DEPARTMENT OF WATER RESOURCES
STATEMENT OF COMPLETION
FOR SUBMITTING PROOF OF BENEFICIAL USE

FOR OFFICE USE ONLY	
Amt. of Fee \$	200.00
Receipt No.	C113645
Received By	KU
Date Received	8.9.22

The Idaho Department of Water Resources (Department) considers this form a statement that the permit holder(s) applied water to beneficial use and completed development of a water right to the extent described below. This form must be accompanied by an examination fee, when necessary, or by a completed Beneficial Use Field Report prepared by a certified water right examiner (CWRE). Please refer to the instructions and fee schedule for this form. If ownership of the permit has changed, complete an Assignment of Permit form. If you wish to relinquish your permit because you have not established the authorized water use and are not applying for an extension, please notify the Department in writing.

1. Permit No. 94-7426 Name of Permit Holder(s) Golf LLC
 Telephone No. 208 783 1111 Email JeffC@Silvermt.com
 Mailing Address 701 Bunker Ave. Apt 113 City Kellogg State ID Zip 83837

2. Source of Water Government Crk, S.Fork CDA River If Ground Water (well), Date Drilled mo. ____ / yr. ____
 Drilling Permit/Tag No. ____ Drilling Company's Name ____

3. Extent of use(s) completed as authorized by the water right permit:
 Domestic (No. households) ____ Irrigation (No. acres) 50 Stockwater (No. and stock type) ____
 Other ____

4. Total diversion rate or volume (storage only) for which proof is submitted 1.12 cfs OR ____ af
If the total developed water use is 5 acres of irrigation or less, is stockwater storage of 14.6 acre-feet or less, or has a diversion rate of less than 0.24 cfs, attach a map of the place of use and point of diversion and photographs showing beneficial use.

5. Describe the diversion and delivery system from the water source to the use (pump, lift, irrigation method, etc.)
See Attachment A

6. Permit condition compliance. Refer to the permit approval conditions and check all the items required, then check "Yes" or "No" to indicate whether the required items were established, submitted, and/or installed:

Required? Yes No (If "Yes", attach required data, evidence of compliance, or evidence of installation)

- | | | |
|--------------------------|-------------------------------------|---|
| ☐ | ☒ | Ground water level data, pumping information, or other diversion data |
| ☐ | ☒ | Mitigation plan |
| ☐ | ☒ | Lockable controlling works |
| ☐ | ☒ | Measuring device |
| ☐ | ☒ | Fish screen |
| ☐ | ☒ | Other requirements of the water right permit |
| ☐ | ☒ | Reasonably Anticipated Future Needs ("RAFN") Municipal use |

If RAFN Municipal use, additional increment of beneficial use developed? ☐ Yes (attach CWRE report) ☐ No

7. Fee Enclosed \$ 200 or ☐ CWRE field report attached or ☐ No fee required
See fee schedule on page 3 of the instructions. Proof statements filed without an appropriate fee are incomplete.

8. Person to contact to accompany a Department representative during the field examination of the water system:

Name: Geoff Haynes Telephone No. 7605223573 Email GeoffH@Silvermt.com
 Mailing Address 701 Bunker Ave, Apt 113 City Kellogg State ID Zip 83837

The information given on this form is my true statement of the extent to which the above numbered permit has been developed and water has been diverted and applied to beneficial use. I understand that any undeveloped portion of the permit is relinquished to the State of Idaho.

SIGNATURE OF PERMIT HOLDER*

Tryg Fortun

PRINTED NAME AND TITLE

DATE

*Attach power of attorney if completing on behalf of permit holder.

