1. The use of water under this agreement shall be subject to the provisions of Idaho Code § 42-1766.
2. Rental of the specified right from the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other department application process.
3. Use of water under this agreement does not constitute a dedication of the water to renter's place of use, and upon expiration of this agreement, the points of diversion and place of use of the water shall revert to those authorized under the water right and/or again be available to rent from the bank.
4. Use of water under this agreement shall not prejudice any action of the Department in its consideration of an application for transfer or permit filed by the applicant for this same use.
5. Renter agrees to comply with all applicable state and federal laws while using water under this agreement.
6. Renter agrees to hold the Board, the Director and the state of Idaho harmless from all liability on account of negligent acts of the renter while using water.

8. Failure of the renter to comply with the conditions of this agreement is cause for the Director to rescind approval of the rental agreement.
9. This rental agreement when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.0 afa per acre at the field headgate for irrigation of the place of use.
10. Use of water under this right may be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 120.

This application must be completed according to the minimum requirement checklist below. This checklist is part of the rental application and must be included with the rental application. Applications that do not meet the minimum requirements will not be placed in the processing queue and may be returned until all minimum requirements have been met.

Rental applications should be submitted well in advance of the desired start date for the use of rental water. Rental applications may be processed as early as November 1 of the year prior to the intended use of rental water. Rental applications may be returned to applicants if the desired start date for the use of rental water cannot be accommodated by the Water Supply Bank. Rental requests will not be accepted once the rental season of use period has concluded.

One rental application per beneficial use of water. For multiple beneficial uses of water, separate rental requests should be submitted for each unique beneficial use of water. One rental application can be submitted if you propose to rent water from multiple sources.

For additional instructions on completing a rental application, visit the Bank's website at http://idwr.idaho.gov/water_supply_bank.

- D. Describe your water distribution system and how rental water will be delivered from the point(s) of diversion (POD) to the proposed place of use (POU):
Water is pumped from a well and then delivered through pipe to stationary sprinklers and K-Line sprinklers.

- E. Describe the physical type (pump, headgate, etc.) and location of the POD from which rental water is proposed to be diverted:

POD Description	Water Source	Other Water Rights Diverted from this POD
Well/Pump	Ground Water	N/A

If the POD(s) above are located where water is turned into a canal, lateral or ditch, or if they are located on your property but are serviced by water that is delivered via a canal, lateral or ditch, your rental request must include documented authorization from all relevant canal companies, irrigation districts and/or water delivery entities, confirming that they consent to your diversion of water from their system.

- F. Has documented consent from all relevant water delivery entities been obtained? Yes ☐ N/A ☒
 If yes, include documented consent as Attachment 3F.

- G. Do any POD(s) identified in Question 3E divert from a water source that may require water modeling? Yes ☒ No ☐
Refer to the Water Modeling Requirements Information Sheet to determine if a rental POD may require water modeling.

- H. Has water modeling been provided with your rental request? Yes ☒ N/A ☐
 If yes, label modeling Attachment 3 H.
Rental applications that require modeling will be returned if modeling is not provided.

- I. Specify the desired beneficial use of water and the requested season of use or number of acres required:

4. RENTAL REQUESTS FOR SPECIFIC WATER RIGHTS

A. Are you requesting to rent specific water rights?

Yes ☒ No ☐

If yes, specify below the elements of the water rights you are requesting to rent. If no, continue to Question 4B.

Important Information: Diversion rates and volumes sought for rent must be proportionate to the per acre diversion rates and per acre volume limits of the water right under lease contract to the Water Supply Bank. Prior to completing this section, applicants should review all water right lease contracts and any active rental agreements to determine which elements of a water right are available to satisfy a rental request. Lease and rental documents are searchable via [IDWR's website](#).

Water rights identified below must either already be leased to the Bank or a lease proposal should accompany this rental request. **Rental requests for water rights not yet leased to the Bank will be returned if companion lease applications are not provided with the rental request.** For leased rights featuring combined limits, rentals must be consistent with combined diversion rate, volume or acre limits. Combined limits should be listed on a row below water right numbers.

Water Right Elements Leased to Water Supply Bank					Leased totals, minus water right elements involved in active rental agreements, equals water right elements available for rent	Water Supply Bank Rental Request		
Water Right Number (leave blank if sub-total of combined limits)	Nature of Use	Diversion Rate (CFS)	Volume (AF)	Acres (AC)		Diversion Rate (CFS)	Volume (AF)	Acres (AC)
29-2489C	Irrigation	0.63	156.0	44.5		0.05	9.7	2.4
29-10053	Irrigation	0.13	54.92	44.5		0.01	2.3	0.6
Applicants must ensure the requested rate per acre and volume per acre do not exceed the rate per acre and volume per acre limits of water rights leased to the Water Supply Bank					TOTAL	0.06	12.0	3.0
						CFS	AF	AC

*Attach multiple copies of this page if space above is insufficient to list all water rights requested to be rented on this application.

B. If water right conditions, combined limits, or the sum of all water right elements being requested provide an unconventional duty of water (e.g., an unusually low rate per acre or volume per acre for irrigation use), explain how your proposed rental will sufficiently accomplish your intended purposes. Attach a separate page if space is insufficient and label it **Attachment 4B**:

C. Does your rental request propose to change the nature of use for any water right(s) being rented?

Yes ☐ No ☒

If yes, explain how the water right(s) will be converted to new uses. Include the historic, consumptive use amounts for the water right being rented if you have it, as well as the new consumptive use amount for your proposed beneficial use. If space below is insufficient, attach a separate page and label it **Attachment 4C**:

**RE: APPLICATION TO RENT WATER FROM THE WATER SUPPLY BANK
WATER RIGHT NO(S). 29-2489C, 29-10053 & 29-13941 AGREEMENT 647**

*****TIME SENSITIVE RESPONSE REQUIRED*****

Dear Applicant:

The Department of Water Resources acknowledges receipt of your application to rent water from the Water Supply Bank. **I have enclosed a Water Supply Bank Rental Agreement for your review and signature.** Upon signature and return of the original agreement, together with the rental fee described below, the Department will also sign the original agreement and return an executed copy to you. Execution of the agreement and compliance with the conditions of approval authorize diversion and use of water as provided in the agreement.

A rental fee of \$222.00 per year was calculated based on the current rental rate of \$20.00 per acre-foot times a diversion volume of 11.1 acre-feet.

Please send a check for \$222.00 for 2022 made payable to the Idaho Department of Water Resources, **together with the signed rental agreement, within 14 days** so I can complete processing. An annual payment shall be received by the Department prior to the execution of this agreement and prior to January 1 in all subsequent years for the duration of the rental period. The agreement will be void if payment is not received prior to the due date in a given year. If you would like to terminate the agreement prior to the end of the rental period, you must submit written notice of your intent to the Department at least 30 days prior to the rental fee due date.

Pursuant to the Water Supply Bank Rules, 90% or \$199.80 of the rental fee will be paid to the lessor(s) and 10% or \$22.20 will be retained by the Department to offset administrative costs for **2022**.

If you have any questions, please contact this office at bank@idwr.idaho.gov or (208) 287-4800.

Sincerely,

Amanda Johnson-Veibell

RE: Evaluation of WSB Rental Application 2311

DATE: July 15, 2022

Purpose

This rental application was submitted in response to enforcement case E2017-1221. The applicant proposes to rent ground water to irrigate 3.0 acres of hay and horse pasture. The land is not currently covered by any existing irrigation water rights. The water will be diverted from the same well used to supply domestic water for the home

The applicant requested to rent 3.0 acres from lease contract 1350. However, at the time of processing, only 1.9 acres remained available for rent from that lease. The remaining 1.1 acres was provided using water right 29-13941 under lease contract 1354.

The applicant requested a 5-year rental duration. However, both lease contracts involved with this rental have effective dates ending in 2025. The rental will be limited to a 2025 end date.

Authority to File

The application was submitted by Tyler Jenkins. Mr. Jenkins owns the land to be irrigated and the well according to the available tax parcel information. No concerns.

Water Right Validity

Validity of water rights 29-2489C, 29-10053, and 29-13941 was determined separately as part of the evaluation of WSB lease contracts 1350 and 1354. No concerns.

Injury to Other Water Rights

Admin Area	Lease	Rental
WD 120	x	x
Non-Trust area	x	x
ESPA GWMA	x	x
Season: 04/01 to 10/31	x	x
Consumptive Use: 3.0 afa/ac	x	x
Headgate Standard: 4.0 afa/ac	x	x

The rental and lease PODs are all located within the ESPA Groundwater Management Area and the Non-Trust area. The proposed rental will not increase the diversions in either of these areas since the new use is offset by reduction in use under the lease contracts.

The rental POD is within 600 ft of the nearest well. There is no information available on the construction of the proposed well. It is unlikely that diversions from the proposed well will injure those nearby.

ETRAN model results were submitted with the rental application. The model inputs appear to have been based on the diversion rate rather than the annual consumptive volume. I ran the ETRAN model separately using consumptive volume and factoring in the rental of water from water right 29-13941. Results indicate the model scenario passes with no required mitigation.

Enlargement of Use

2021 imagery shows that the land supposed to be idled under lease contract (1354) has been irrigated during the duration of the contract. However, that irrigation seems to have been accomplished by shifting the irrigated acreage under water right 27-11376.

The applicant proposes a primary use of groundwater for irrigation. The water rights to be rented are all primary groundwater rights. The reviews for lease contracts 1350 and 1354 do not indicate that the water rights involved were unstacked from overlapping water rights.

The season of use for 29-2489C and 29-10053 ends on October 31st, while the season for 29-13941 ends on November 1st. The use authorized under this rental agreement, if approved, will be restricted to a season that ends October 31st.

No concerns

Local Public Interest

I am not aware of any information to suggest that the rental proposal conflicts with the local public interest. No concerns.

Beneficial Use/Conservation of Water Resources

The applicant proposes and irrigation use within the acceptable irrigation standards for the area. No concerns.

Hey guys,

Attached are the documents for rental application 2311, which proposes primary use of groundwater to irrigate 3.0 acres surrounding a home. This rental is meant to cover a use that previously received an NOV. Please let me know if you have any comments or concerns.

Thank you
