

**BEFORE THE DEPARTMENT OF WATER RESOURCES
OF THE STATE OF IDAHO**

IN THE MATTER OF APPLICATION)
FOR TEMPORARY CHANGE OF)
WATER RIGHT NOS.: 34-2330B, 34-7077,
34-7080B, 34-7092, 34-7121A, 34-7121B,)
34-7179, 34-12376, 34-13840, & 34-13842)

**ORDER AUTHORIZING
TEMPORARY CHANGE**

TC-34-217

A drought emergency has been declared for Butte County to allow administrative actions to lessen the severe impacts of the drought conditions in the county; and

Idaho Code §42-222A provides that upon declaration of a drought emergency, the director of the Department of Water Resources is authorized to allow temporary changes in the point of diversion, the place of use, and the purpose of use for valid existing water rights when the director determines that such changes can be accomplished in accordance with the provisions of Idaho Code §42-222A; and

On May 23, 2022, Telford Lands LLC submitted the attached Temporary Change Application to the Department; and

The Department has reviewed the application and has determined the application can be approved with certain conditions;

ORDER

IT IS HEREBY ORDERED that the application is APPROVED subject to the following conditions:

1. Diversion and use of the changed portions of Right No(s). 34-2330B, 34-7077, 34-7080B, 34-7092, 34-7121A, 34-7121B, 34-7179, 34-12376, 34-13840, and 34-13842 is authorized only at the points of diversion and place of use described on the application.
2. This temporary change approval does not authorize construction of a new well or diversion works as a new point of diversion.
3. The applicant assumes all risk of curtailment or mitigation should the diversion and use of water under the temporary change approval cause injury to other water rights, constitute an enlargement in use of the original right, be inconsistent with the conservation of water resources within the state of Idaho, or not be in the local public interest.
4. This temporary change approval may only be used to provide a replacement water supply to lands or other uses which normally have a full water supply, except for the drought condition. This temporary change approval may not be used to provide water for new development or to allow expansion of the use of water under existing water rights.

5. Right 34-2330B is limited to the irrigation of 122.5 acres, right 34-7077 is limited to the irrigation of 200 acres, right 34-7080B is limited to the irrigation of 286 acres, right 34-7092 is limited to the irrigation of 635 acres, right 34-7121A is limited to the irrigation of 286 acres, right 34-7121B is limited to the irrigation of 316 acres, right 34-12376 is limited to the irrigation of 87.5 acres, right 34-13840 is limited to the irrigation of 71 acres, and right 34-13842 is limited to the irrigation of 140 acres within the authorized places of use in a single irrigation season.
6. Rights 34-618, 34-2330B, 34-7080B, 34-7121A, 34-7121B, 34-7092, 34-7077, 34-7179, 34-12376, 34-13659, 34-13661, 34-13840 and 34-13842 when combined shall not exceed the irrigation of 2124 acres.
7. Should all or any portion of water right nos. 34-2330B, 34-7077, 34-7080B, 34-7092, 34-7121A, 34-7121B, 34-12376, 34-7179, 34-13659, 34-13661, 34-13840, and 34-13842 ever be curtailed as a result of a delivery call, the irrigated place of use for water right nos. 34-2330B, 34-7077, 34-7080B, 34-7092, 34-7121A, 34-7121B, 34-12376, 34-13659, 34-13661, 34-13840, 34-13842 (all describing a place of use of 1985 acres) and water right no. 34-7179 (2124 acres) shall be reduced by the number of irrigated acres authorized to be irrigated by the individual water right that is curtailed.
8. Rights 34-2330B, 34-7077, 34-7080B, 34-7092, 34-7121A, 34-7121B, 34-12376, 34-13840, 34-13842, and that portion of ground water right no. 34-7179 not associated with water right no. 34-618, when combined, shall not exceed a total diversion rate of 37.03 cfs, and shall not exceed a total annual maximum diversion volume of 6,947.5 af at the field headgate.
9. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 3.5 afa per acre at the field headgate for irrigation of the authorized places of use.
10. Diversion of water from the additional well(s) authorized under Transfer 74921 located in NWNWNE LT2, Sec. 4, T04N, R26E shall not exceed a maximum diversion rate of 5.00 cfs.
11. The right holder shall make full beneficial use of all surface water available to the right holder for irrigation of lands within the authorized places of use for these rights. The right holder may divert ground water under these rights to irrigate land with appurtenant surface water rights when the surface water supply is not reasonably sufficient to irrigate the places of use for these water rights or is not available due to drought, curtailment by priority, or the seasonal startup and shutoff or maintenance schedule for canal company or irrigation district deliveries. The right holder shall not divert ground water for irrigation purposes under these rights if use of the surface water supply is intentionally discontinued or reduced (for example abandoned, forfeited, sold, disallowed by court decree, or

