It does not preclude the opportunity for review of the validity of this water right in any other department application process.
3. Use of water under this agreement does not constitute a dedication of the water to renter's place of use, and upon expiration of this agreement, the points of diversion and place of use of the water shall revert to those authorized under the water right and/or again be available to rent from the bank.

5. Renter agrees to comply with all applicable state and federal laws while using water under this agreement.
6. Renter agrees to hold the Board, the Director and the state of Idaho harmless from all liability on account of negligent acts of the renter while using water.

8. Failure of the renter to comply with the conditions of this agreement is cause for the Director to rescind approval of the rental agreement.
9. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.0 afa per acre at the field headgate for irrigation of the place of use.
10. Use of water under this right may be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 120.

Re: Water Supply Bank Rental Application 1655

Purpose/Narrative: A second application was received from Heritage Farms LLC as part of a lease/rental package on March 2, 2020. This rental, similar to application 1471, seeks to continue the irrigation of acres not covered by a water right. The place of use is adjacent to a water right held by Heritage Farms LLC however, the place of use for the water right excludes the corners of the acreage. This rental appears to have started initially in 2017 through 2018, then 2019 through 2020, and has been proposed to end in 2023. The rental term has been matched to the term requested by the lessor of the water right being used and appears to have initially started as a result of an NOV issued by the Department (E2017-1109).

Review of the prior applications indicate that the acreage being requested is the adjusted amount to provide a 4.0 af/a at the rental location. More acreage and volume are necessary to rent such that the rate and volume per acre can be adjusted higher.

Authority to File: The applications were signed by Mr. Driscoll, review of the Idaho Secretary of State information indicates Mr. Driscoll is a member of Heritage Farms LLC. No concerns at this time.

Water Right Validity/Forfeiture Evaluation: The water right being requested has been leased to the Bank and remains valid. No concerns at this time.

Injury Evaluation: No injury is apparent through this rental. The applicant has submitted Eastern Snake River Plane Aquifer (ESPA) modeling as part of the application package indicating mitigation is not necessary. The modeling has been verified using the most current version of the software and no mitigation is required based on the amounts being requested.

Enlargement of Use: No enlargement is evident through the rental, as the rental is seeking to extend the place of use for an existing water right, the rental will be matched to the same rate per acre and volume per acre. Both this rental and the water right being supplemented will be limited to 0.02 cfs/ac and 4.0 af/ac. The area is not within an irrigation district and, as such, will not receive water from another source other than this rental.

Local Public Interest: Staff are unaware of any local public interests that are averse to the rental.

Beneficial Use/Conservation of Water Resources: The rental appears consistent with the conservation of water resources in Idaho.

Department/Watermaster Comments: Watermaster and IDWR Eastern Region comments were requested on April 14, 2020

Water Supply Bank Evaluation: Bank staff recommend the approval of this application

Re: Water Supply Bank Rental Application 1654

Purpose/Narrative: An application was received as part of a package on behalf of Heritage Farms LLC. Review of the place of use indicates that, while Heritage Farms does hold a water right for the area, the place of use is limited to the area that could be covered by a pivot system and does not cover the corners of the area. This application is intended to continue coverage, beginning in 2017, of those areas to supplement the existing water right through the end of 2023.

Review of the prior applications indicate that the acreage being requested is the adjusted amount to provide a 4.0 af/a at the rental location. More acreage and volume are necessary to rent such that the rate and volume per acre can be adjusted higher.

Authority to File: The applications were signed by Mr. Driscoll, review of the Idaho Secretary of State information indicates Mr. Driscoll is a member of Heritage Farms LLC. No concerns at this time.

Water Right Validity/Forfeiture Evaluation: The water right being requested has been leased to the Bank and remains valid. No concerns at this time.

Injury Evaluation: No injury is apparent through this rental. The applicant is seeking to continue to irrigate the acres established under the previous rental agreements. Eastern Snake River Plane Aquifer (ESPA) modeling has been provided and verified such that there is not an impact to the aquifer. No concerns at this time.

Enlargement of Use: No enlargement is evident through this rental as it seeks to extend the irrigable area of the applicant's existing water right. The rental will be adjusted to match the existing water right which is consistent with the accepted area standards.

Local Public Interest: Staff are unaware of any local public interests that are averse to the rental.

Beneficial Use/Conservation of Water Resources: The rental appears consistent with the conservation of water resources in Idaho.
