1. The water rights referenced above will be rented from the bank at the current rental rate.
2. There is no rental payment to the lessor of the water right if the right or a part thereof is not rented from the bank.
3. While a right is in the bank, the lessor may not use the right without approval of the Department even if the right is not rented from the bank. Any violation of the terms of this lease may result in enforcement procedures pursuant to Idaho Code § 42-351 for illegal diversion and use of water and may include civil penalties pursuant to Idaho Code § 42-1701B.
4. A right accepted into the bank stays in the bank until the Board releases it, or the lease term expires. A right may be released from the bank upon request, provided the Board approves the release. Unless approved by the Department, leased rights may not be immediately available for release.

6. Rental of water under this right is subject to the limitations and conditions of approval of the water right.
7. Failure of the right holder to comply with the conditions of acceptance is cause for the Director to rescind acceptance of the lease.
8. Acceptance of a right into the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other Department application process.
9. In accordance with Idaho Code § 42-248 and § 42-1409(6), all owners of water rights are required to notify the Department of any changes in mailing address or change in ownership of all or part of a water right. Notice must be provided within 120 days of the change.

******TIME SENSITIVE RESPONSE REQUIRED******

Dear Applicant:

The Department of Water Resources has completed its review of your application to lease the above-mentioned water right to the Water Supply Bank. **I have enclosed two original Water Supply Bank Lease Contracts for your review and signature. Please sign and return ALL Lease Contracts within 14 days.** Upon signature and return of the contracts, the Department will also sign the original contracts and return an executed copy to you. To release the right from the Bank prior to the release date, submit a written request on the Request to Release a Water Right from the Bank form. Please review the conditions of acceptance listed on the Lease Contract, including #3 which says:

Any violation of the terms of this lease may result in enforcement procedures pursuant to Idaho Code § 42-351 for illegal diversion and use of water and may include civil penalties pursuant to Idaho Code § 42-1701B."

Subject: WSB Apps for Review

Hey guys,

Here are 2 leases and 2 rentals for the WSB. The leases are two separate suites of splits from the same parents. The rentals propose to use some of the same PODs as the water rights authorize and the irrigation is essentially being moved to parcels adjacent to the water right POU so I don't really see much cause for concern. But, if there is something you guys are concerned about please let me know.

Thanks

MEMORANDUM

TO: Water Rights 61-12348 through 61-12353
FROM: Cody Parker
RE: Evaluation of WSB lease application 2156
DATE: January 12, 2022

On October 5, 2021 Duane Amyx submitted applications to lease portions of water right 61-12348 through 61-12353 into the Water Supply Bank for the 2022 season. The acreages dedicated to lease for 2022 were broken into individual values totaling 55.97 acres. However, when factoring in combined use limits the total acres that will be leased into the Bank under this contract will be 50.8.

Authority to File

The owner of record for the water rights included in the lease is J&M Solid Rock Management Group LLC. Duane Amyx signed the application. Mr. Amyx is listed as a member for the company according to IDSOS and thus it is presumed he has the authority to file the application on their behalf.

Water Right Validity

Parents to the water rights included in this lease were leased into the WSB for the years 2020 and 2021. The previous review for that lease contract determined that there were no validity concerns because the owner had taken action to protect the rights from forfeiture on the final year they had the opportunity. Since no time will elapse between the end date of the previous lease and the effective start date of the current lease, there are no forfeiture concerns.

Injury to Other Water Rights

Nonuse of the groundwater rights proposed for lease should have no negative impact on other water rights.

Enlargement of Use

No enlargement is evident through nonuse of the water rights. All rights appurtenant to the property have been included in this lease proposal. Proportional amounts of each water right was included to ensure that no right is enlarged.

Local Public Interest

None of the available information suggests a conflict with the local public interest.

Beneficial Use/Conservation of Water Resources

The lease proposal appears to be consistent with the conservation of water resources in Idaho.

Department/Watermaster Comments

Watermaster and IDWR Western Region comments were requested.

Jean,
Sorry, I was not clear, the number of acres for both J&M and Hudson is from the limited acres. --Hal

Yes, that is correct. Maybe I was a bit too specific on the application, but the rounded acreages are fine. Hal

Hal,

The Department needs some clarification on the Water Supply Bank applications you submitted for J&M Solid Rock and the Hudson's.

For J&M: the applications state that they would like to place 55.97 acres (we will round this up to 56 acres) in the Bank. Each water right has its own acres. Is the 56 acres the total from the acre limit of 62.3 acres (if this is the case, is J&M still going to irrigate 6.3 acres?) or the total number of acres the rights equal when the acre limits are added up (which is 68.6 acres)?

For the Hudson's: the applications state that they would like to place 37.26 acres (we will round this to 37 acres) in the Bank. Each water right has its own acres. Is the 37 acres the total from the acre limit of 39.0 acres (if this is the case, are the Hudson's still going to irrigate 2.0 acres?) or the total number of acres the rights equal when the acre limits are added up (which is 43.22 acres)?

I have attached a spreadsheet. Let me know if you have any questions. Thank you.
