Label it **Attachment #7b**. If the place of use currently consists of a permissible place of use, then the attachment is not required if the application contains a clear statement that the boundaries for the place of use are not proposed to be changed by the transfer and the total number of irrigated acres within the place of use before and after the transfer is clearly stated.

☒ If you propose to change the nature of use or period of use of all or part of the right(s) listed in this application, attach documentation describing the extent of historic beneficial use of the portion of the right(s) proposed to be changed. Also attach documentation showing that the portion of the right(s) to be changed will not be enlarged in rate, volume, or consumptive use through the proposed change. Label it **Attachment #8a**.

Water use and transfer data

Water Use in 2020 – 47.4 AF with no existing water rights

Transfer #84892 will dry up 16.6 acres of irrigation ground water right 43-13157 (0.54 cfs, 128.0 AF, 32.0 acres) and move that portion to the feedlot facility. The 16.6 acres was shown to grow irrigated turf grass in 2019 with a consumptive use requirement of 3.08 acre-feet/acre, so the transfer will provide the feedlot facility with 3.08 acre-feet x 16.6 acres = 51.1 acre-feet of volume. There are also five homes served by the 2 wells at the facility, so 3.0 acre-feet of domestic use (5 homes @ 0.6 acre-feet/home) will be included in the volume. The 51.1 acre-feet will be sufficient to cover the present use at the facility. The transfer will change the nature of use of the changed portion to stockwater, commercial, and domestic and change the season of use to year-round. The points of diversion and place of use will also be changing.

TRANSFER SYNOPSIS

Date: June 22, 2022
To: Transfer 84892, Webb Brothers Land & Livestock, LLC Transfer file
From: Jim Bitzenburg
Re: Summary of transfer

Application for transfer proposes to change the nature of use, place of use (POU), points of diversion (POD), and period of use for a 0.28 cfs, 16.6 acre portion of ground water irrigation right 43-13157 which currently irrigates 32.0 acres within a 4326.1 acre permissible place of use located approximately 12.8 to 15.2 miles east and 0.2 to 6.7 miles south of the intersection of Interstate Highways 84 and 86 east of Burley. The application proposes to change the nature of use and POU of this right from irrigation during the irrigation season to year-round stockwater/commercial/domestic use at a CAFO located approximately 14.8 miles east and 4.8 miles south of the Interstate 84 and 86 intersection. The transfer proposes changing the PODs for the converted portion from the currently authorized irrigation wells to two existing wells associated with the CAFO facility.

The CAFO facility is located within the Raft River Critical Ground Water Area, so the transfer will be advertised. Since the facility is within Water District 143, comments will be solicited from the WD-143 Watermaster.

There are currently no existing water rights at the CAFO facility.

In examining IDWR Water Management Information System (WMIS) data, water consumption by the CAFO in 2020 was 47.4 AF. This transfer proposes to bring in 51.1 AF. In converting from irrigation to stockwater and commercial use, a consumptive use value is used instead of the full 4.0 AF/acre allowed by the area's standard field headgate requirement. In this case it is derived from the Malta NWS station for turf grass, and that value is 3.08 feet. Webb Brothers Land & Livestock, LLC provided Farm Service Agency documents verifying the production of turf grass on the acres to be dried up. Dividing the acre-feet needed on the CAFO end of the transfer by the consumptive use value ($51.1/3.08$) indicates the transfer will dry up 16.6 acres of right 43-13157, which will reduce the volume of that right by 66.4 AF (16.6 acres x 4.0 AF/acre field headgate requirement). So, in order to receive the necessary 51.1 AF at the CAFO, the transfer is required to reduce the irrigation right by 66.4 AF.

The associated irrigation rights included in the transfer are: 43-13349, 43-13350, 43-2354B, 43-2417F, 43-2418F, 43-4060F, 43-4061F, 43-4062F, 43-4063F, 43-4064F, 43-13064, 43-10087, 43-13063, 43-13071, 43-13073, 43-13149, 43-13151, 43-13159, 43-13161, 43-13635, 43-13639, 43-13411, 43-13413, 43-13153, 43-2084, 43-2180, 43-2264, 43-13700, 43-13701, 43-13702, 43-13703, 43-13830, 43-13831, 43-13832, and 43-13704.

FEE MEMORANDUM

Date: June 21, 2022
To: Webb Brothers Land & Livestock, LLC Transfer Application #84892 File
From: Jim Bitzenburg
Re: Receipting/disposition of fees paid

This transfer was filed on June 16, 2022 and its purpose is to split off a 0.28 cfs, 16.7 acre, and 66.4 AF portion from a ground water irrigation right (43-13157) owned by Webb Brothers Land and Livestock, LLC and convert it to stockwater, commercial, and domestic use at a CAFO (feedlot), also owned by Webb Brothers Land & Livestock, LLC. The 0.28 cfs rate equates to a fee of \$500.00 from the transfer fee schedule. The fee for a change in nature of use from irrigation to stockwater, commercial, and domestic uses is \$250.00, so the total fee for the transfer is \$750.00, which was paid by Heglar Creek Dairy, LLC with check #22048; IDWR receipt number S039298.
