

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES

WATER SUPPLY BANK RENTAL AGREEMENT No. 560

RECEIVED

JUL 09 2021

**DEPARTMENT OF
WATER RESOURCES**

This is to certify that:

SOUTH VALLEY GROUND WATER
DISTRICT
BOISE, ID 83701-2139

GALENA GROUND WATER
DISTRICT
KETCHUM, ID 83340

filed an application to rent water from the Water Supply Bank ("Bank"). The Idaho Water Resource Board ("Board"), being authorized to operate a Bank and to contract by and through the Director of the Idaho Department of Water Resources ("Director, Department") for rental of water from the Bank, agrees to rent water as follows:

Summary of Water Rights or Portions Rented from the Bank

Water Right	Diversion Rate (CFS)	Diversion Volume (AF)	Acres (Limited) (AC)	Rate Per Acre (CFS/AC)	Volume Per Acre (AF/AC)

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES

WATER SUPPLY BANK RENTAL AGREEMENT No. 560

Term of Rental: This rental agreement shall take effect when all parties have signed it and shall continue in effect until December 31, 2021. Use of rental water shall be authorized as of either the date this rental agreement takes effect or the first day of the rental season of use, in 2021, whichever occurs last.

Annual Rental Fee:

2021: \$2,131.60

The full fee for the rental of the above-described right(s) is \$2,131.60 for 2021. The renter fee includes an administrative fee of \$2,131.60 for 2021. Note that the renter is obligated to pay only the administrative fees associated with the water rights.

An annual payment shall be received by the Department on or before December 31 each year preceding the use of the rented water rights. The agreement will be void if payment is not received by the due date in a given year. Rental fees are non-refundable. To voluntarily terminate the agreement early, notify the Department in writing prior to the rental fee due date.

Total Water Use Authorized Under Rental Agreement

Beneficial Use	Diversion Rate (CFS)	Diversion Volume (AF)	Acres (AC)	Rate/Acre (CFS/AC)	Volume/Acre (AF/AC)
IRRIGATION	4.65	1000	301.9	0.015	3.31
Combined Total	4.65	1000	301.9	0.015	3.31

** The authorized water usage reflects a reduction from the water right elements rented, to account for the use of only ground water and the combined limits of existing water rights at the place of use.*

Detailed water right conditions are attached.

RENTAL AGREEMENT CONDITIONS OF ACCEPTANCE

1. The use of water under this agreement shall be subject to the provisions of Idaho Code § 42-1766.
2. Rental of the specified right from the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other department application process.
3. Use of water under this agreement does not constitute a dedication of the water to renter's place of use, and upon expiration of this agreement, the points of diversion and place of use of the water shall revert to those authorized under the water right and/or again be available to rent from the bank.
4. Use of water under this agreement shall not prejudice any action of the Department in its consideration of an application for transfer or permit filed by the applicant for this same use.
5. Renter agrees to comply with all applicable state and federal laws while using water under this agreement.
6. Renter agrees to hold the Board, the Director and the state of Idaho harmless from all liability on account of negligent acts of the renter while using water.
7. Renter acknowledges and agrees that the Director may terminate authorization for the use of a water right based on a water right's priority date.
8. Failure of the renter to comply with the conditions of this agreement is cause for the Director to rescind approval of the rental agreement.
9. Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 37.
10. The renter shall maintain acceptable measuring device(s), including data logger(s), at the authorized points of diversion, points of injection into Silver Creek or its tributaries, and points of rediversion in accordance with Department specifications to determine and record the amount of water diverted
11. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 3.5 afa per acre at the field headgate for irrigation of the place of use.
12. This rental agreement and rights 37-59D, 37-344A, and 37-793 when combined shall not exceed the irrigation of 301.9 acres.
13. Water diverted under this approval shall be injected into Silver Creek or its tributaries and re-diverted at the authorized point(s) of rediversion from Little Wood River.
14. The right holder shall make full beneficial use of all surface water available to the right holder for irrigation of lands within the authorized place of use for this right. The right holder may divert ground water under this

