DEPT OF WATER RESOURCES
SOUTHERN REGION

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES

Ident. No. 72-17016

APPLICATION FOR PERMIT

To appropriate the public waters of the State of Idaho

- Name of applicant(s) STATE OF IDAHO, Idaho Fish and Game Commission Phone 208-334-3700
Mailing address P.O. Box 25 City Boise
State ID ZIP 83707 Email _____
Name connector (check one): ☐ and ☐ or ☐ and/or
- Name of representative, if any Mike Demick - Easement Specialist Phone 208-756-6022
Mailing address 97 Highway 93 North City Salmon
State ID ZIP 83467 Email mike.demick@idfg.idaho.gov
a. ☐ Send all correspondence for this application to the representative and not to the applicant OR
☒ Send original correspondence to the applicant and copies to the representative.
b. ☒ The representative may submit information for the applicant but is not authorized to sign for the applicant OR
☐ The representative is authorized to sign for the applicant. Attach a Power of Attorney or other documentation.
- Source of water supply Garden Creek which is a tributary of Salmon River
- Location of point(s) of diversion:

Twp	Rge	Sec	Govt Lot	1/4	1/4	1/4	County	Source	Local name or tag #
~~14N~~	~~19E~~	~~32~~			~~NW~~	~~NW~~	Custer	Garden Creek	SGaC-01
<u>14N</u>	<u>19E</u>	<u>31</u>			<u>NE</u>	<u>NE</u>			

- Water will be used for the following purposes:
Amount .80 for Fish Propagation purposes from 4/01 to 10/31 (both dates inclusive)
(cfs or acre-feet per year)
Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per year)
Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per year)
Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per year)
- Total quantity to be appropriated is (a) .80 cubic feet per second (cfs) and/or (b) _____ acre-feet per year (af).
- Proposed diverting works:
a. Describe type and size of devices used to divert water from the source. Single rotary drum fish screen (36-inch by 12-foot, perf. plate), paddlewheel powered, 10-inch fish bypass pipe from fish screen to stream, lockable headgate
b. Height of storage dam na feet; active reservoir capacity na acre-feet; total reservoir capacity na acre-feet. If the reservoir will be filled more than once each year, describe the refill plan in item 12. For dams 10 feet or more in height AND having a storage capacity of 50 acre-feet or more, submit a separate [Application for Construction or Enlargement of a New or Existing Dam](#). Application required? ☐ Yes ☒ No
c. Proposed well diameter is na inches; proposed depth of well is na feet.
d. Is ground water with a temperature of greater than 85°F being sought? ☐ Yes ☒ No
e. If well is already drilled, when? na; drilling firm na;
well was drilled for (well owner) na; Drilling Permit No. na

For Department Use

Received by DM Date 7-29-2022 Time 1:20 PM Preliminary check by _____
Fee \$ 250- Received by Inter-Agency Receipt No. BILL015901 Date _____

8. Description of proposed uses (if irrigation only, go to item 9):
- Hydropower; show total feet of head and proposed capacity in kW. na
 - Stockwatering; list number and kind of livestock. na
 - Municipal; must complete and attach the [Municipal Water Right Application Checklist](#).
 - Domestic; show number of households na
 - Other; describe fully. This is a non-consumptive use that enables fish entrained in ditch to return to stream through a fish bypass pipe that runs from the screen to the stream.
9. Description of place of use:
- If water is for irrigation, indicate acreage in each subdivision in the tabulation below.
 - If water is used for other purposes, place a symbol of the use (example: D for Domestic) in the corresponding place of use below. See instructions for standard symbols.

TWP	RGE	SEC	NE				NW				SW				SE				TOTALS
			NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	
14N	19E	32						H											

Total number of acres to be irrigated: 0

10. Describe any other water rights used for the same purposes as described above. Include water delivered by a municipality, canal company, or irrigation district. If this application is for domestic purposes, do you intend to use this water, water from another source, or both, to irrigate your lawn, garden, and/or landscaping? Point of Diversion is shared with other water right holders. This is the only right for the fish screen.
11. a. Who owns the property at the point of diversion? Yacomella Revocable Living Trust & Tony Yacomella
b. Who owns the land to be irrigated or place of use? Yacomella Revocable Living Trust & Tony Yacomella
c. If the property is owned by a person other than the applicant, describe the arrangement enabling the applicant to make this filing: IDFG holds a recorded easement for ingress/egress to operate/maintain the screen/bypass on property.
12. Describe your proposal in narrative form, and provide additional explanation for any of the items above. Attach additional pages if necessary. To record a non-consumptive use of water for a fish screen/bypass pipe installed and currently operating. Note: POD is located very near or on Section Line between NENE Section 31 and NWNW Section 32, so is noted in #4 chart above.
13. Time required for completion of works and application of water to proposed beneficial use is 1 years (minimum 1 year).
14. **MAP OF PROPOSED PROJECT REQUIRED** - Attach an 8½" x 11" map or maps clearly identifying the proposed point of diversion, place of use, section #, township & range. The map scale shall not be less than two (2) inches equal to one (1) mile.