leased to the Water Supply Bank), or is not deliverable due to non-payment of annual assessments, without an approved transfer pursuant to Idaho Code § 42-222 or other Department approval.

12. This temporary approval does not authorize the use of diversion works or a delivery system owned by or managed by a corporation or an irrigation district without the consent of such corporation or irrigation district.
13. The applicant agrees to hold the Director and the State of Idaho harmless from all liability on account of the diversion and use of water under this temporary change approval.
14. This temporary change approval does not grant any right-of-way or easement to use the diversion works or conveyance works of another person or entity.
15. The watermaster of Water District No. 34 is authorized to administer the temporary change approval.
16. This temporary change approval expires on November 1, 2022 unless rescinded or extended by the director. Thereafter, the water right shall revert to the point of diversion, place of use and nature of use existing prior to the temporary change approval.

DATED this 2nd day of June, 2022.

James Cefalo
Eastern Region Manager

TC-34-217

MAY 23 2022

TEMPORARY CHANGE APPLICATION

Department of Water Resources
Eastern Region(To change point of diversion, place of use, or purpose of use of a water right upon
declaration of a drought emergency in accordance with Section 42-222A, Idaho Code.)Name of Applicant Telford Lands LLC Phone 208-431-5957
Mailing Address 1450 W. Highway 24, Paul, ID 83347 Email _____

A. PURPOSE OF TRANSFER

1. ☐ Change point of diversion ☐ Add diversion point(s) ☒ Change place of use
☐ Change purpose of use ☐ Other

2. Describe the proposed change(s) and explain the reason(s) they are needed. _____

~~83.3 acres of Applicant's water rights will be moved (dried up) to allow for the irrigation of 80 acres on Mark Telford property with ground water. The 80 acres of Mark Telford property has a surface water right that is not likely to be in priority at any point this year.~~

B. DESCRIPTION OF RIGHT(S) OR PORTION THEREOF, AFTER THE REQUESTED CHANGE

1. Right Number Priority Amount Nature of Use Period of Use
(cfs/ac-ft)
SEE ATTACHED SPREADSHEET _____ to _____
_____ to _____
_____ to _____
_____ to _____

2. Total amount of water being transferred 1.45 cfs cubic feet per second and/or _____ acre-feet per annum.3. Source of water Ground water tributary to _____.

4. Point(s) of diversion:

TwP	Rge	Sec	Govt Lot	1/4	1/4	1/4	County	Source	Local name or tag number
SEE	ATTA	CHE	D	SPR	EAD	SHE	ET		

5. Lands irrigated or place of use:

TwP	Rge	Sec	NE 1/4				NW 1/4				SW 1/4				SE 1/4				Acre Totals
			NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	
04N	25E	25	3.6		24.4	38.1				6	2.8				0.8	4.3			80

Total Acres 80

6. General Information:

- a. Who owns the water right to be changed? Telford Lands LLC
- b. Describe the arrangement allowing use of the right. Telford Lands LLC is the water right owner and applicant.
Mark will provide written consent.
- c. Describe the affect on the land now irrigated if the change is approved pursuant to this application:
~~83.3 designated acres will not be irrigated under any water rights.~~
- d. Has the water right sought to be transferred been used this year? ☐ Yes ☒ No If yes, explain. _____
- e. Absent the changes, how would the right be used for the remainder of the year? Applicant planned on using
for temporary transfer given drought situation. These acres have been in the WSB.
- f. Describe other water rights used for the same purpose. WR 34-622A
- g. Remarks: _____

I hereby assume all risk in accordance with Section 42-222A, Idaho Code, and assert that no one will be injured by such change and that the change does not constitute an enlargement in use of the original right. The information contained in this application is true to the best of my knowledge. I understand that any willful misrepresentations made in this application may result in voiding its approval.