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES

WATER SUPPLY BANK RENTAL AGREEMENT No. 560

right to irrigate land with appurtenant surface water rights when the surface water supply is not reasonably sufficient to irrigate the place of use for this water right or is not available due to drought, curtailment by priority, or the seasonal startup and shutoff or maintenance schedule for canal company or irrigation district deliveries. The right holder shall not divert ground water for irrigation purposes under this right if use of the surface water supply is intentionally discontinued or reduced (for example abandoned, forfeited, sold, disallowed by court decree, or leased to the Water Supply Bank), or is not deliverable due to non-payment of annual assessments, without an approved transfer pursuant to Idaho Code § 42-222 or other Department approval.

15. This rental agreement does not authorize the construction of a well.
16. This rental agreement does not grant any right-of-way or easement across the land of another or to use the diversion works or conveyance works of another person or entity.
17. This rental agreement does not authorize the use of diversion works or a delivery system owned by or managed by a corporation or an irrigation district without the consent of such corporation or irrigation district.
18. The quantity of water delivered pursuant to this rental agreement may be subject to reasonable conveyance losses, as determined by the watermaster.
19. This rental agreement may only be used to provide a replacement water supply to lands or other uses which normally have a full water supply, except for the drought condition. This rental agreement may not be used to provide water for new development or to allow expansion of the use of water under existing water rights.

WATER SUPPLY BANK RENTAL AGREEMENT No. 560

Term of Rental: This rental agreement shall take effect when all parties have signed it and shall continue in effect until December 31, 2021. Use of rental water shall be authorized as of either the date this rental agreement takes effect or the first day of the rental season of use, in 2021, whichever occurs last.

Annual Rental Fee:

2021: \$2,131.60

The full fee for the rental of the above-described right(s) is \$2,131.60 for 2021. The renter fee includes an administrative fee of \$2,131.60 for 2021. Note that the renter is obligated to pay only the administrative fees associated with the water rights.

An annual payment shall be received by the Department on or before December 31 each year preceding the use of the rented water rights. The agreement will be void if payment is not received by the due date in a given year. Rental fees are non-refundable. To voluntarily terminate the agreement early, notify the Department in writing prior to the rental fee due date.

Total Water Use Authorized Under Rental Agreement

Beneficial Use	Diversion Rate (CFS)	Diversion Volume (AF)	Acres (AC)	Rate/Acre (CFS/AC)	Volume/Acre (AF/AC)
IRRIGATION	4.65	1000	301.9	0.015	3.31
Combined Total	4.65	1000	301.9	0.015	3.31

** The authorized water usage reflects a reduction from the water right elements rented, to account for the use of only ground water and the combined limits of existing water rights at the place of use.*

Total Acres: 301.9

RENTAL AGREEMENT CONDITIONS OF ACCEPTANCE

1. The use of water under this agreement shall be subject to the provisions of Idaho Code § 42-1766.
2. Rental of the specified right from the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other department application process.
3. Use of water under this agreement does not constitute a dedication of the water to renter's place of use, and upon expiration of this agreement, the points of diversion and place of use of the water shall revert to those authorized under the water right and/or again be available to rent from the bank.
4. Use of water under this agreement shall not prejudice any action of the Department in its consideration of an application for transfer or permit filed by the applicant for this same use.
5. Renter agrees to comply with all applicable state and federal laws while using water under this agreement.
6. Renter agrees to hold the Board, the Director and the state of Idaho harmless from all liability on account of negligent acts of the renter while using water.
7. Renter acknowledges and agrees that the Director may terminate authorization for the use of a water right based on a water right's priority date.
8. Failure of the renter to comply with the conditions of this agreement is cause for the Director to rescind approval of the rental agreement.
9. Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 37.
10. The renter shall maintain acceptable measuring device(s), including data logger(s), at the authorized points of diversion, points of injection into Silver Creek or its tributaries, and points of rediversion in accordance with Department specifications to determine and record the amount of water diverted
11. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 3.5 afa per acre at the field headgate for irrigation of the place of use.
12. This rental agreement and rights 37-59D, 37-344A, and 37-793 when combined shall not exceed the irrigation of 301.9 acres.
13. Water diverted under this approval shall be injected into Silver Creek or its tributaries and re-diverted at the authorized point(s) of rediversion from Little Wood River.
14. The right holder shall make full beneficial use of all surface water available to the right holder for irrigation of lands within the authorized place of use for this right. The right holder may divert ground water under this

