

MEMORANDUM

Date: June 6, 2022
To: Transfer 86305
From: James Cefalo
Re: Review & Evaluation of Sufficiency of Information

This application proposes to change the place of use for stockwater right 31-7501. The proposed place of use will add a stock trough on the opposite side of the range area, dispersing the cattle across the range. The trough to be added is visible in aerial imagery and was added to the system around 2012.

Authority to File: Application was signed by Jim Hagenbarth, representative of Hagenbarth Land Idaho LP. Hagenbarth Land Idaho LP is the current owner of record for water right 31-7501. Clark County parcel map confirms that Hagenbarth Land owns the existing and proposed places of use.

Water Right Validity: Partial decree was issued by SRBA Court in 1999. Aerial imagery shows stock troughs surrounded by cattle. Forfeiture is not an issue.

Injury to Other Water Rights: No issues identified. Point of diversion will not change. Because the transfer will not result in a hydrologic change, public notice was not required. Watermaster for Water District 110 was notified of the transfer and does not oppose the change.

Enlargement of Use: No issues identified. Added trough will serve the same 1,000 cattle described in the original right. Condition limiting the right to 1,000 cattle carried forward on approval.

Local Public interest: No issues identified.

Beneficial Use/Conservation of Water Resources: No issues identified.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.
