Re: 2022 "206" Map Update

Per telephone conversation with Russ Suchan on 6/2/2022, the "206" irrigation shape in ArcMap has been updated to match this years irrigation practices for the five combined water rights listed above. Russ indicated that the pivot located in the NESE, SESE of Sec. 27 and NWSW, SWSW of Sect. 26, Twp 08S, Rge 22E, would be dry farmed this season. Irrigation will be shifted to the adjacent pivot to the north located in the NENE, SENE of Sec. 27 and the NWNW, SWNW of Sect. 26, Twp 08S, Rge 22E. It should be noted that due to Powerlines on the north end of the pivot to be irrigated this season, the pivot is offset towards the south and overlaps with the pivot to the south in the NESE of Sec. 27 and NWSW of Sec. 26.