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES

WATER SUPPLY BANK RENTAL AGREEMENT No. 560

right to irrigate land with appurtenant surface water rights when the surface water supply is not reasonably sufficient to irrigate the place of use for this water right or is not available due to drought, curtailment by priority, or the seasonal startup and shutoff or maintenance schedule for canal company or irrigation district deliveries. The right holder shall not divert ground water for irrigation purposes under this right if use of the surface water supply is intentionally discontinued or reduced (for example abandoned, forfeited, sold, disallowed by court decree, or leased to the Water Supply Bank), or is not deliverable due to non-payment of annual assessments, without an approved transfer pursuant to Idaho Code § 42-222 or other Department approval.

15. This rental agreement does not authorize the construction of a well.
16. This rental agreement does not grant any right-of-way or easement across the land of another or to use the diversion works or conveyance works of another person or entity.
17. This rental agreement does not authorize the use of diversion works or a delivery system owned by or managed by a corporation or an irrigation district without the consent of such corporation or irrigation district.
18. The quantity of water delivered pursuant to this rental agreement may be subject to reasonable conveyance losses, as determined by the watermaster.
19. This rental agreement may only be used to provide a replacement water supply to lands or other uses which normally have a full water supply, except for the drought condition. This rental agreement may not be used to provide water for new development or to allow expansion of the use of water under existing water rights.

STATE OF IDAHO
WATER RESOURCE BOARDAPPLICATION TO RENT WATER
FROM THE BOARD'S WATER SUPPLY BANK

RECEIVED

JUL 06 2021

DEPARTMENT OF
WATER RESOURCESApplicant Name: South Valley and Galena Ground Water Districts

Is this application being submitted with a lease application as a lease/rental package?

Yes ☐ No ☒

If yes, specify companion water rights in Section 4

This application must be completed according to the minimum requirement checklist below. This checklist is part of the rental application and must be included with the rental application. **Applications that do not meet the minimum requirements will not be placed in the processing queue and may be returned until all minimum requirements have been met.**

Rental applications should be submitted well in advance of the desired start date for the use of rental water. Rental applications may be processed as early as November 1 of the year prior to the intended use of rental water. Any rental application received on or before November 1 for use in the next year will be assigned a received date of November 1. Rental applications submitted more than one year in advance of the proposed start date for the use of rental water will not be accepted and will be returned to applicants. Rental applications may be returned to applicants if the desired start date for the use of rental water cannot be accommodated by the Water Supply Bank. Rental requests will not be accepted once the rental season of use period has concluded.

One rental application per beneficial use of water. For multiple beneficial uses of water, separate rental requests should be submitted for each unique beneficial use of water. One rental application can be submitted if you propose to rent water from multiple sources.

For additional instructions on completing a rental application, visit the Bank's website at http://idwr.idaho.gov/water_supply_bank.

MINIMUM REQUIREMENT CHECKLIST

Check All Items as Either Attached (Yes) or Not Applicable (N/A)

Yes

- ☒ Completed *Application to Rent Water from the Board's Water Supply Bank*
- ☒ Confirmation that this form has been printed single sided, per requirement of the Water Supply Bank

Attachment N/A Yes

- 2 ☒ A map showing the proposed point(s) of diversion, place(s) of use, and water diversion and distribution systems proposed to be used with your rental request
- 3A ☐ ☒ Detailed information on a proposed use of rental water
- 3F ☐ ☐ Authorization from the owner/operator of the rental point(s) of diversion
- 3H ☒ ☐ Water modeling to account for the impacts of the rental request
- 3J ☒ ☐ Documents justifying a rate of flow greater than 0.02 cfs/acre
- 3K ☐ ☐ Authorization from the owner/operator of the property at the proposed rental place(s) of use
- 4B ☐ ☒ Explanation of how the rental water will sufficiently accomplish your rental purposes
- 4C ☒ ☐ Explanation of consumptive use amounts for water rights experiencing a change in nature of use

