OF THE STATE OF IDAHO**

IN THE MATTER OF APPLICATION)
FOR TEMPORARY CHANGE OF)
WATER RIGHT NOS.: 34-7181)

**ORDER AUTHORIZING
TEMPORARY CHANGE**

TC-34-210

WHEREAS, a drought emergency has been declared for Butte County to allow administrative actions to lessen the severe impacts of the drought conditions in the county; and

WHEREAS, section 42-222A, Idaho Code, provides that upon declaration of a drought emergency, the director of the Department of Water Resources ("Department") is authorized to allow temporary changes in the point of diversion, the place of use, and the purposes of use for valid existing water rights or temporary exchanges of water authorized under water rights when the director determines that such changes can be accomplished in accordance with the provisions of section 42-222A, Idaho Code; and

WHEREAS, on June 10, 2022, Sunset Farm & Ranch LLC submitted the attached temporary change application to the Department; and

WHEREAS, the Department has reviewed the application and has determined the application can be approved with certain conditions;

ORDER

IT IS HEREBY ORDERED that the application is APPROVED subject to the following conditions:

1. Diversion and use of the changed portion of right 34-7181 is authorized only at the point(s) of diversion and place of use described on the application.
2. This temporary change approval does not authorize construction of a new well as a point of diversion.
3. The applicant assumes all risk of curtailment or mitigation should the diversion and use of water under the temporary change approval cause injury to other water rights, constitute an enlargement in use of the original right, be inconsistent with the conservation of water resources within the state of Idaho, or not be in the local public interest.
4. This temporary change approval may only be used to provide a replacement water supply to lands or other uses that normally have a full water supply, except for the drought conditions. This temporary change approval may not be used to provide water for new development or to allow expansion of the use of water under existing water rights.

5. Rights 34-7075, 34-7181, 34-12421 and 34-14772 when combined shall not exceed a total diversion rate of 7.07 cfs.
6. Rights 34-7149, 34-7181, 34-7225 and 34-12421 when combined shall not exceed a total diversion rate of 9.78 cfs and a total annual maximum diversion volume of 1,675 af at the field headgate.
7. Rights 34-7149, 34-7181, 34-7225, 34-10680, 34-12421 and 34-13414 when combined shall not exceed the irrigation of 495 acres.
8. Right no. 34-7181 is limited to the irrigation of 400 acres within the authorized places of use in a single irrigation season.
9. This temporary approval does not authorize the use of diversion works or a delivery system owned by or managed by a corporation or an irrigation district without the written consent of such corporation or irrigation district.
10. The applicants agree to hold the director and the state of Idaho harmless from all liability on account of the diversion and use of water under this temporary change approval.
11. This temporary change does not grant any right-of-way or easement to use the diversion works or conveyance works of another person or entity.
12. The Watermaster of Water District No. 34 is authorized to administer the temporary change approval.
13. This temporary change approval expires on October 15, 2022 unless rescinded or extended by the director. Thereafter, the water right shall revert to the point of diversion, place of use, and nature of use existing prior to the temporary change approval.

DATED this 13th day of June, 2022.

Attached is an amended application for TC-34-210 with the corrections you noted below. Please substitute this amended application for the original one I sent over. Also, please note that the 138 acres was not correct or was a typo. Feel free to correct the legend on the map that was included in the original application.

Thank you again for your assistance on these temporary transfers. Let me know if you need anything else for TC-34-210. We are still trying to track down Larry Quist for TC-34-209.

Thanks,

Rob,

I'm reviewing these now. TC-34-209 is the temporary transfer to change the POU for 34-7075. This is probably the right you mentioned below that is not currently listed in the agreement. A quick review of available aerial photos showed no evidence of irrigation since the time of the decree. Please provide evidence of use or a valid defense to forfeiture.

TC-34-210 is seeking to move 1.97 cfs of right 34-7181 to the same 80 acres as TC-34-209 above. The map you submitted illustrating acres to be idled only shows 130 acres (based on the water right acres) unless there were 8 acres in the south half of section 17 that I could not see (the map didn't show that area). Right 34-7181 is combined with enlargement right 34-12421. Did you intend to also include the enlargement right in the transfer. If not, the rate transferred would be calculated based on 400 acres rather than 495. Also, since there are only 78 acres with a full water supply at the proposed POU, the transfer POU would be limited to 78 acres.

Feel free to call if you have questions.

Lucas,

Attached is amended temporary change application TC-34-210. It's similar to the original (just some minor changes to diversion rate and place of use). I've already got the watermaster comment for this one, but like the others listed below, I don't have BLRID consent yet.

I'm copying James Cefalo on this because I plan to be out of the office on Monday and Tuesday. Please reply to both of us if you send BLRID comment on Monday or Tuesday. Thanks.

Thanks for the watermaster comments you sent over. Not trying to bug you, but noticed that I did not receive your WM comment on TC-34-215. Not sure if that was intentional. I think I will also need BLRID consent on 214, 215, and 219. Thanks for tackling these today.
