Subject: Withdrawal Application for Extension of Time to Avoid Forfeiture of a Water Right WR 75-14155

Hello, please withdraw the application for the referenced subject.

The request is not applicable due to the fact that I partially watered last year and have started irrigation this year. According to Jared Adamson of the Idaho Department of Water Resources, this application is not needed. Please discontinue the process of the application.

I was earlier given information from the Boise office that I should complete this application. That is why I originally sent in the request. Since watering has resumed, this is not applicable to my situation.

My contact information is:
