CONDITIONS OF APPROVAL

1. This right is limited to the irrigation of 50 acres within the authorized place of use in a single irrigation season.
2. The right holder shall make full beneficial use of all surface water available to the right holder for irrigation of lands within the authorized place of use for this right. The right holder may divert ground water under this right to irrigate land with appurtenant surface water rights when the surface water supply is not reasonably sufficient to irrigate the place of use for this water right or is not available due to drought, curtailment by priority, or the seasonal startup and shutoff or maintenance schedule for canal company or irrigation district deliveries. The right holder shall not divert ground water for irrigation purposes under this right if use of the surface water supply is intentionally discontinued or reduced (for example abandoned, forfeited, sold, disallowed by court decree, or leased to the Water Supply Bank), or is not deliverable due to non-payment of annual assessments, without an approved transfer pursuant to Idaho Code § 42-222 or other Department approval.
3. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor exceed a combined annual maximum diversion volume of 225 af at the field headgate for the place of use.
4. This right when combined with all other rights shall provide no more than 4.5 afa per acre at the field headgate for irrigation of the place of use.
5. This right when combined with all other rights shall provide no more than 5.0 afa per acre for irrigation storage and irrigation from storage for the place of use.
6. After specific notification by the Department, the right holder shall install a suitable measuring device or shall enter into an agreement with the Department to use power records to determine the amount of water diverted and shall annually report the information to the Department.
7. The place of use is known as the Cherry Lane Golf Course.
8. Right holder shall comply with the drilling permit requirements of Idaho Code § 42-235 and applicable Well Construction Rules of the Department.
9. When ordered by the Director, the right holder shall provide mitigation acceptable to the Director to offset depletion of lower Snake River flows needed for migrating anadromous fish. The amount of water required for mitigation, which is to be released into the Snake River or a tributary for this purpose, will be determined by the Director based upon the reduction in flow caused by the use of water pursuant to this right. Any order of the Director issued in accordance with this paragraph shall be in conformance with applicable rules allowing the right holder due process as the need for mitigation and the amount of mitigation are determined.

EXPLANATORY INFORMATION TO ACCOMPANY A PRELIMINARY ORDER

(To be used in connection with actions when a hearing was **not** held)

(Required by Rule of Procedure 730.02)

The accompanying order or approved document is a "Preliminary Order" issued by the department pursuant to section 67-5243, Idaho Code. **It can and will become a final order without further action of the Department of Water Resources ("department") unless a party petitions for reconsideration, files an exception and brief, or requests a hearing as further described below:**

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the department within fourteen (14) days of the service date of this order. **Note: the petition must be received by the department within this fourteen (14) day period.** The department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See Section 67-5243(3) Idaho Code.

EXCEPTIONS AND BRIEFS

Within fourteen (14) days after: (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from this preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding with the Director. Otherwise, this preliminary order will become a final order of the agency.

REQUEST FOR HEARING

Unless a right to a hearing before the Department or the Water Resource Board is otherwise provided by statute, any person aggrieved by any final decision, determination, order or action of the Director of the Department and who has not previously been afforded an opportunity for a hearing on the matter may request a hearing pursuant to section 42-1701A(3), Idaho Code. A written petition contesting the action of the Director and requesting a hearing shall be filed within fifteen (15) days after receipt of the denial or conditional approval.

ORAL ARGUMENT

If the Director grants a petition to review the preliminary order, the Director shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Director will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Director orders otherwise, all oral arguments will be heard in Boise, Idaho.

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Director in connection with the preliminary order shall be served on all other parties to the proceedings in accordance with IDAPA Rules 37.01.01302 and 37.01.01303 (Rules of Procedure 302 and 303).