Subject: RE: TC-34-217 (Telford)
Attachments: 34-622A WD34 Records.pdf; water bank consent.pdf

Michael:

Thank you for your email. WR 34-622A is diverted from the Big Lost River at the Moore Diversion to a crossover ditch and into the Timberdome Canal. As you are aware, there are many water rights (both surface and ground water) that are delivered through this system. When 34-622A has been in priority, it is diverted and used as water from Timberdome is used for irrigation on the 80 acres the right authorizes for irrigation. Accordingly, the best evidence of when the right "was available for delivery" is to review the priority call on the Big Lost River over the past 10 years (as you have requested). Attached are documents taken from the WD34 watermaster's report which records the priority call on the Big Lost River. The days when 34-622A was in priority, and therefore "available for delivery", is evidence of its use. The days this right was in priority are highlighted in yellow.

Additionally, the ground water rights that are being proposed to cover Mark's 80 acres are stacked with two other water rights, WR 34-13659 and WR 34-13661, which have June 1, 1889 and June 1, 1890 priority dates respectively. Where these rights are near the priority date of 34-622A, and where the ground water rights for this temporary transfer are used with these rights, comparing the difference in days to see if there are significant differences, I believe, is also useful information. The additional days these rights were in priority is highlighted in green.

The records show the following:

- | | | |
|--------------------------|---------------------------------|--------------------------|
| 1. 2021: 1896, 0 days; | 1889-1890, 0 days. | Drought year. |
| 2. 2020: 1896, 11 days; | 1889-1890, 22 days. | Drought year. |
| 3. 2019: 1896, 96 days; | 1889-1890, 99 days. | |
| 4. 2018: 1896, 75 days; | 1889-1890, 82 days. | |
| 5. 2017: 1896, 101 days; | 1890, 113 days; 1889, 117 days. | |
| 6. 2016: 1896, 27 days; | 1889-1890, 48 days. | ~~Drought year.~~ |
| 7. 2015: 1896, 14 days; | 1889-1890, 20 days. | Drought year. |
| 8. 2014: 1896, 0 days; | 1889-1890, 0 days. | Drought year. |
| 9. 2013: 1896, 6 days; | 1889-1890, 16 days. | Drought year. |
| 10. 2012: 1896, 64 days; | 1889-1890, 70 days | |

As you can see, water was available under 34-622A during non-drought water years for growing crops and provided enough water supply to grow a crop. During drought years, it did not. Based on this information, we believe TC-34-217 meets the requirements of Idaho Code section 42-222A(6) as it provides a full water supply "except for a drought condition." This temporary transfer is not for a new project and does not allow expansion of use under existing water rights.

Finally, the 1889 and 1890 water rights were not in priority much longer than the 1886 right over the past 10 years. Accordingly, the ground water diverted and used associated with these rights is very comparable to what will be used this year given drought conditions.

I have also attached Mark Telford's consent.

Let me know if you have any questions or need any other information. Because of the attachments, please confirm that you received this email.

Thanks,

Subject: TC-34-217 (Telford)

Rob,

Yesterday we received temporary change TC-34-217, which you filed on behalf of Telford Lands LLC to change the place of use of a portion of 10 ground water rights. The only water right associated with the 80-acre proposed place of use is right 34-622A.

Idaho Code 42-222A (6) says in part: "Temporary changes shall only be approved for the purpose of providing a replacement water supply to lands or other uses which normally have a full water supply except for a drought condition. Temporary changes may not be approved to provide water for new projects or to allow expansion of the use of water under existing water rights."

Since right 34-622A is a relatively junior priority right on the Big Lost River, we are concerned that the proposed place of use may not normally have a full water supply.

Please provide us with information for the last 10 years showing the extent to which this right was available for delivery. Thanks.

Michael Holliday
Water Rights Supervisor

CONSENT TO WATER SUPPLY BANK RENTAL

I, the undersigned am familiar with the Water Supply Bank Lease/Rental Applications which are being submitted to the Idaho Department of Water Resources which involve placing eighty (80) acres of water from several water rights on a portion of my property. I consent to the placement of these water rights on my property as requested in the Water Supply Bank Rental Application.
