WATER SUPPLY BANK LEASE CONTRACT No. 1526

8. Acceptance of a right into the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other Department application process.
9. In accordance with Idaho Code § 42-248 and § 42-1409(6), all owners of water rights are required to notify the Department of any changes in mailing address or change in ownership of all or part of a water right. Notice must be provided within 120 days of the change.
10. If a water right leased into the Water Supply Bank is sold or conveyed during the lease term, and if the leased right was rented, the rental proceeds will be disbursed in the following manner regardless of any arrangements between the buyer(s) and seller(s) to the contrary:
 - a. Rental payments will go to the lessor(s) of record at the beginning of the rental season, even if the Department processes a Notice of Change in Water Right Ownership during the rental season.
 - b. New lessor(s) of record will receive payment for any subsequent rental seasons.
11. The water right(s) is leased to the bank subject to all prior water rights and shall be administered in accordance with Idaho law and applicable rules of the Department of Water Resources.
12. Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 120.
13. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.0 afa per acre at the field headgate for irrigation of the lands above.
14. A lockable device subject to the approval of the Department shall be maintained on the diverting works in a manner that will provide the watermaster suitable control of the diversion.
15. The unleased portions of water right 35-4062 shall not exceed a total diversion rate of 0.23 cfs, a total annual maximum diversion volume of 60 af, and the irrigation of 15.0 acres.

Enclosures: Proposed Lease Contracts

MEMORANDUM FOR APPLICATION # 2357

To: Water Right(s) 35-4052
From: Tyler Smith
Date: 5/5/2022
Re: Review & Analysis of Application to Lease Water to the State Water Supply Bank

Purpose/Narrative: An application was received by the Department on April 19, 2022 from Patti and Paul Lindholm (Applicants) offering the entirety of water right 35-4062 for lease to the Bank from 2022 through 2026. The right has been in a federal set-aside program from 2006-2021.

Authority to File: The application was filed in the name of Patti and Paul Lindholm. The Lindholm's are also the current owners of water right 35-4062 and the property owners at the water right place of use. No concerns with authority to file.

Water Right Validity: 35-4062 was decreed in 2002 for 242 acres. In 2006, 197.8 acres of the right was enrolled in a set-aside program that protected the right from forfeiture under §42-223. Additionally, there was 176.8 af of allowed volume (the volume that may still be used) as a result of the program, or 44.2 acres that were not protected under §42-223. The agreement ended 9/30/2021.

Google Climate Engine analysis indicates approximately 29.2 acres continued to be irrigated for the duration of the set-aside agreement. Therefore, 15.0 of the 44.2 acres not protected from forfeiture by the set-aside program cannot be accepted into the Bank at this time. The total number of acres acceptable for lease is 227. See Appendix A for Google Climate Engine details.

Of the 15.0 acres, 11 were not accepted in the NWNE and the remaining 4.0 were not accepted in the SWNW Lot 2. This is based on aerial imagery from 2006, when the right was put into the set-aside program, and the number of acres authorized by the right in those $\frac{1}{4}$'s.

Injury to Other Water Rights: Lease of this water right would not cause injury to other water rights. Proper review to prevent injury if rented.

Enlargement of Use: This right has no combined limits and is not "stacked". No concerns with enlargement.

Local Public Interest: Review staff has no information to suggest this application is inconsistent with the local public interest.

Beneficial Use/Conservation of Water Resources: The lease appears consistent with the conservation of water resources in Idaho.

Department Staff or Watermaster Comments: The location for the rental PD is subject to Water District # 120 and is within the Bingham Ground Water District.

Water Supply Bank Evaluation: Based on the information presented by the applicant and pending any concerns or comments, staff recommend the lease proposal be approved for the 2022-2026 irrigation seasons.

Appendix A

Fig. 1 – The acres within the place of use where irrigation is visible in aerial imagery and used for Google Climate Engine analysis.

Fig. 2 – Data for the two polygons showing NDVI values greater than 0.6 for an extended period of the growing season for the previous 5 years, indicating irrigation beyond the background vegetation.

Fig. 3 – An analysis was also done on acres that were possibly irrigated during the previous 5 years.

Fig. 4 – Data for polygons from fig. 3. Although the NDVI values reach above 0.6, it was only for short spikes and were not sustained. This indicates spring precipitation and/or runoff and not applied irrigation.