The information contained in this application is true to the best of my knowledge. I understand that any willful misrepresentations made in this application may result in rejection of the application or cancellation of an approval.

Dear Applicant(s):

The Department of Water Resources has received your water right application. Please refer to the number referenced above in all future correspondence regarding this application.

A legal notice of the application has been prepared and is scheduled for publication in the **CHALLIS MESSENGER on 9/1/2022 and 9/8/2022**. Protests to this application may be submitted for a period ending ten (10) days after the second publication. Any protest against this application must be filed with the Department of Water Resources, together with a protest fee of \$25.00 for each application, on or before **September 19, 2022**.

If the application is protested, you will be sent a copy of each protest. All protests must be resolved before the application can be considered for approval. If the protest(s) cannot be resolved voluntarily, the Department will conduct a conference and/or hearing on the matter.

If the application is not protested, the Department will process your application and notify you of any action taken on the application. If your application is approved, the Department will send you a copy of the permit.

Please contact this office if you have any questions regarding the application.

Sincerely,

Denise Maline

Dear David:

The Idaho Department of Water Resources (IDWR) is seeking written comment and/or recommendations from you regarding the above referenced water right application. You can find a copy of the application at:

<https://idwr.idaho.gov/apps/ExtSearch/WRAJSearch/WRADJSearch.aspx>. Please review the application, then complete the enclosed recommendation form and return it to this office within 21 days of the date of this letter.

If the application is approved, IDWR will include appropriate standard conditions of approval for a water right located within a water district, such as regulation by the watermaster, lockable controlling works, and/or measuring devices. Any special conditions or other concerns you have related to this application should be specifically addressed in your recommendation.

IDWR can finish reviewing an unprotested application as soon as the protest period has past. Your prompt response to this request will ensure that your recommendation can be considered. If IDWR has not received your written recommendation within 21 days from the date of this letter, IDWR will presume that you do not oppose approval of the application and that you have no comments for IDWR to consider.

Sincerely,

Denise Maline

RE: Applications to Appropriate Water in the Upper Salmon River Basin 71-11010, 71-11011, 71-11012, 71-11013, 71-11014, 71-11015, 71-11017, 71-11018, 72-17012, 72-17013, 72-17014, 72-17015, 72-17016, 72-17017, 17-17018, 72-17019 – Fish Propagation (fish screens/fish bypass)

Dear Jim:

For additional information on how our proposal for the above mentioned Water Rights (WR) invokes any local public interest concerns for ESA species recovery, the Idaho Department of Fish and Game (IDFG) submits the following:

The IDFG Anadromous Fish Screen and Habitat Program has been an integral part of improving conditions to support recovery of ESA-listed fish species - Chinook salmon, steelhead, and bull trout in the Upper Salmon Basin. IDFG works collectively with the Upper Salmon River Basin Watershed Technical Team to coordinate and prioritize projects implemented in the basin.

Over the past 60 years, our program has installed over 281 fish screens to prevent ESA-listed fish species from being entrained in irrigation ditches. In order to safely return the fish from the fish screen back to the river or stream, from which they were diverted, a bypass flow is required.

The applications for WR's represents a non-consumptive use. Where the water is diverted at the headgate, travels a short distance downstream to the fish screen (usually less than 100 yards), and is then returned to the river or stream via a bypass pipe. The bypass pipe is designed to transfer the fish back to the river or stream. Without the critical bypass flow the fish would become stranded at the face of the fish screen and would not be reverted to the river. Fish screens and the bypass flows protect irrigators from illegal take of ESA-listed species and provide a benefit to the community by protecting and enhancing ESA-listed species populations for future generations.

If you have any questions or need additional assistance, please contact the Region's Easement Specialist, Mike Demick at 208-756-2271.

Sincerely,

Tom Curet
Regional Supervisor

RE: Applications to Appropriate Water in the Upper Salmon River Basin 71-11010, 71-11011, 71-11012, 71-11013, 71-11014, 71-11015, 71-11017, 71-11018, 72-17012, 72-17013, 72-17014, 72-17015, 72-17016, 72-17017, 72-17018, 72-17019 - Fish Propagation (fish screens/fish bypass)

Dear Water Right Applicant:

The Department of Water Resources' (IDWR) records show you filed an application to establish a new use of water in the upper Salmon River basin. Idaho Code § 42-203A(5) requires IDWR to determine whether each water right application satisfies all the criteria necessary for appropriating water in Idaho. One statutory criterion requires IDWR to determine the local public interest relative to the proposed water use. Idaho Code § 42-202B(3) defines the local public interest as "the interests that the people in the area directly affected by a proposed water use have in the effects of such use on the public water resource." The local public interest has many facets, including the effects of a proposed water use on aquatic habitat for fish and wildlife resources.