Application to Rent Water (Continued)

1. CONTACT INFORMATION

A. Applicant South Valley and Galena Ground Water Districts

Mailing Address PO Box 2139, Boise, ID 83701

Street City State Zip Code

Email Address brs@idahowaters.com Phone Number 208-336-0700

B. Is this application being completed by an authorized representative on behalf of the applicant? Yes ☒ No ☐
If yes, representatives (includes company employees if the applicant is a corporation, as well as legal counsel or consultants) should provide their information below if they desire to be included on correspondence with the rental applicant.

Representative Albert Barker Professional Title Attorney

Organization Barker, Rosholt & Simpson Relationship to Applicant Counsel

Mailing Address PO Box 2139, Boise, ID 83701

Email Address brs@idahowaters.com Phone Number 208-336-0700

2. MAP

Create a map of the proposed point(s) of diversion, place(s) of use and water diversion, delivery and distribution systems. Make sure the rental place of use is outlined and annotated with legal land descriptions (Township, Range, Section and Quarter-Quarters) or with GPS coordinates. For irrigation purposes, mark the number of acres you desire to irrigate. Attach the map to this application and label it **Attachment 2**.

3. DESCRIPTION OF PROPOSED USE FOR RENTAL WATER

A. Describe why you desire to rent water and provide a detailed description of your proposed use. If the proposed use is not for irrigation, describe in detail how you determined the amount of rental water required. If the space below is insufficient, attach additional sheets as required and label them **Attachment 3A**:

Ground Water will be pumped under the portions of the rights lease to the Water Supply Bank and delivered to Silver Creek through up to 9 wells shown on the attached map. Water will be delivered to water right 37-344A, see attached map, as part of a mitigation plan for the 2021 irrigation season.

B. Enter the desired and/or minimum rates of flow, volume, or irrigable acres requested for your rental purposes:

Desired Rate (Cubic Feet/Second)	Desired Volume (Acre-Foot)	Minimum Rate* (Cubic Feet/Second)	Minimum Volume* (Acre-Foot)	Desired Acres (if applicable)
8.00 CFS	1065.8 AF	8.00 CFS	1065.8 AF	304.5 AC

* Sometimes water rights provide an exceptionally low rate per acre and/or low volume per acre. This section is meant to establish an acceptable range of water sufficient for your proposed water use. Please see question 4B and complete if necessary.

C. This section must be completed in full. Enter the proposed start date and latest possible start date for using rental water as well as the number of years you would like to rent water. The latest possible start is the latest possible date by which you would be willing to pay for a rental and be able to benefit from utilizing rental water.

Desired Start Date (month/day/year)	Latest Possible Start Date (month/day/year)	*Mark Desired Rental Duration (Calendar Years)					**Applicant's preference if rental application cannot be processed prior to the latest possible start?	
7-6-2021	7-6-2021	☒ 1	☐ 2	☐ 3	☐ 4	☐ 5	☒ Process application as soon as possible	☐ Return application to applicant

* The number of years permissible for a rental is subject to the lease contract duration for the water right(s) being rented.

** Per Idaho Code 42-201, it is unlawful to divert or use water without a valid water right. Water Supply Bank rental applicants are not authorized to utilize rental water prior to the execution of an approved rental agreement. Rental requests may be returned to applicants if no water is available from the Bank to fulfill a rental request.

STATE OF IDAHO
WATER RESOURCE BOARD

Application to Rent Water (Continued)

- D. Describe your water distribution system and how rental water will be delivered from the point(s) of diversion (POD) to the proposed place of use (POU):

Water is proposed to be diverted from up to 9 wells in the Bellevue Triangle and placed in Silver Creek for diversion by Barbara Farms from the Little Wood River under water right 37-344A.

- E. Describe the physical type (pump, headgate, etc.) and location of the POD from which rental water is proposed to be diverted:

POD Description	Water Source	Other Water Rights Diverted from this POD
See Attached List of PODs		

If the POD(s) above are located where water is turned into a canal, lateral or ditch, or if they are located on your property but are serviced by water that is delivered via a canal, lateral or ditch, your rental request must include documented authorization from all relevant canal companies, irrigation districts and/or water delivery entities, confirming that they consent to your diversion of water from their system.

- F. Has documented consent from all relevant water delivery entities been obtained? Yes ☐ N/A ☐

If yes, include documented consent as Attachment 3F.

- G. Do any POD(s) identified in Question 3E divert from a water source that may require water modeling? Yes ☐ No ☒

Refer to the Water Modeling Requirements Information Sheet to determine if a rental POD may require water modeling.

- H. Has water modeling been provided with your rental request? Yes ☐ N/A ☒

If yes, label modeling Attachment 3 H.

Rental applications that require modeling will be returned if modeling is not provided.

- I. Specify the desired beneficial use of water and the requested season of use or number of acres required:

- ☒ Irrigation 301.9 (number of acres) Duration: Subject to IDWR standard seasons of use
- ☐ Commercial from: _____ (mm/dd) to: _____ (mm/dd)
- ☐ Stockwater from: _____ (mm/dd) to: _____ (mm/dd)
- ☐ Industrial from: _____ (mm/dd) to: _____ (mm/dd)
- ☐ Other: _____ from: _____ (mm/dd) to: _____ (mm/dd)

- J. For irrigation uses, do you propose to divert water at a rate greater than 0.02 cfs/acre? N/A ☐ Yes ☒ No ☐

If yes, justify the rate of flow and attach any supporting documents as Attachment 3J. Justification may include information on soil composition, conveyance losses, crop type, irrigation systems, public access areas, etc. A rate of 0.03 cfs/acre is permissible for irrigation of 5 acres or less.

Anticipated losses between the points of diversion in the Bellevue Triangle and the place of use are expected to reduce the diversion rate per acre to 0.02 cfs or less.

- K. Do you own the land at the proposed rental place of use (POU)? Yes ☐ No ☒

If no, attach documentation from the POU owner/operator confirming your authorization to use the POU and label it Attachment 3K.

- L. List all other water rights and sources of water at the rental place of use for the same purpose, including privately owned water rights and water received from a municipal supplier, an irrigation district, a canal company or any other water delivery entity. Explain why additional water is required:

37-344A, 37-973 from the Little Wood River, 37-59D from the Big Wood River and up to 1,000 Ac-Ft of storage water rented from the Snake River.

Application to Rent Water (Continued)

4. RENTAL REQUESTS FOR SPECIFIC WATER RIGHTS

A. Are you requesting to rent specific water rights?

Yes ☒ No ☐

If yes, specify below the elements of the water rights you are requesting to rent. If no, continue to Question 4B.

Important Information: Diversion rates and volumes sought for rent must be proportionate to the per acre diversion rates and per acre volume limits of the water right under lease contract to the Water Supply Bank. Prior to completing this section, applicants should review all water right lease contracts and any active rental agreements to determine which elements of a water right are available to satisfy a rental request. Lease and rental documents are searchable via [IDWR's website](#).

Water rights identified below must either already be leased to the Bank or a lease proposal should accompany this rental request. **Rental requests for water rights not yet leased to the Bank will be returned if companion lease applications are not provided with the rental request.** For leased rights featuring combined limits, rentals must be consistent with combined diversion rate, volume or acre limits. Combined limits should be listed on a row below water right numbers.

