pumps and in line measuring devices, so the water master can easily monitor our actual use. We understand that our maximum irrigation use is 1.7 CFS and 141 acres. This proposal would allow us to alternate irrigation use of the 1.7CFS between our current irrigated acres.

Our irrigation system is made up of underground mainlines with wheelines and handlines.

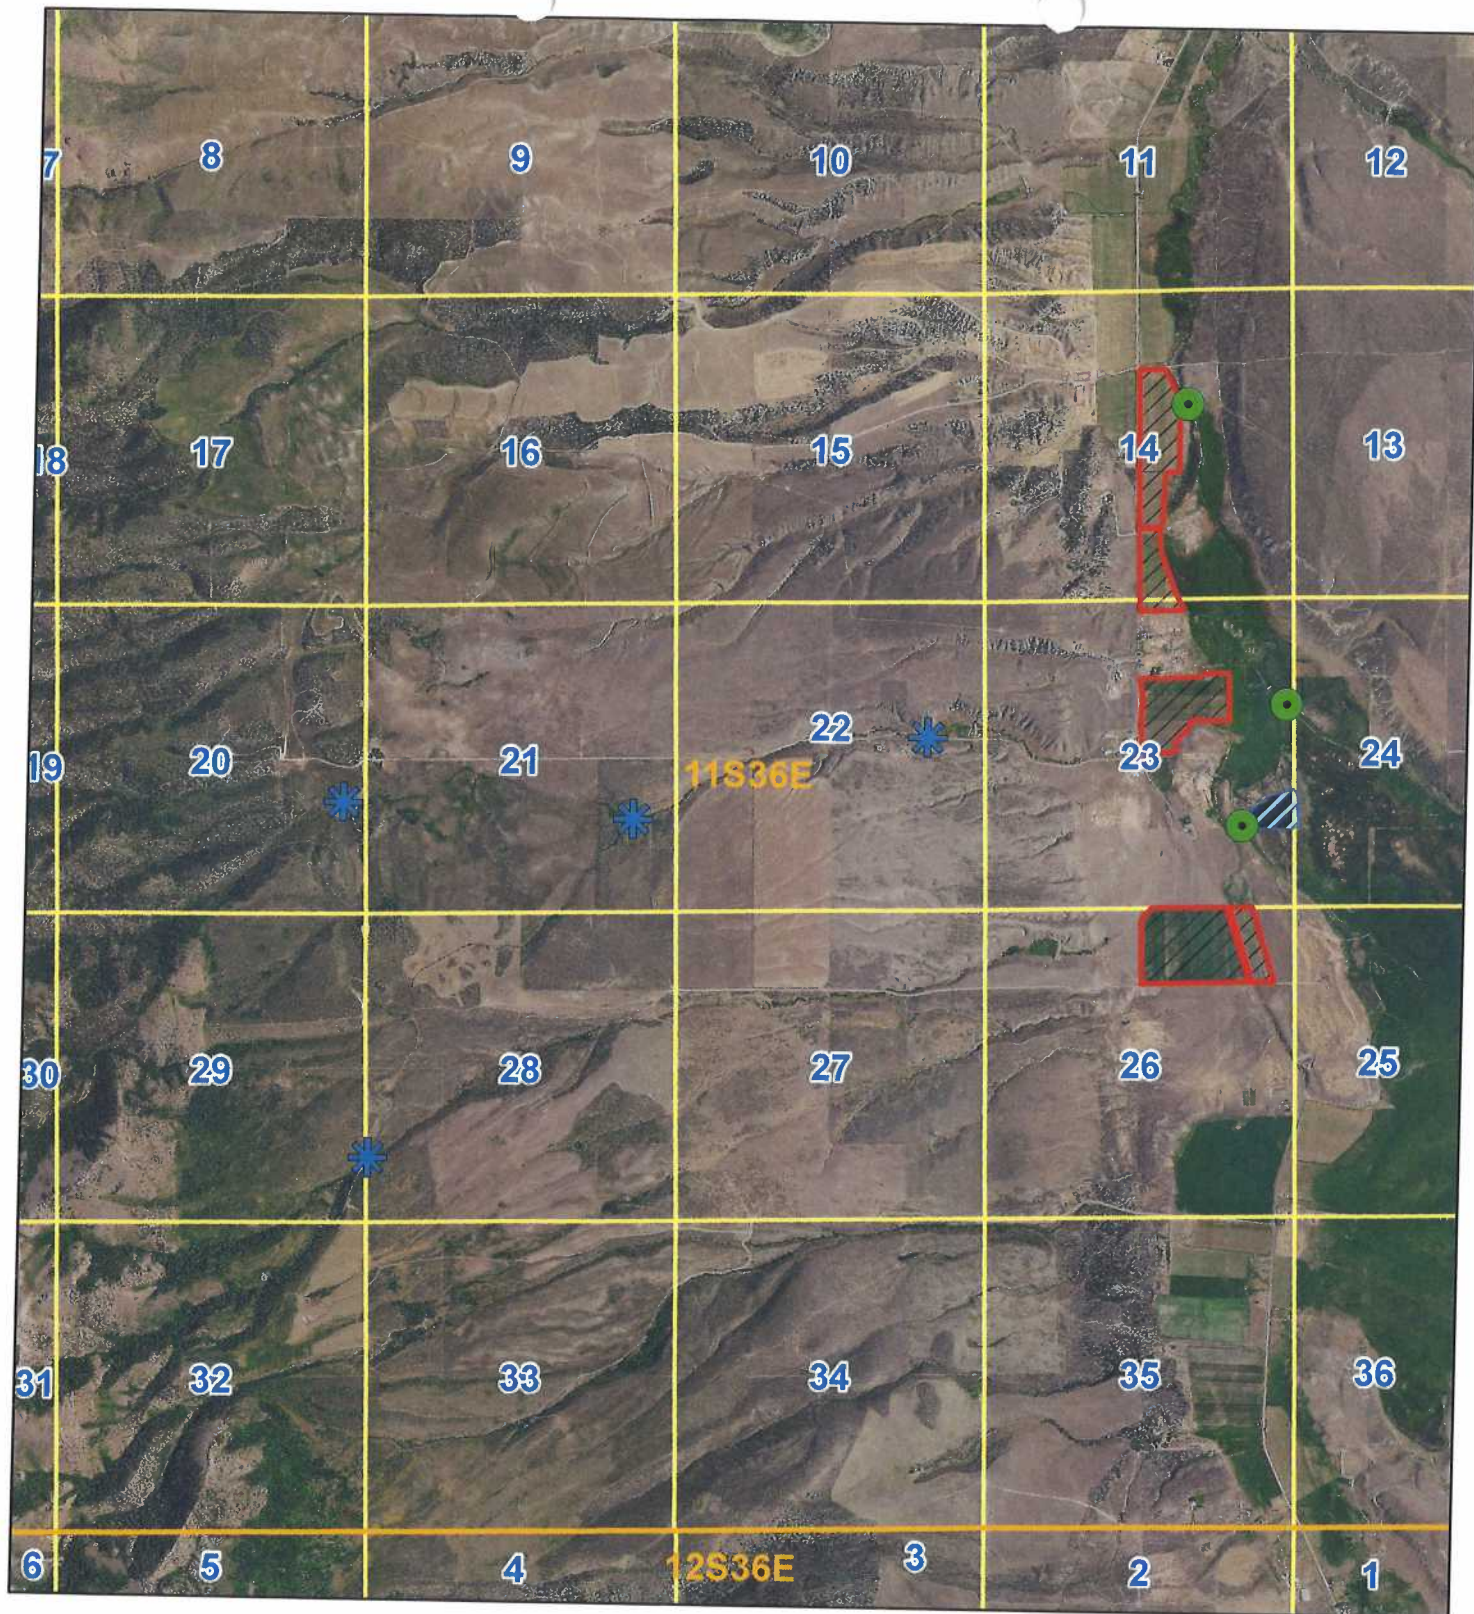

Step 2 - to allow us to use the 1.7CFS across the approx.. 141 acres currently under our irrigation system, we would need to be able to use the storage water from Reese Creek that is now held in our pond storage facility on irrigated cropland located in Sec. 26 NENE and NWNE approx. ~~44~~ acres under transfer plan.

Also, use from pond water that we allow to flow into Marsh Creek, then redivert thru the "new" diversion point in Marsh Creek that has a pump and measuring device near Ford Road to irrigated land in Sec. 14 SWNE and NWSE approx.. ~~19~~ acres under transfer plan.

We would also continue to use our gravity flow system on uses designated already under the 1885 water right.

Thank you!