ATTACHMENT A

Briefly Describe the water diversion and delivery system

- An intake basin and diversion structure was constructed on Government Creek to provide a source for water diversion. for a withdrawal pump station
- A duplex pumping station was constructed at the point of withdrawal on Government Creek with two 50-hp pumps, each with rated pumping capacity of 500 GPM
- Installation of a control panel, hour meters and flowmeter (2021) for irrigation pumps at the point of diversion (POD).
- Installation of a 10" diameter buried transmission main, 2780-feet in length with 295-ft of vertical lift was installed from the POD to the storage pond.
- Construction of an irrigation storage pond for the Golf Course: The irrigation storage pond has approximately 1 acre or surface area at max level. It has a maximum depth of approximately 20-ft with an estimated maximum storage volume of 16 ac-ft. The pond typically is operated with a maximum surface level that is 5 -ft below the maximum level.
- Installation of the upper pump station to provide pressurized irrigation water to approximately 50% of the irrigated areas. The remaining 50% of the irrigated areas are fed via gravity from the storage pond. The upper pump station has hour meters and a flowmeter but only measures approximately 50% of the total irrigation water.
- 9 golf holes of golf, have been constructed with the associated course irrigation infrastructure on roughly 50 acres of land, with the development of fairways, greens, rough, practice areas, travel corridors and vegetative buffers. The golf course irrigation is done with a variety of zone specific sprinklers.
- The diversion pump station flowmeter has been continuously recording withdrawal flows since installation on July 13, 2021. The period ending July 10,2022 had recorded 17,056,162 gallons of flow to the storage pond. The average daily use July 2021-July 2022 has been 188,655 gpd. The July 2022 average use was 214,200 gpd.

RE: Transmittal

State of Completion-Proof of Beneficial Use
Idaho Department of Water Resources, Water Rights Permit No. 94-7426, Golf LLC

Dear Mr. Colburn,

I have completed the Statement of Completion for the Proof of Beneficial User for the Permit 94-7426. It is attached to this transmittal and requires a \$200 license examination fee for an IDWR site inspection to field verify Permit conditions. This check should be made payable to the Idaho Department of Water Resources (IDWR). This Statement also requires the signature of Tryg Fortun, please sign and date at the bottom. IDWR will contact Geoff Haynes to schedule the examination.

I reviewed the past water withdrawal volumes and rates, the installed infrastructure for the 9 holes of Golf irrigation system, and the historic Idaho Department of Water Resources (IDWR) application(s) and extensions and the Permit conditions.

There was an incomplete data set for historic withdrawals and pump run times, and the only flowmeter data was from the upper pump station. The upper pump station only pumps water to approximately 50% of the irrigation system the other 50% of irrigation water is gravity fed from the pond, so using the upper pump station flow meter data could be easily misconstrued.

So it was decided to collect lower pump station flowmeter data through July of 2022 and use this as the basis of information to complete the Statement of Beneficial Use. This flowmeter was installed in July of 2021.

The irrigation system is currently withdrawing an average of 214, 200 gallons per day (during July 2022) at a rate of 500 gpm (1.12 cfs). The annual use from July 2021-July 2022 was measured at 52.3 ac-ft, the peak monthly withdrawal (annualized) is calculated to be 106 ac-ft. These uses are within the permitted conditions of 2.5 cfs withdrawal and 500 ac-ft per year. The storage volume of the upper pond at maximum volume was estimated at 16 ac-ft, from mapping the maximum surface area and a historic maximum depth of 20-ft noted in reviewed documents. This is also within the permitted conditions of not more than 500 ac-ft. IDWR will calculate their own numbers for the permit based on the field examination.

The enclosed Statement of Completion should be mailed to IDWR in the attached envelope, after signature by Tryg with Attachment A and the \$200 check. This cover letter is for your use and should not be enclosed in the IDWR package.

Thank you for the opportunity to provide this service.

PROOF ACKNOWLEDGEMENT LETTER

RE: Permit No. 94-7426

Dear Permit Holder:

The Department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the Department to conduct a field examination to determine and confirm the use being made of the water.

Please be advised that Idaho Code § 42-248, requires you or the owner of this water right to maintain current ownership and address records on file with the Department. Forms to file a change of ownership of a water right and/or a change in the address of the water right owner are available from any Department office or at the Department's website at www.idwr.idaho.gov.

If you have any questions concerning the field examination, please contact the Northern Region Office of the Department located in Coeur d'Alene at (208) 762-2800.

Sincerely,

Debbi Judd
Technical Records Specialist