Water Right Elements Leased to Water Supply Bank					Leased totals, minus water right elements involved in active rental agreements, equals water right elements available for rent	Water Supply Bank Rental Request		
Water Right Number (leave blank if sub-total of combined limits)	Nature of Use	Diversion Rate (CFS)	Volume (AF)	Acres (AC)		Diversion Rate (CFS)	Volume (AF)	Acres (AC)
37-804	Irrigation	0.26	45.9	304.5		All	All	All
37-2568	Irrigation	0.46	77.4	"		"	"	"
		0.44		"		"	"	"
37-2502	Irrigation	0.72	134.7	"		"	"	"
		0.77		"		"	"	"

37-20637	Irrigation	0.23	34.2	"		"	"	"
		0.23	41.2	"		"	"	"
37-2581	Irrigation	0.43	170.6	"	TOTAL			
37-2599	Irrigation	0.22	85.3	"				
Applicants must ensure the requested rate per acre and volume per acre do not exceed the rate per acre and volume per acre limits of water rights leased to the Water Supply Bank						CFS	AF	AC

**Attach multiple copies of this page if space above is insufficient to list all water rights requested to be rented on this application.*

B. If water right conditions, combined limits, or the sum of all water right elements being requested provide an unconventional duty of water (e.g., an unusually low rate per acre or volume per acre for irrigation use), explain how your proposed rental will sufficiently accomplish your intended purposes. Attach a separate page if space is insufficient and label it **Attachment 4B**:

C. Does your rental request propose to change the nature of use for any water right(s) being rented?

Yes ☐ No ☐

If yes, explain how the water right(s) will be converted to new uses. Include the historic, consumptive use amounts for the water right being rented if you have it, as well as the new consumptive use amount for your proposed beneficial use. If space below is insufficient, attach a separate page and label it **Attachment 4C**:

STATE OF IDAHO

5. ADDITIONAL INFORMATION

- A. Is this the first time that rental water is being requested for this purpose at the rental place of use? Yes ☒ No ☐
If no, list previous rental requests/agreements and explain why you have not secured a permanent water right for your needs:

- B. Have you or do you intend to submit an application for permit or transfer proposing a similar use as this rental? Yes ☐ No ☒
If yes, describe:

- C. Was this rental application submitted in response to a Notice of Violation (NOV) or a pending NOV? Yes ☐ No ☒
If yes, describe the date and location of the NOV.

- D. Additional Information

This rental application is being submitted in an effort to protect senior surface water users and allow junior ground water users to complete a partial irrigation season.

DECLARATION

I hereby assert that the information contained in this application is true to the best of my knowledge. I understand that any willful misrepresentations made in this application may result in rejection of the application or cancellation of an approval. I understand that if this rental application is approved, it will be subject to the provisions of Section 42-1766, Idaho Code and all applicable state and federal laws. I understand that the submission of a rental application provides no guarantee for approval of a rental agreement. I also understand that, per Idaho Code 42-201, it is unlawful to divert or use water without a valid water right and that I am not authorized to utilize water as proposed in this application prior to the execution of an approved rental agreement.

Water Modeling Requirement Information Sheet

Information on water modeling requirements for rental requests within special administrative areas

Important information on requesting rental water within special administrative areas: Refer to the information below to determine whether the modeling of potential impacts from your rental request is necessary. Use Section 4 of the rental application to identify selected water rights. **If you submit an application to rent water from within a special administrative area and water modeling is required, your rental request will be returned if water modeling is not provided.**

Water modeling may be required when an application to rent water involves one of two scenarios:

Scenario 1: The rental request proposes to divert water from a regulated water source and/or within a special administrative area AND the distance between the rental point(s) of diversion (POD) and the POD(s) for the leased water right(s) is greater than the administratively established, acceptable distance.

Regulated water sources may areas include:

- A. Ground water resources within the modeled area of the Eastern Snake Plain Aquifer (ESPA) and tributary aquifers;
- B. Ground water within Ground Water Management Areas (GWMAs) or Critical Ground Water Areas (CGWAs);
- C. Water resources within other specified administrative areas, as established by the Idaho Water Resource Board (IWRB) or the Idaho Department of Water Resources.

The distance between any rental POD(s) and the POD(s) for a leased water right to be rented is important. On the ESPA, distance is measured in terms of model cells that cover an area of one square mile. Ground water modeling is not required if lease POD(s) and rental POD(s) are located within the same model cell or within adjacent model cells. If the lease and rental PODs are separated by more than one model cell groundwater modeling must be completed using the IDWR ESPA Transfer Tool and modeling results must be submitted with the rental application. ESPA modeling tools can be accessed and freely downloaded from IDWR's website by visiting: www.idwr.idaho.gov/WaterManagement/WaterRights/WaterRightTransfers/resources.htm.

