RENTAL AGREEMENT CONDITIONS OF ACCEPTANCE

1. The use of water under this agreement shall be subject to the provisions of Idaho Code § 42-1766.
2. Rental of the specified right from the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other department application process.
3. Use of water under this agreement does not constitute a dedication of the water to renter's place of use, and upon expiration of this agreement, the points of diversion and place of use of the water shall revert to those authorized under the water right and/or again be available to rent from the bank.

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES

WATER SUPPLY BANK RENTAL AGREEMENT No. 558

4. Use of water under this agreement shall not prejudice any action of the Department in its consideration of an application for transfer or permit filed by the applicant for this same use.
5. Renter agrees to comply with all applicable state and federal laws while using water under this agreement.
6. Renter agrees to hold the Board, the Director and the state of Idaho harmless from all liability on account of negligent acts of the renter while using water.
7. Renter acknowledges and agrees that the Director may terminate authorization for the use of a water right based on a water right's priority date.
8. Failure of the renter to comply with the conditions of this agreement is cause for the Director to rescind approval of the rental agreement.
9. The period of use for the irrigation described in this approval may be extended to a beginning date of 3/15 and an ending date of 11/15 provided that beneficial use of the water can be shown and other elements of the right are not exceeded. The use of water before 4/1 and after 10/01 under water right 43-13645, and before 4/1 and after 10/31 under water right 43-13649, is subordinate to all water rights having no subordinated early or late irrigation use and a priority date earlier than 6/28/2002.
10. Renter shall maintain a measuring device and lockable controlling works of a type approved by the Department in a manner that will provide the watermaster suitable control of the diversion(s).
11. Water rights 43-2328, 43-2427, 43-2369, 43-2544, 43-4229, 43-4207, 43-2492, 43-12290, 43-13629, 43-13616, 43-13633, 43-13621, 43-13623, 43-13625, 43-13627, 43-13628, 43-13630, 43-13632, 43-13620, 43-13622, 43-13624, 43-13626, 43-13689, 43-2338B, 43-11132b, 43-12986, 43-13034, 43-13035, 43-12987, 43-12989, 43-13068, 43-13671, 43-13672, 43-13673, 43-13674, 43-13675, 43-13676 and 43-2489, when combined, shall not exceed a total diversion rate of 50.33 cfs, a total annual maximum diversion volume of 11,292.4 af at the field headgate, and the irrigation of 2,823.1 acres.
12. Use of water under this right may be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No.143.
13. Use of water under the water rights on this rental agreement, when combined with all other rights, shall provide no more than 0.02 cfs per acre nor more than 4.0 afa per acre at the field headgate for irrigation of the lands above.
14. This rental does not authorize the construction of a well.

RECEIVED

APPLICATION TO RENT WATER
FROM THE BOARD'S WATER SUPPLY BANKFEB 22 2021
DEPARTMENT OF
WATER RESOURCESApplicant Name: ADTD FARMS LLC

Is this application being submitted with a lease application as a lease/rental package?

Yes ☒ No ☐

If yes, specify companion water rights in Section 4

This application must be completed according to the minimum requirement checklist below. This checklist is part of the rental application and must be included with the rental application. Applications that do not meet the minimum requirements will not be placed in the processing queue and may be returned until all minimum requirements have been met.

Rental applications should be submitted well in advance of the desired start date for the use of rental water. Rental applications may be processed as early as November 1 of the year prior to the intended use of rental water. Any rental application received on or before November 1 for use in the next year will be assigned a received date of November 1. Rental applications submitted more than one year in advance of the proposed start date for the use of rental water will not be accepted and will be returned to applicants. Rental applications may be returned to applicants if the desired start date for the use of rental water cannot be accommodated by the Water Supply Bank. Rental requests will not be accepted once the rental season of use period has concluded.

One rental application per beneficial use of water. For multiple beneficial uses of water, separate rental requests should be submitted for each unique beneficial use of water. One rental application can be submitted if you propose to rent water from multiple sources.

For additional instructions on completing a rental application, visit the Bank's website at http://idwr.idaho.gov/water_supply_bank.

2. MAP

Create a map of the proposed point(s) of diversion, place(s) of use and water diversion, delivery and distribution systems. Make sure the rental place of use is outlined and annotated with legal land descriptions (Township, Range, Section and Quarter-Quarters) or with GPS coordinates. For irrigation purposes, mark the number of acres you desire to irrigate. Attach the map to this application and label it **Attachment 2**.

