8. Acceptance of a right into the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other Department application process.
9. In accordance with Idaho Code § 42-248 and § 42-1409(6), all owners of water rights are required to notify the Department of any changes in mailing address or change in ownership of all or part of a water right. Notice must be provided within 120 days of the change.
10. If a water right leased into the Water Supply Bank is sold or conveyed during the lease term, and if the leased right was rented, the rental proceeds will be disbursed in the following manner regardless of any arrangements between the buyer(s) and seller(s) to the contrary:
 - a. Rental payments will go to the lessor(s) of record at the beginning of the rental season, even if the Department processes a Notice of Change in Water Right Ownership during the rental season.
 - b. New lessor(s) of record will receive payment for any subsequent rental seasons.
11. The water right(s) is leased to the bank subject to all prior water rights and shall be administered in accordance with Idaho law and applicable rules of the Department of Water Resources.

13. Rights 63-3597H and 63-31535 when combined shall not exceed a total diversion rate of 1.20 cfs, a total annual maximum diversion volume of 351.0 af at the field headgate, and the irrigation of 78 acres.

15. This right does not grant any right-of-way or easement across the land of another.
16. The period of use for the irrigation authorized by Water Right 63-3597H may be extended to a beginning date of 3/1 provided that beneficial use of the water can be shown and other elements of the right are not exceeded. The use of water before 3/15 is subordinate to all water rights having no subordinated early or late irrigation use and a priority date earlier than 2/6/2009.

Current IDWR records indicate that Canyon County Lakes Estates LLC is the sole owner of water rights 63-3597H, 63-31535, 63-31800 and 63-31802. According to the Idaho Secretary of State, Cordy Rost is the manager of Canyon County Lakes Estates LLC, and therefore has the proper authority to sign the application on behalf of the LLC. Canyon County Lakes Estates LLC is the current property owner at the place of use for the rights submitted.

Water Right Validity: Water rights 63-3597H, 63-31535, 63-31800 and 63-31802 were all decreed in the SRBA in 2009. All these rights were leased to the Water Supply Bank (Bank) in 2004 for an indefinite period. When indefinite water right lease contracts were updated in 2015, the rights were removed from the Bank effective 12/31/2015. No evidence of irrigation from these rights can be found from 2004 to 2015, suggesting that the beneficial uses were properly idled. From 2015 to 2020, there was no evidence of irrigation for these rights, indicating a period of 5 consecutive years of non-use. The rights were then submitted to the Bank for lease on June 24, 2021. Submitting these rights for lease to the Bank before the end of the sixth consecutive year of non-use is considered a valid defense to forfeiture according to Multiple Programs Memo No. 2, and therefore all the water rights are considered valid. There are no concerns with validity of the water rights and portions offered to the bank.

Injury to Other Water Rights: Lease of this water right would not cause injury to other water rights. Proper review to prevent injury if rented.

Enlargement of Use: Water rights 63-3597H and 63-31535 have combined use limits, and 63-31800 and 63-31802 also have combined use limits. Thus, all related stacked rights have been submitted for lease to the Bank, and the acreage being idled will not continue to receive water from any other sources. Permit 63-35051 was recently approved and was conditioned on these rights being leased to the Bank, addressing the concerns for enlargement of use for these acres. Based on the information provided in the application, there does not appear to be concerns of enlargement through this lease.

Local Public Interest: Review staff has no information to suggest this application is inconsistent with the local public interest.

Beneficial Use/Conservation of Water Resources: The lease appears consistent with the conservation of water resources in Idaho.

Department Staff or Watermaster Comments: Nick Miller, Western Regional Manager, was contacted via phone for comment on 10/7/21. He did not express any concerns with the acceptance of these leases into the Bank if the rights were determined to be valid. There is no Watermaster for groundwater in Basin 63.

Water Supply Bank Evaluation: Based on the information presented by the applicant and pending any concerns or comments, staff recommend the lease proposal be approved for the 2021-22/23 irrigation seasons.