Ground water modeling may be required within GWMAs, CGWAs or other regulated administrative areas. Applicants who desire to rent water within an established GWMA, CGWA or other regulated administrative area should consult IDWR's website before submitting their application to review the current status of administrative orders related to regulated administrative areas. Consult www.idwr.idaho.gov/WaterInformation/GroundWaterManagement/designated_areas.htm for information on GWMAs or CGWAs, visit <https://idwr.maps.arcgis.com/home> to use mapping tools to find other regulated areas.

Applicants interested in renting water within a GWMA, CGWA or other regulated administrative areas should request water rights that have been leased into the Bank from within the same administrative area. Generally, the Bank will not permit a rental of water within a regulated administrative area if the leased water rights are not located within that same administrative area.

Scenario 2: A rental request proposes to divert water from a different but hydraulically connected water source.

Modeling situations may include:

- A. Rental requests that propose to divert surface water rights via ground water POD(s) (wells); and
- B. Rental requests that propose to divert ground water from one aquifer when the right being rented authorizes the diversion of ground water from a hydraulically connected, tributary aquifer.

Rental requests that propose to divert surface water rights from ground water points of diversion may be considered if ground water modeling establishes that the surface and ground water resources are directly and immediately hydraulically connected. An acceptable hydraulic connection occurs when at least 50 percent of the total depletions from a well are detectable from the original water source within a 24 hour period. The existing (leased) POD and proposed (rental) POD must be proximate such that diversion and use of water from the proposed POD would have substantially the same effect on the hydraulically-connected source as diversion and use of water from the original POD.

Requests to rent ground water across tributary aquifer sources may be considered if ground water modeling is provided to demonstrate that two aquifers are hydraulically connected and the anticipated impacts of diverting ground water from one source through the other is modeled accordingly.

For more information about rental application requirements, contact IDWR at (208) 287-4800.

APPROVAL OF RENTAL – FROM WATER BANK

The Thomas O’Gara Family Trust has leased certain water rights appurtenant to land known as the Silver Spring Ranch into the Water Bank. The South Valley and Galena Ground Water Districts have filed an application to rent the O’Gara water rights in the water bank as a part of a mitigation plan related to curtailment of groundwater in the Bellevue Triangle. The water rights in the water bank are in the name of the Thomas O’Gara Family Trust. The land has been sold to Big Hat LLC, but the water rights have not yet been transferred. The new owners have no objection to the rental. Accordingly, The Thomas O’Gara Family Trust agrees that the rental fee to the Ground Water Districts shall be at no cost to the Ground Water Districts, except for any administrative fees owed to the Water Bank, which shall be borne by the Ground Water Districts.

THE THOMAS O’GARA FAMILY TRUST

By Brian Barsotti, Attorney

PO Box 370, Ketchum, Idaho 83340

MEMORANDUM FOR AGREEMENT

Re: Review & Analysis of Application to Rent Water from the State Water Supply Bank

PURPOSE/NARRATIVE: The rental application was filed by South Valley and Galena Ground Water Districts as part of the larger Basin 37 settlement discussion. The purpose is to supply water to Barbara Farms LLC by diverting leased ground water from nine different wells and injected that water into Silver Creek. The injected water would flow from Silver Creek into Little Wood River where it could be diverted and used within the authorized place of use of existing Little Wood River Water Rights that are currently not deliverable due to low flow in the river.

AUTHORITY TO FILE: The application was filed by South Valley and Galena Ground Water Districts in a cooperative effort. It was signed by Kristy Molyneux who represented themselves as "SVGWD Chair" and Pat McMahon (no title included). It is assumed these individuals represent the two GW Districts and are authorized to submit the rental application. Attached to the application is a statement from the owners of property where the nine wells proposed as the points of diversion are located. Although the consent statements specifically reference temporary transfer applications, those temporary transfer applications are part of the larger settlement discussions as is this rental applications. So it is assumed the well owners are also consenting the diversion and injection plan proposed in this rental application.