FINAL ORDER

The Director will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Director may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its service date if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

- (a) The petition for reconsideration is disposed of; or
- (b) The petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

- i. A hearing was held,
- ii. The final agency action was taken,
- iii. The party seeking review of the order resides, or
- iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

MEMORANDUM

TO: Transfer No. 85622

FROM: Laura McSherry

DATE: February 02, 2022

RE: Evaluation of Application

The transfer proposes changes to three water rights. The transfer requests change of ownership from two different water rights split from Rick E Thomas and James Fuller to the City of Meridian. The transfer proposes changing the location of point of diversion for the three water rights to one new well located in NWNE Sec 3, T3N, R1W. The transfer also proposes changing the current place of use on the water rights to a permissible place of use to reflect an integrated irrigation system.

The site of the proposed permissible place of use and point of diversion is located at the Cherry Lane Golf Course in Meridian, Idaho.

Contact person for the transfer is SPF Engineering representative Lori Graves, 300 E Mallard Drive STE 350, Boise, ID 83706. lgraves@spfwater.com. (208)-383-4140.

Summary of Information Submitted

Authority to File:

Parks Superintendent, Mike Barton, from the City of Meridian is an authorized representative for this transfer involving water right no(s). 63-10921, 63-35173, and 63-35174. The City of Meridian is the current owner for water right no. 63-10921. The City of Meridian has submitted conveyance documents showing split ownership of two different water rights. Water right no. 63-12008, owned by Rick E Thomas, was split by the verified legal property description provided into child water right no. 63-35173. Water right no. 63-33370, owned by James Fuller was split by the verified legal property description provided into child water right no. 63-35174. The City of Meridian owns the property appurtenant the proposed POU and POD.

Water Right Validity:

Water right no. 63-10921 was issued on July 18, 1994 with a priority date of July 17, 1989. Parent water right no. 63-12008 was licensed with a priority date of April 15, 1993. Parent water right no. 63-33370 was licensed with a priority date of May 18, 1987. The rights are presumed to be valid since beneficial use has occurred within the last five years. Beneficial use confirmed by department aerial imagery, landsat images, google earth images, or other evidence. Evidence of beneficial use does not need to be added to the file, it is an IDWR product available to other staff.

Injury to Other Water Rights:

The proposed new POD is replacing the existing PODs on all three water rights. The proposed permissible place of use is located on the property of an existing golf course. The transfer was advertised and no protest was received regarding the transfer, so the Department can reasonably assume surrounding water users do not have concerns of injury as a result of this transfer.

Enlargement of Use:

No additional rate or volume is proposed to be diverted from this source beyond the historical use of the rights. No enlargements of the water rights are anticipated.

Local Public Interest:

No evidence has been submitted suggesting the transfer proposes changes at odds with the local public interest.

Beneficial Use/Conservation of Water Resources:

The application proposes beneficial use consistent with conservation of water resources in Idaho.

Discussion

Prior to the approval of this transfer, ownership of water right no(s). 63-12008 and 63-33370 were split and transferred to the City of Meridian. The memo located within the transfer file titled "Ownership Change Processed Prior to Transfer No. 85622", dated December 20, 2021, contains more information regarding this action.

Using GIS analysis tools, the determined total place of use when combining water right 63-10921, 63-35173, and 63-35174 is 97.8 acres. The amount deviates from what was indicated on the transfer application but since the increased acres and impacted rates/volumes are insignificant the adjustments to the application were made by the department. The representative, Lori Graves, was notified via email of the application modification on December 15, 2021. The "AFTER" POU legal description (Part 1B. 4.) on the original transfer application was corrected from a total acreage of 105.5 to 102.5 by Lori Graves on December 16, 2021. The enclosed email correspondence within the transfer file contains more information regarding these corrections to the application.

An application for permit was submitted in correlation with the proposed transfer. Water permit no. 63-35134 includes the new POD in the transfer and increases the overall acreage and flow rate of the proposed integrated irrigation system. The permit includes 4.7 acres not covered in the existing rights and an additional flow rate to bring the 97.8 acres covered the existing rights up to 0.02 cfs/ac.

The application is consistent with criteria of I. C. § 42-222 and should be processed.
