RENTAL AGREEMENT CONDITIONS OF ACCEPTANCE

1. The use of water under this agreement shall be subject to the provisions of Idaho Code § 42-1766.
2. Rental of the specified right from the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other department application process.
3. Use of water under this agreement does not constitute a dedication of the water to renter's place of use, and upon expiration of this agreement, the points of diversion and place of use of the water shall revert to those authorized under the water right and/or again be available to rent from the bank.
4. Use of water under this agreement shall not prejudice any action of the Department in its consideration of an application for transfer or permit filed by the applicant for this same use.
5. Renter agrees to comply with all applicable state and federal laws while using water under this agreement.
6. Renter agrees to hold the Board, the Director and the state of Idaho harmless from all liability on account of negligent acts of the renter while using water.

8. Failure of the renter to comply with the conditions of this agreement is cause for the Director to rescind approval of the rental agreement.
9. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.0 afa per acre at the field headgate for irrigation of the place of use.
10. Prior to diversion of water under this right, the right holder shall install and maintain a measuring device and lockable controlling works of a type acceptable to the Department as part of the diverting works.

4. RENTAL REQUESTS FOR SPECIFIC WATER RIGHTS

A. Are you requesting to rent specific water rights?

Yes ☒ No ☐

If yes, specify below the elements of the water rights you are requesting to rent. If no, continue to Question 4B.

Important Information: Diversion rates and volumes sought for rent must be proportionate to the per acre diversion rates and per acre volume limits of the water right under lease contract to the Water Supply Bank. Prior to completing this section, applicants should review all water right lease contracts and any active rental agreements to determine which elements of a water right are available to satisfy a rental request. Lease and rental documents are searchable via [IDWR's website](#).

Water rights identified below must either already be leased to the Bank or a lease proposal should accompany this rental request. **Rental requests for water rights not yet leased to the Bank will be returned if companion lease applications are not provided with the rental request.** For leased rights featuring combined limits, rentals must be consistent with combined diversion rate, volume or acre limits. Combined limits should be listed on a row below water right numbers.

Water Right Elements Leased to Water Supply Bank					Leased totals, minus water right elements involved in active rental agreements, equals water right elements available for rent	Water Supply Bank Rental Request		
Water Right Number (leave blank if sub-total of combined limits)	Nature of Use	Diversion Rate (CFS)	Volume (AF)	Acres (AC)		Diversion Rate (CFS)	Volume (AF)	Acres (AC)
61-12084	Irrigation	0.48	186.8	64		*0.30	*116.7	*40
Applicants must ensure the requested rate per acre and volume per acre do not exceed the rate per acre and volume per acre limits of water rights leased to the Water Supply Bank					TOTAL	*0.30	*116.7	*40
						CFS	AF	AC

*Attach multiple copies of this page if space above is insufficient to list all water rights requested to be rented on this application.

B. If water right conditions, combined limits, or the sum of all water right elements being requested provide an unconventional duty of water (e.g., an unusually low rate per acre or volume per acre for irrigation use), explain how your proposed rental will sufficiently accomplish your intended purposes. Attach a separate page if space is insufficient and label it **Attachment 4B**:

*See Attachment 3B regarding requested amounts. A copy of the owner's authorization for Wolfe Brothers' rental of water right 61-12084 is included as Attachment 3E.

C. Does your rental request propose to change the nature of use for any water right(s) being rented?

Yes ☐ No ☒

If yes, explain how the water right(s) will be converted to new uses. Include the historic, consumptive use amounts for the water right being rented if you have it, as well as the new consumptive use amount for your proposed beneficial use. If space below is insufficient, attach a separate page and label it **Attachment 4C**:

Subject: Wolfe Brothers Inc. Rental Application of 61-12084

Lori,

I am currently processing this rental application. The department has concerns of renting 64 acres worth of water to cover 40 acres (1/4) of a pivot. The concern is that the rental will enable enlarging the consumption over the entire pivot area. If there is a plan in place to ensure that the higher diversion rate and volume for the 40 acre place of use is not spread throughout the entire pivot system, then the department would consider approving the rental as proposed. The alternative to this is to approve the 40 acre rental POU with the proportionate rate and volume as the rest of the right. This would calculate to 0.30 cfs and 116.7 af for the 40 acre POU to avoid an enlargement issue. Let me know what you find out. Thanks.

**RE: APPLICATION TO RENT WATER FROM THE WATER SUPPLY BANK
WATER RIGHT NO(S). 61-12084, AGREEMENT 620**

*****TIME SENSITIVE RESPONSE REQUIRED*****

Dear Applicant:

The Department of Water Resources acknowledges receipt of your application to rent water from the Water Supply Bank. **I have enclosed a Water Supply Bank Rental Agreement for your review and signature.** Upon signature and return of the original agreement, together with the rental fee described below, the Department will also sign the original agreement and return an executed copy to you. Execution of the agreement and compliance with the conditions of approval authorize diversion and use of water as provided in the agreement.

