**To:** Skinner, Corey  
**Cc:** Sam Linnet; 'Erick Powell'  
**Subject:** RE: Transfer No. 84902; Petition for Reconsideration Requested

Corey-

Per our telephone conversation this afternoon, please dis-regard my requests in the email below. Your explanation as to why the 0.01 cfs associated with 37-23297 was not listed as a beneficial use, rather in condition number 6 on page 13 of the approval makes sense based on the language of the Joint Stipulation and Motion to Approve Conditions dated 4/22/22. My other requests associated with 37-23295 and 37-23296 were made in error.

Thank you for your time and let me know if you have any questions or concerns.

**Subject:** Transfer No. 84902; Petition for Reconsideration Requested

Corey-

This email serves as a formal petition for reconsideration for recently approved water right transfer no. 84902. As Erick and I will be out of the office next week, as well as yourself, we thought we had better notify you of some changes needed to the transfer before you leave town.

Per the IDWR Amended Order Approving Joint Stipulation and Vacating Hearing dated April 29, 2022 ("Order"), the flow rate on 37-20843 (now 37-23297), was agreed to be reduced by 0.01 cfs. The approved application for transfer reduces the flow rate by 0.02 cfs. Additionally, the flow rate described under 37-23295 and 37-23296 were also reduced as a result of the application for transfer by 0.01 cfs, although this reduction was not agreed to nor mentioned in the Order.

We respectfully request IDWR review the Order and transfer approval and amend the approval to increase the flow rate on all three rights by 0.01 cfs. This will change the flow rates back to those agreed upon per the Order. Please feel free to call or email with comments or questions, thanks as always for your time.