The upper Salmon River basin is home to stocks of chinook salmon, sockeye salmon, steelhead trout, and bull trout, all of which are listed as threatened or endangered under the Endangered Species Act (ESA). Since the early 1990s, local water users, conservation districts, and federal and state agencies have cooperated to implement conservation measures intended to protect and restore habitat for ESA-listed species in the upper Salmon River watershed. For example, at the request of local water users the Idaho Legislature directed the Idaho Water Resource Board (IWRB) to establish a minimum stream flow in the lower Lemhi River for fish passage. The minimum stream flow is maintained through a water supply bank and temporary or permanent acquisition of additional water supplies by willing buyers from willing sellers.

Pursuant to the Snake River Water Rights Agreement of 2004, Idaho has been developing a long term conservation plan for the benefit of ESA-listed species in the Lemhi River basin. Improving conditions in flow-limited river reaches and streams is a fundamental component of the Lemhi plan. In addition to IDWR, numerous state agencies, including the Office of Species Conservation, Idaho Department of Fish and Game, Idaho Department of Environmental Quality,

Idaho Soil and Water Conservation Commission, and Idaho Department of Lands, have committed and continue to commit significant resources toward this objective under the following programs:

- Columbia Basin Water Transactions Program
- National Marine Fisheries Service Pacific Coastal Salmon Recovery Fund
- U. S. Fish & Wildlife Service Aquatic Species Conservation Fund
- Salmon and Clearwater River Basins Habitat Fund
- 2008 Columbia Basin Fish Accords

A myriad of habitat restoration projects are being constructed/implemented in other parts of the upper Salmon River basin. These projects have been coordinated with the local communities and water users through the Upper Salmon River Basin Watershed Program and predecessor programs, including the model watersheds. Furthermore, the Snake River Water Rights Agreement of 2004 contemplates the development of additional conservation plans for other upper Salmon River basin watersheds. Accordingly, the Comprehensive State Water Plan revised by the IWRB contains policies for the Salmon River basin that focus on the protection and restoration of instream habitat for ESA-listed species through voluntary participation in conservation programs.

Because of the ESA-listed species recovery efforts in the upper Salmon River basin, IDWR must determine on a case-by-case basis whether it is in the local public interest to authorize proposed water uses that would further deplete flow-limited stream reaches.

Pursuant to Rule 40.04.c of the Water Appropriation Rules (IDAPA 37.03.08.040.04.c), the applicant has the ultimate burden of persuasion regarding the items that must be evaluated in connection with each water right application. Before proceeding further with your application, IDWR requests you submit additional information about how your proposal invokes any local public interest concerns for ESA species recovery.

Within 30 days, please submit any additional information you believe IDWR may need to evaluate and determine the local public interest in the water you propose to divert and use. If IDWR has not received a response from you within 30 days, IDWR will assume you have no comment regarding the local public interest, and processing of your application will resume with the information currently on file. Processing will include public notice and the potential for formal protests by other interested parties. Applications that are not in the local public interest will be denied. If you wish to withdraw your application before it is processed, please notify IDWR in writing.

If you have any questions, please call me at (208) 293-9909, or email me at james.bitzenburg@idwr.idaho.gov.

Sincerely,

Jim Bitzenburg
Water Rights Supervisor

Subject: RE: Fish Screen Application for Permit on Garden Creek

Hello Bill: Yes; NENE works.

I met with Cindy Yenter at IDWR before she retired to visit about exact POD locations. We tossed the location around and she recommended that I list both QQ's because it's very close. Looking at your map, it is located in NENE.

Of the 16 App for Permit applications I recently sent, there are several additional apps with the same issue.

Sorry for the extra work. These should have been submitted years ago.

Mike

Subject: Fish Screen Application for Permit on Garden Creek

Mike,

On the application for permit for the fish screen on Garden Creek, you indicated the point of diversion (POD) is very near or on the line between NENE of Section 31 and NWNW of Section 32 and you listed both locations on the POD grid. Since the Department can only have one legal description per POD, I'm going to ask you to select which one it will be. However, I've attached a map of the POD in ArcMap, that shows under the current version of the Geographic Coordinate Data Base (GCDB), the POD appears to be located in the NENE of Section 31. This may change again in the future as the BLM adjusts the GCDB, but for now that seems to be the location. I'll put a condition on the permit when it is drafted, indicating the legal description of the current projection is in the NENE of S31 (should you choose that location), but due to its proximity to the section line, that could change in the future. Permit/water right holders aren't required to update records when the GCDB lines shift. So does the NENE of Section 31 work for you?

Thanks,

Bill Mills

Dear IDWR:

Enclosed please find 16 "Application for Permit" forms for new water rights in Basin 71 & 72.

Please initiate the Interagency Billing Process for the \$250 application fee for each of these applications, using PCA 31804 and code CINX. Please send the billing documents to IDFG Headquarter's Office, Attention: Tom Bassista, P.O. Box 25, Boise ID 83707. Tom can also be reached at 208-287-2773 or Thomas.bassista@idfg.idaho.gov.

Please send copies of the approved permits to IDFG Salmon Region, Attention: Mike Demick, 97 Hwy 93 N, Salmon, ID 83467. Please call me if you have any questions at 208-756-6022.

Sincerely,

Mike Demick