3. DESCRIPTION OF PROPOSED USE FOR RENTAL WATER

- A. Describe why you desire to rent water and provide a detailed description of your proposed use. If the proposed use is not for irrigation, describe in detail how you determined the amount of rental water required. If the space below is insufficient, attach additional sheets as required and label them **Attachment 3A**:

The rented water will be used to irrigate acres that would be not irrigated other wise.

- B. Enter the desired and/or minimum rates of flow, volume, or irrigable acres requested for your rental purposes:

Desired Rate (Cubic Feet/Second)	Desired Volume (Acre-Foot)	Minimum Rate* (Cubic Feet/Second)	Minimum Volume* (Acre-Foot)	Desired Acres (if applicable)
3.15 CFS	660 AF	3.15 CFS	660 AF	165.0 AC

* Sometimes water rights provide an exceptionally low rate per acre and/or low volume per acre. This section is meant to establish an acceptable range of water sufficient for your proposed water use. Please see question 4B and complete if necessary.

- C. This section must be completed in full. Enter the proposed start date and latest possible start date for using rental water as well as the number of years you would like to rent water. The latest possible start is the latest possible date by which you would be willing to pay for a rental and be able to benefit from utilizing rental water.

Desired Start Date (month/day/year)	Latest Possible Start Date (month/day/year)	*Mark Desired Rental Duration (Calendar Years)					**Applicant's preference if rental application cannot be processed prior to the latest possible start?

* The number of years permissible for a rental is subject to the lease contract duration for the water right(s) being rented.

** Per Idaho Code 42-201, it is unlawful to divert or use water without a valid water right. Water Supply Bank rental applicants are not authorized to utilize rental water prior to the execution of an approved rental agreement. Rental requests may be returned to applicants if no water is available from the Bank to fulfill a rental request.

Application to Rent Water (Continued)

- D. Describe your water distribution system and how rental water will be delivered from the point(s) of diversion (POD) to the proposed place of use (POU):
Existing wells, mainlines and delivery systems.

- E. Describe the physical type (pump, headgate, etc.) and location of the POD from which rental water is proposed to be diverted:

POD Description	Water Source	Other Water Rights Diverted from this POD
See Exhibit A		

If the POD(s) above are located where water is turned into a canal, lateral or ditch, or if they are located on your property but are serviced by water that is delivered via a canal, lateral or ditch, your rental request must include documented authorization from all relevant canal companies, irrigation districts and/or water delivery entities, confirming that they consent to your diversion of water from their system.

- F. Has documented consent from all relevant water delivery entities been obtained? Yes ☐ N/A ☒
If yes, include documented consent as **Attachment 3F**.

- G. Do any POD(s) identified in Question 3E divert from a water source that may require water modeling? Yes ☐ No ☒
Refer to the Water Modeling Requirements Information Sheet to determine if a rental POD may require water modeling.

- H. Has water modeling been provided with your rental request? Yes ☐ N/A ☒
If yes, label modeling Attachment 3 H.
Rental applications that require modeling will be returned if modeling is not provided.

- I. Specify the desired beneficial use of water and the requested season of use or number of acres required:

- ☒ Irrigation 165.0 (number of acres) Duration: Subject to IDWR standard seasons of use
☐ Commercial from: _____ (mm/dd) to: _____ (mm/dd)
☐ Stockwater from: _____ (mm/dd) to: _____ (mm/dd)
☐ Industrial from: _____ (mm/dd) to: _____ (mm/dd)
☐ Other: _____ from: _____ (mm/dd) to: _____ (mm/dd)

- J. For irrigation uses, do you propose to divert water at a rate greater than 0.02 cfs/acre? N/A ☐ Yes ☐ No ☒
If yes, justify the rate of flow and attach any supporting documents as **Attachment 3J**. Justification may include information on soil composition, conveyance losses, crop type, irrigation systems, public access areas, etc. A rate of 0.03 cfs/acre is permissible for irrigation of 5 acres or less.

- K. Do you own the land at the proposed rental place of use (POU)? Yes ☒ No ☐
If no, attach documentation from the POU owner/operator confirming your authorization to use the POU and label it **Attachment 3K**.

- L. List all other water rights and sources of water at the rental place of use for the same purpose, including privately owned water rights and water received from a municipal supplier, an irrigation district, a canal company or any other water delivery entity. Explain why additional water is required:

43-13715 et al water is needed due to IDWR curtailment order.

Application to Rent Water (Continued)

4. RENTAL REQUESTS FOR SPECIFIC WATER RIGHTS

A. Are you requesting to rent specific water rights?

Yes ☒ No ☐

If yes, specify below the elements of the water rights you are requesting to rent. If no, continue to Question 4B.

Important Information: Diversion rates and volumes sought for rent must be proportionate to the per acre diversion rates and per acre volume limits of the water right under lease contract to the Water Supply Bank. Prior to completing this section, applicants should review all water right lease contracts and any active rental agreements to determine which elements of a water right are available to satisfy a rental request. Lease and rental documents are searchable via [IDWR's website](#).

Water rights identified below must either already be leased to the Bank or a lease proposal should accompany this rental request. **Rental requests for water rights not yet leased to the Bank will be returned if companion lease applications are not provided with the rental request.** For leased rights featuring combined limits, rentals must be consistent with combined diversion rate, volume or acre limits. Combined limits should be listed on a row below water right numbers.

Water Right Elements Leased to Water Supply Bank					Leased totals, minus water right elements involved in active rental agreements, equals water right elements available for rent	Water Supply Bank Rental Request

						CFS	AF	AC

**Attach multiple copies of this page if space above is insufficient to list all water rights requested to be rented on this application.*

B. If water right conditions, combined limits, or the sum of all water right elements being requested provide an unconventional duty of water (e.g., an unusually low rate per acre or volume per acre for irrigation use), explain how your proposed rental will sufficiently accomplish your intended purposes. Attach a separate page if space is insufficient and label it **Attachment 4B**:

N/A

C. Does your rental request propose to change the nature of use for any water right(s) being rented?

Yes ☐ No ☒

If yes, explain how the water right(s) will be converted to new uses. Include the historic, consumptive use amounts for the water right being rented if you have it, as well as the new consumptive use amount for your proposed beneficial use. If space below is insufficient, attach a separate page and label it **Attachment 4C**:

5. ADDITIONAL INFORMATION

- A. Is this the first time that rental water is being requested for this purpose at the rental place of use? Yes ☒ No ☐
If no, list previous rental requests/agreements and explain why you have not secured a permanent water right for your needs:

- B. Have you or do you intend to submit an application for permit or transfer proposing a similar use as this rental? Yes ☐ No ☒
If yes, describe:

- C. Was this rental application submitted in response to a Notice of Violation (NOV) or a pending NOV? Yes ☐ No ☒
If yes, describe the date and location of the NOV.

- D. Additional Information

Dear Applicant:

The Department of Water Resources acknowledges receipt of your application to rent water from the Water Supply Bank. **I have enclosed a Water Supply Bank Rental Agreement for your review and signature.** Upon signature and return of the original agreement, together with the rental fee described below, the Department will also sign the original agreement and return an executed copy to you. Execution of the agreement and compliance with the conditions of approval authorize diversion and use of water as provided in the agreement.

A rental fee of **\$1,320.00** was calculated based on the current rental rate of \$20.00 per acre-foot times a diversion volume of 660.0 acre-feet for rental 558. A rental fee of **\$232.00** was calculated based on the current rental rate of \$20.00 per acre-foot times a diversion volume of 116.0 acre-feet for rental 559. Since you are both the lessor and the renter of the right(s), **you are only obligated to pay the 10% administrative fee or \$1,552.00.** An annual payment shall be received by the Department prior to the execution of this agreement and prior to January 1 in all subsequent years for the duration of the rental period. The agreement will be void if payment is not received prior to the due date in a given year. If you would like to terminate the agreement prior to the end of the rental period, you must submit written notice of your intent to the Department at least 30 days prior to the rental fee due date.

Please send a check for \$1,552.00 made payable to the Idaho Department of Water Resources, **together with the signed rental agreements, within 14 days** so I can complete processing.

If you have any questions, please contact this office at bank@idwr.idaho.gov or (208) 287-4800.

Sincerely,

Amanda Johnson-Veibell

Remington,
Sorry for the delayed response. I have looked over the WSB Lease and Rental Applications below and have no concerns with the applications.
Thanks,
Nathan

OK, trying this again...

Greg Sullivan today provided me with documents affirming that 196 acres of water right 43-2489 is to be leased into the Bank in 2021, to facilitate rental applications 1993 and 1994. So, lease application 1991 (for water rights 43-13645 and 13649) is no longer required, however we will still lease the rights into the Bank this year, even though they won't be rented on applications 1993 or 1994.