It is worth noting that IDWR has received multiple notice of change in water right ownership for some or all of these rights. The appropriate fees were never received to IDWR did not change the water right ownership records. It is my understanding the ownership change documents filed indicate the portions of the rights accepted into the bank might be owned by Silver Springs Ranch, so it is possible that portions of these rights are not owned by OGara Family Trust. Since the ownership change forms are incomplete they remain unprocessed. I can only evaluate the information available to me at the time this review was conducted.

WATER RIGHT VALIDITY:

The applicants propose a rental of the ground water rights leased under contract 1133. These rights were accepted into the bank for the 2020 season and sent to be released at the end of 2022. No concerns about the validity of the rights. However, aerial imagery from 2020 and Landsat imagery from 2020 show irrigation has taken place on acres identified in the lease application as acres to be idle during the terms of the lease. Landsat records also show as much as 127.6 acres within the idle acres boundary were irrigated in 2021.

Initial review of the entire place of use indicates 1262.5 acres were irrigated within the POU boundary, including within the WSB Lease Boundary. The rights accepted into the bank through contract 1133 are limited to a combined total of 2119.9 acres. Since 304.5 acres were accepted for lease, 1815.4 acres could be irrigated within the POU without violating the terms of the contract. 1,262.5 acres were observed using one representative image from 2021. Further evaluation of Landsat records and WMIS diversion data is needed to fully understand the extent of irrigation that occurred and the amount of acres available to rent.

INJURY TO OTHER WATER RIGHTS:

The points of diversion for the leased rights are not within the ESPA boundary, nor are the proposed points of diversion under the rental. ESPA modeling is not required. The main concern with the proposed rental is that the ground water rights are part of a current curtailment order. In 2015 the IWRB passed a resolution authorizing the water supply bank to reject or refuse requests to rent water from a right subject to a curtailment order of the Director of the Department of Water Resources. Further modeling and data is needed to fully address injury concerns associated with the proposed rental. Due to injury concerns, I can't recommend approval of a request to rent water rights subject to a curtailment order.

ENLARGEMENT OF USE:

Enlargement concerns exist with this rental application. The extent of irrigation occurring at the authorized place of use requires additional evaluation to ensure 304.5 acres are available to rent. The irrigation of acres under a rental agreement could lead to a greater amount of acres irrigated. This might not necessarily be an issue except that if additional acres are irrigated at the proposed place of use using Little Wood River water or hydrology connected ground water the use would negatively impact surface water rights.

The rental should be limited to 301.9 acres instead of the 304.5 acres potentially available. The intent is to supply water to Barbara Farms LLC to supplement water rights 37-59D, 37-344A, and 37-973. These three rights are limited to a combined total of 301.9 acres within a 793 acre PPU. To ensure additional acres are not developed under any rental agreement the use, if approved, should be limited to the restrictions of the rights this rental is intended to supplement. Additionally, the portions of ground water rights requested for rental are stacked with water rights from the Big Wood River. To ensure the stacked surface water rights are not used on acres separate from the stacked ground water rights, the applicant should rent all the water rights associated with Lease Contract 1133.

LOCAL PUBLIC INTEREST:

This rental application was submitted as one smaller part of a much larger settlement discussion. The intent of the settlement discussion is to determine a way to satisfy senior water users of the Little Wood River so that ground water users in the Bellevue triangle can continue to divert water. It is within the public interest to grant the proposed rental if the diversion of ground water under this rental does not further injure surface water users.

BENEFICIAL USE/CONSERVATION OF WATER RESOURCES:

The proposed use of water for irrigation would be restricted to not exceed the duty of water of the rented rights nor existing rights at the proposed POU. The rental appears consistent with the conservation of water resources in Idaho.

DEPARTMENT STAFF OR WATERMASTER COMMENTS:

Kevin Lackey, Watermaster of WD 37 does not oppose the rental application.
