2. The Lessor has filed a completed application to lease water rights described below into the Water Supply Bank on forms supplied by the Idaho Department of Water Resources and received by the Department on January 12, 2022.
3. The Director of the Idaho Department of Water Resources has reviewed the application for compliance with the Water Supply Bank rules and has approved the Lease subject to conditions listed below.

NOW, THEREFORE, in consideration of the mutual covenants and contracts herein contained, and other good and valuable consideration, the receipt of which is hereby acknowledged, the parties hereto agree as follows:

1. **WATER RIGHTS:** The Lessor shall lease and the Board shall accept into the Bank the Applicant's water rights described as follows:

WATER SUPPLY BANK LEASE CONTRACT No. 1539

8. Acceptance of a right into the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other Department application process.
9. In accordance with Idaho Code § 42-248 and § 42-1409(6), all owners of water rights are required to notify the Department of any changes in mailing address or change in ownership of all or part of a water right. Notice must be provided within 120 days of the change.
10. If a water right leased into the Water Supply Bank is sold or conveyed during the lease term, and if the leased right was rented, the rental proceeds will be disbursed in the following manner regardless of any arrangements between the buyer(s) and seller(s) to the contrary:
 - a. Rental payments will go to the lessor(s) of record at the beginning of the rental season, even if the Department processes a Notice of Change in Water Right Ownership during the rental season.
 - b. New lessor(s) of record will receive payment for any subsequent rental seasons.
11. The water right(s) is leased to the bank subject to all prior water rights and shall be administered in accordance with Idaho law and applicable rules of the Department of Water Resources.
12. After specific notification by the Department, the right holder shall install a suitable measuring device or shall enter into an agreement with the Department to use power records to determine the amount of water diverted and shall annually report the information to the Department.
13. Place of use does not include federal public lands.
14. The period of use for the irrigation described in this approval may be extended to a beginning date of 3/15 and an ending date of 11/15 provided that beneficial use of the water can be shown and other elements of the right are not exceeded. The use of water before 4/1 and after 10/31 is subordinate to all water rights having no subordinated early or late irrigation use and a priority date earlier than originating approval/SRBA partial decree date.
15. The unleased portions of Water Rights 02-7249 and 02-7462 when combined shall not exceed a total diversion rate of 28.02 cfs, a total annual maximum diversion volume of 9,119.52 af at the field headgate.
16. Water shall not be diverted under right 02-7249 unless the flow of the Snake River exceeds flows required by prior downstream minimum stream flow rights.

MEMORANDUM FOR LEASE 1539 & RENTAL 635

To: Water Right(s) 2-7249 & 2-7462

From: Mary Condon

Date: June 14, 2022

Re: Review & Analysis of Companion Applications to Lease & Rent Water from the State Water Supply Bank

PURPOSE/NARRATIVE: Applications to lease portions of 2-7249 & 2-7462 received on January 12, 2022, with a companion rental application 2276 for 2022 only. Applications are repeats of previous lease / rental applications for the same acres and portions. The rental fills in wedges of two pivots in section 7, not covered by the water right place of use.

AUTHORITY TO FILE: Water rights offered for lease are owned by Salmon Falls Land & Livestock Company. The applications were prepared by their representative, Zach Latham of Brockway Engineering, and are signed by Michael Henslee, who is listed as the VP of the company on the Idaho Secretary of State website. Parcel data shows they are owners of the land under the water rights and leased acres.

Rental place of use is owned by BLM, and a land use letter from BLM to irrigate approximately 19.4 acres was included referencing permit IDI-31038 but was dated in 2012. After a phone call to the Jarbridge Field Office on 6/16/2022 and the representative to verify the permit is still valid, I received an updated letter extending the permit and the office confirmed it is still valid for the irrigation land use with a buy option. No concerns with authority to file.

WATER RIGHT VALIDITY: Water rights were decreed in 2010, and the same portions have been placed in the bank since 2016, annually or bi-annually, protecting the unused lands from forfeiture. No concerns with validity of the water right and portion offered to the bank and can be used for this rental for the same purpose from the original POD.

INJURY TO OTHER WATER RIGHTS: Lease and rental of this water right should not cause injury to other water rights.

ENLARGEMENT OF USE: The two rights are limited to 2,432 acres, and the current place of use shapefile for the irrigated lands is 2,278 acres, leaving the 152.1 acres of leased land outside of the place of use, intentionally. About two acres remain between the used and unused assigned acres. A review of 2021 imagery shows no new lands developed inside the leased shapefile, and a small amount of spill over irrigation in the unleased shapefile, see section 11, is less than the unirrigated, undeveloped land within the unleased acres. In short, there is no evidence they are irrigating in excess of their allowable acres, and the lessors seem to be complying with their previous lease contracts. WMIS data shows they have not exceeded their combined volume or rate from the POD for the two rights in previous lease/rental years.

No other water rights are used to irrigate the lands under the leased, unleased portions of the two rights or the rental place of use, and the portions offered to the bank are proportionate to their individual and combined limits of the rights. The diversion point is used for these two rights, only. No enlargement is expected through the continued lease and rental of these rights.

LOCAL PUBLIC INTEREST: Review staff has no information to suggest this application is inconsistent with the local public interest.

BENEFICIAL USE/CONSERVATION OF WATER RESOURCES: The lease and rental appear consistent with the conservation of water resources in Idaho.

DEPARTMENT STAFF OR WATERMASTER COMMENTS: The location for the lease/rental PD is subject to Water District # 02 and is within Western Region. Request for comment sent on June 23, 2022.

Re: WSB Lease and Rental Applications; Portions of 2-7249 and 2-7462 on
Behalf of Salmon Falls Land & Livestock Co Inc.

Dear Mary,

On behalf of Salmon Falls Land & Livestock Co Inc., Brockway Engineering is submitting two water supply bank lease applications which propose to lease 101.5 acres of water right 2-7249 and 63.0 acres of water right 2-7462 for a combined total of 152.0 acres, to the Water Supply Bank for the 2022 irrigation season. Additionally, Salmon Falls Land & Livestock Co. Inc. seeks to rent back 19.4 acres of both previously mentioned water rights, to allow irrigation on a wet pivot crossing on lands owned by the BLM. Identical lease and rental requests were approved by IDWR in 2019 and 2021.

Also enclosed is a check for \$500.00 to cover the cost of the two lease applications. Please copy our office on all correspondence regarding these lease and rental applications. Thank you for your assistance and if you have questions or comments, please don't hesitate to call.