Attached to this email are lease review memos, maps and approval documents for water rights 43-2489 (contract 1421), and for water rights 43-13645 & 13649 (contract 1422). Also attached are review memos, maps and approval documents for a rental of water right 43-2489 through rental applications 1992 & 1994 (rental agreements 558 and 559).

Nathan, Corey, please advise if you have any questions, comments or concerns about these WSB transactions for 2021.

Thank you,

Remington

It figures.

Right after I sent this email, it comes to my attention that water rights 43-13645 and 13649 are located outside the RR CGWA and are therefore ineligible for rental to both agreements. In speaking with Greg Sullivan at Brockway, it sounds

like the parties will increase the amount being leased under 43-2489, to so that it can be rented instead of 43-13645 and 13649. Once we amend the lease, we can amend the rentals, and I'll reach out to you for comments again.

Sorry for the confusion.

Corey, Nathan,

I hope you're staying cool in this heatwave we're having.

Attached to this email are a lot of files associated with 2021 Water Supply Bank lease/rental transaction in the Raft River area.

Effectively, two ground water users have proposed to lease into the Bank portions of some of their water rights, so that the leased extent of the water rights might be rented by ADT Farms and ADTD Farms. The applications are as follows:

WSB Application	Application Type	Water Rights Involved	Water User
1990	Lease	43-2489	Eagle Creek Northwest LLC
1991	Lease	43-13645 & 43-13649	Jones & Widerburg Farms
1993	Rental	43-2489, 43-13645 & 43-13649	ADTD Farms LLC
1994	Rental	43-13645 & 43-13649	ADT Farms LLC

Because these lease and rental applications were submitted at the same time, I processed them concurrently and even did a joint review of the lease applications. Hopefully my review memos seem logical to you and you can follow along.

If you would provide any questions, comments or concerns that you foresee with these lease/rentals, that'd be greatly appreciated.

Thank you, and may you have an enjoyable 4th of July!

MEMORANDUM FOR AGREEMENT # 558

To: Water Supply Bank Rental Application 1993
From: Remington Buyer
Date: July 7, 2021
Re: Review & Analysis of Application to Rent Water from the State Water Supply Bank

PURPOSE/NARRATIVE: On February 22, 2021 two rental applications were received—one from ADTD Farms LLC (rental application 1993) and ADT Farms LLC (rental application 1994)—who have water right portfolios that have been impacted by a Departmental order curtailing expansion acre water rights in the Raft River Critical Ground Water Area (RR CGWA). ADTD Farms LLC's water rights 43-11132B, 43-12989, 12990 and 13034 are now fully curtailed per the RR CGWA curtailment order, as are ADT Farm LLC's water rights 43-13718 & 43-13719. Rental application 1993 will allow ADTD Farms to expand the number of acres that they may irrigate in 2021, in part to make up for shortages attributable to the curtailment order.

As the basis for these two rental requests, two lease applications (applications 1990 & 1991) were submitted concurrent with rental applications 1993 and 1994. Lease application 1990 proposed to lease into the Bank portions of water right 43-2489 so that it might be rented under both rental applications 1993 and 1994, while lease application 1991 proposed to lease into the Bank portions of water rights 43-13645 and 43-13649, so that they might be rented back to partially satisfy rental application 1994.

As staff reviewed lease application 1991, questions emerged about the potential for enlargement under water rights 43-13645 and 13649 and an information request was issued to the water right lessor on April 1, 2021. No response to the information request was ever received.

When the information request was issued, processing of lease applications 1990 and 1991 was put on hold, and processing of rental applications 1993 and 1994 could not proceed. Recently, it was determined that no additional information is required to conclude processing of lease applications 1990 and 1991 and those leases have been recommended for approval. Accordingly, rental applications 1990 and 1991 are now being reviewed.

Note: it has recently been identified that water rights 43-13645 & 13649 are situated outside the boundaries of the RR CGWA, and therefore, water rights 43-13645 & 13649 cannot be rented to either rental application 1993 or 1994.

