Scott,

I did speak with Chris Unruh on 4/28/22 and I let him know that he would need to get permission from Grandview Irrigation District and Idaho Power. I also mentioned that Grandview would be meeting on May 3 and would need to vote on his proposal. He indicated that he understood what needs to happen for IDWR to move forward.

Allen,

I Just had a call from the secretary for Grand View Irrigation District and one thing she was wondering is if we ever reached out to Chris Unruh to let him know about the upcoming board meeting (now today)? Ultimately it's not really up to us to make sure he asks them permission for the transferred POD, just that we won't approve it without, however Nick and I did mention in our phone call with Grand View Irrigation that we would mention it to him, so I just wanted to follow up and see if that ever happened?

Subject: Chris Unruh App & GV Irrigation Dist. Discussion

Allen,

After our discussion with Grand View Irrigation District this morning, a few things came to our attention. One, the Irrigation District board meeting is taking place on May 3rd. As of right now, they can not really take a vote on allowing Mr. Unruh to utilize the canal for conveyance, since he has not yet submitted a request to them to do so. It might be good to reach out to him and let him know he should get his request in before that, so that the board can vote on it.

Another thing that came up is that Idaho Power owns the headgate controlling works, and the first mile of the canal. Also, that first mile of canal is shared with Grand View Mutual Canal Co., before it splits. He will defiantly need to also obtain permission/authorization from Idaho Power, since they own the POD, and he may need permission from Grand View Mutual Canal Co. as well.

Let me know if you have any questions.

Scott
