Sandi Bates
10 Cameron Way
North Fork, ID 83466

Dear Mrs. Bates,

Thank you for submitting a proposal to the Salmon-Challis National Forest for operation and maintenance of the Sheep Creek 1 headgate and ditch, an existing water transmission system located on Forest Service land that provides water to your private land.

You recently submitted an Application for Permit #75-15040 to the Idaho Department of Water Resources (IDWR) to divert water from National Forest System (NFS) land through an existing ditch to your private property. The source of the water is Sheep Creek via the Sheep Creek 1 ditch. It is my understanding that submitting a proposal to the Forest Service to operate and maintain the Sheep Creek 1 water transmission system is required in conjunction with your application to IDWR.

This letter serves as documentation for you and IDWR that the Forest Service is in receipt of your proposal.

If you have any questions, please contact Kelly Schade, Diversion Coordinator at 208.756.5229 or kelly.schade@usda.gov.

Sincerely,

**CHRIS