This review memo pertains to rental application 1993, which is requesting a rental sufficient to authorize the irrigation of an additional 165 acres, to supplement irrigation use from ground water already authorized under the following water rights: 43-2328, 43-2427, 43-2369, 43-2544, 43-4229, 43-4207, 43-2492, 43-12290, 43-13629, 43-13616, 43-13633, 43-13621, 43-13623, 43-13625, 43-13627, 43-13628, 43-13630, 43-13632, 43-13620, 43-13622, 43-13624, 43-13626, 43-13689, 43-2338B, 43-11132b, 43-12986, 43-13034, 43-13035, 43-12987, 43-12989, 43-13068, 43-13671, 43-13672, 43-13673, 43-13674, 43-13675 and 43-13676.

The above listed 37 water rights authorize a combined limited diversion rate of 47.17 cfs and 10,572.2 af for the irrigation of 3,000.7 acres. However, subject to an IDWR curtailment of RR CGWA expansion acre water rights 43-4207, 43-12990, 43-11132B, 43-13035 and 43-12989, the renter is now combined limited to a maximum diversion rate of 47.17 cs and 10,632.4 af, for the irrigation of 2,823.1 acres. See Appendix A of this memo for a description of ADTD Farms' water right portfolio.

AUTHORITY TO FILE: Rental applications 1993 and 1994 have both been signed and submitted by Todd Gerratt, who is listed with the Idaho Secretary of State as an agent for both ADTD and ADT Farms. The lands proposed to be irrigated by ADT Farms through rental application 1994 are owned by John Spratling. A contract of agreement between Mr. Gerratt and Mr. Spratling is provided with the application, acknowledging that ADT Farms may irrigate lands owned by Mr. Spratling. No concerns about authority to file.

WATER RIGHT VALIDITY: The water rights requested are valid and available to be rented. The water rights being supplemented also appear to be fully valid.

INJURY TO OTHER WATER RIGHTS: The points of diversion for water right 43-2489 and the rental locations for both rental applications 1993 and 1994 are all within the RR CGWA. Staff are unaware of any policy specific to the RR CGWA that would restrict or preclude the use of water requested through rental applications 1993 and 1994. No injury is apparent under the rental.

ENLARGEMENT OF USE: Rental application 1993 proposes to augment ADTD Farms' water rights through the authorization of an additional 165 acres of irrigation through a rental of portions of water right 43-2489. The requested rental water rights would provide for an additional diversion rate of 3.16 cfs and 660 af for the irrigation of an additional 165 acres (with a duty of water of 0.019 cfs/ac and 4.0 afa).

The overall duty of water for ADTD Farms' portfolio of water rights not subject to administrative curtailment is 0.018 cfs/ac and 4.0 afa/ac. The rental of water rights 43-13645, 16349 and 2489 provide for an almost analogous duty of water (0.019 cfs/ac and 4.0 afa/ac), for an overall combined limited diversion rate of 50.33 cfs and 11,292.4 af, for the irrigation of 4,032.2 acres, as follows:

	Rate	Volume	Acres	PPU Acres	Rt/Ac	Vol/Ac
Combined Limit	47.17	10,632.4	2,658.1	4,038.2	0.018	4.0
Rental Amount	3.16	660.0	165.0	4,038.2	0.019	4.0
Sum-Total Limit	50.3	11,292.4	2,823.1	4,038.2	0.018	4.0

No enlargement concerns.

LOCAL PUBLIC INTEREST: Because this ground water rental is within the RR CGWA, it is in the local public interest to ensure that ground water is preserved wherever possible, to avoid injury to the source and to water users dependent upon the sustain supply of ground water from the source. Excess and unauthorized uses of ground water are not in the local public interest.

A review of 2020 sentinel satellite imagery indicates the renter may have irrigated 3,000 acres last year. ADTD Farms did have a 2020 Water Supply Bank approval through rental agreement 420, which authorized an additional 170 acres of irrigation. Together, the 170 acres of irrigation authorized via rental and the 2,823.1 acres authorized under the ADTD Farms water rights not subject to curtailment, sum to 2,993.1 acres which is more or less the approximately 3,000 acres observed irrigation in 2020. At this time review staff have no information to suggest this rental application is inconsistent with local public interests.

BENEFICIAL USE/CONSERVATION OF WATER RESOURCES: The rental appears consistent with the conservation of water resources in Idaho.

DEPARTMENT STAFF OR WATERMASTER COMMENTS: Review comments were requested from IDWR's Southern Region and Water District 143 on July 7, 2021.

WATER SUPPLY BANK RECOMMENDATION: Staff recommend this rental be approved.

Note: the applicant has included with their rental application provided "Contract of Agreement" letters with Eagle Creek Northwest LLC, documenting that only admin fees are required to be paid for this rental.