A rental fee of **\$233.40** was calculated based on the current rental rate of \$20.00 per acre-foot times a diversion volume of 117 acre-feet for 2022. Since you have a private agreement with the water right owner, **you are only obligated to pay the 10% administrative fee or \$233.40** for 2022. An annual payment shall be received by the Department prior to the execution of this agreement and prior to January 1 in all subsequent years for the duration of the rental period. The agreement will be void if payment is not received prior to the due date in a given year. If you would like to terminate the agreement prior to the end of the rental period, you must submit written notice of your intent to the Department at least 30 days prior to the rental fee due date.

Please send a check for \$233.40 made payable to the Idaho Department of Water Resources, **together with the signed rental agreement, within 14 days** so I can complete processing.

If you have any questions, please contact this office at bank@idwr.idaho.gov or (208) 287-4800.

Sincerely,

Amanda Johnson-Veibell

MEMORANDUM FOR AGREEMENT # 620

To: Water Right 61-12084
From: Tyler Smith
Date: 3/31/2022
Re: Water Supply Bank Rental Application 2210

Purpose/Narrative: The Department received an application on November 26, 2021 from Lori Graves of SPF Water Engineering (Representative) on behalf of Wolfe Brothers Inc. (Applicant) requesting a rental from the Water Supply Bank (Bank) of groundwater right 61-12084 for the irrigation of 40 acres. The rental is requested for one year, 2022, and is a continuation of rental agreement #493 which was active for 2021.

The 40 acres requested is not covered by any existing water rights but is part of a pivot diversion system that covers 160 acres. The remaining 140 acres are covered by unleased portions of water rights 61-12084 & 61-12086.

The rental is within the Mountain Home Ground Water Management Area (GWMA) and State Water District No. 161.

Authority To File: The application was filed in the name of Wolfe Brothers Inc. and was signed by William R. Wolfe. According to the Idaho Secretary of State, William R. Wolfe is the secretary for Wolfe Brothers Inc. and therefore has the proper authority to sign on behalf of the company.

County parcel data indicates Robert Baker JR and Wind Properties LLC as the property owners at the rental place of use (POU) and points of diversion (POD), respectively. Attachment 3E provides the applicant authorization to use the well PODs from the John & Ann Wind Trust. Attachment 3K is a lease agreement from Robert and Bonnie Baker for the POU. No concerns with authority to file or access the POD or POU.

Water Right Validity/Forfeiture Evaluation: Water right 61-12084 is currently leased into the Bank for 2020-2024 under lease contract #1066. The lease review found the water right to be valid, and aerial imagery indicates the lease is being adhered to. No concerns with validity.

Injury To Other Water Rights: The wells for this rental are the authorized PODs for the right being rented, the rental is essentially a place of use change. This rental has been occurring every year since 2015. There are no known injury concerns at this time.

Enlargement Of Use: 61-12084, when combined with 61-12086, is limited to 7.09 cfs and 3009.5 af. Both rights have individual acre limits within a 1,208 acre POU. The total of both acre limits is equal to the 1,208 acres in the POU, which indicates that the rights are additive and not stacked. Therefore, 61-12084 can be rented without the need to also rent a portion of 61-12086, as was requested in this application. Furthermore, the rate per acre and acre-feet per acre requested are proportional to the duty of water authorized by right 61-12084. Since the pivot covers the rental POU and unleased portions of the POU, this consistency in duty of water is necessary to ensure the right isn't enlarged.

Condition W05 on water right 61-12084 states that it has historically been combined with water from Mountain Home Irrigation District (MHID). The application to lease the right into the Bank stated that 438.91 acres of the property are irrigated with both surface water from MHID and groundwater. The remaining 769.09 acres receive only groundwater, and the 64 acres leased to the Bank are acres that

have historically only received groundwater. Therefore, the acres being rented will only be authorized for irrigation with groundwater.

Local Public Interest: The rental is requesting the use of groundwater within the Mountain Home GWMA. Comment will be sought from the Water Master for Water District #161, which includes the GWMA, to provide the opportunity for local public interest considerations. Review staff has no information to suggest this application is inconsistent with the local public interest.

Beneficial Use/Conservation of Water Resources: The rental appears consistent with the conservation of water resources in Idaho.

Department Staff or Watermaster Comments: The location for the rental POD is subject to Water District #161. Comment was requested from Nick Miller, the Water District #161 Watermaster and IDWR Western Regional Manager on 4/1/2022. If comments were not received within 7 days, it is assumed there are no concerns with the rental.
