RE: Application for Permit 97-8454

Mr. Michael Smith,

Idaho Department of Water Resources has received your online filing application for permit No. 97-8485 and processed for advertising review. During the advertising period Idaho Fish and Game identified that the source of water designated by you in your filing was incorrect.

You had designated Priest River tributary to the Pend Oreille River in step No. 3 on the application. Further review by Department staff verified the correct source of water for your parcel No. RP57N05W267202A is Lower West Branch Priest River tributary to Priest River.

The Department is required to utilize USGS designated water sources, and if permit approved as is the Department would not be able to license your permit. To remedy this situation, I have developed a revised application for permit for your review & re-submission. Once you sign the updated form you are accepting responsibility for the data found on the form, please do contact me with questions regarding the information as needed.

Unfortunately, due to the incorrect source designation, your application will be required to run in the two-week advertising review and requires an additional \$50.00 advertising fee as per Idaho Statute Title 42-211 sub-para F.

When reviewing your initial filing, I found the Place of Use (POU) designating two separate parcels (reference copy of application map). I revised the POU to reflect a single parcel as noted above with enclosed map product. Please verify this is correct; if it is not contact me at your earliest convenience and I can assist you in revising the POU.

Once you are satisfied with the revised application for permit, please do sign the form with ink pen, enclose the 2-page application w/map page and \$50.00 advertising fee payable to 'IDWR'

and return to the address listed below. I am holding your application for permit until you contact me to discuss and/or submit the revised application for permit.

If you have any questions, please don't hesitate to contact me at luke.bates@idwr.idaho.gov

Thank you,

Luke Bates

Sr. Water Resource Agent
