RENTAL AGREEMENT CONDITIONS OF ACCEPTANCE

1. The use of water under this agreement shall be subject to the provisions of Idaho Code § 42-1766.
2. Rental of the specified right from the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other department application process.
3. Use of water under this agreement does not constitute a dedication of the water to renter's place of use, and upon expiration of this agreement, the points of diversion and place of use of the water shall revert to those authorized under the water right and/or again be available to rent from the bank.
4. Use of water under this agreement shall not prejudice any action of the Department in its consideration of an application for transfer or permit filed by the applicant for this same use.
5. Renter agrees to comply with all applicable state and federal laws while using water under this agreement.
6. Renter agrees to hold the Board, the Director and the state of Idaho harmless from all liability on account of negligent acts of the renter while using water.
7. Renter acknowledges and agrees that the Director may terminate authorization for the use of a water right based on a water right's priority date.
8. Failure of the renter to comply with the conditions of this agreement is cause for the Director to rescind approval of the rental agreement.
9. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.0 afa per acre at the field headgate for irrigation of the place of use.
10. Use of water under this right may be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 120.
11. This rental does not authorize the construction of a well.

12. Prior to the diversion and use of water under this rental, the right holder shall install and maintain acceptable measuring device(s) at the authorized point(s) of diversion in accordance with Department specifications, or shall obtain an approved variance from the Department to determine the amount of water diverted from power records or to maintain an existing measuring device.
13. Prior to December 31 of each year, the Board may review this rental agreement to determine whether it is consistent with the management plan that may be approved for the Eastern Snake Plain Aquifer Ground Water Management Area ("ESPA GWMA Plan") pursuant to Idaho Code § 42-233b. The Board may cancel this rental agreement if the Board determines it is not consistent with the ESPA GWMA plan. This application must be completed according to the minimum requirement checklist below. This checklist is part of the rental application and must be included with the rental application. Applications that do not meet the minimum requirements will not be placed in the processing queue and may be returned until all minimum requirements have been met.

Rental applications should be submitted well in advance of the desired start date for the use of rental water. Rental applications may be processed as early as November 1 of the year prior to the intended use of rental water. Any rental application received on or before November 1 for use in the next year will be assigned a received date of November 1. Rental applications submitted more than one year in advance of the proposed start date for the use of rental water will not be accepted and will be returned to applicants. Rental applications may be returned to applicants if the desired start date for the use of rental water cannot be accommodated by the Water Supply Bank. Rental requests will not be accepted once the rental season of use period has concluded.

One rental application per beneficial use of water. For multiple beneficial uses of water, separate rental requests should be submitted for each unique beneficial use of water. One rental application can be submitted if you propose to rent water from multiple sources.

For additional instructions on completing a rental application, visit the Bank's website at http://idwr.idaho.gov/water_supply_bank.

4. RENTAL REQUESTS FOR SPECIFIC WATER RIGHTS

A. Are you requesting to rent specific water rights?

Yes ☒ No ☐

If yes, specify below the elements of the water rights you are requesting to rent. If no, continue to Question 4B.

Important Information: Diversion rates and volumes sought for rent must be proportionate to the per acre diversion rates and per acre volume limits of the water right under lease contract to the Water Supply Bank. Prior to completing this section, applicants should review all water right lease contracts and any active rental agreements to determine which elements of a water right are available to satisfy a rental request. Lease and rental documents are searchable via [IDWR's website](#).

Water rights identified below must either already be leased to the Bank or a lease proposal should accompany this rental request. **Rental requests for water rights not yet leased to the Bank will be returned if companion lease applications are not provided with the rental request.** For leased rights featuring combined limits, rentals must be consistent with combined diversion rate, volume or acre limits. Combined limits should be listed on a row below water right numbers.

Water Right Elements Leased to Water Supply Bank					Leased totals, minus water right elements involved in active rental agreements, equals water right elements available for rent	Water Supply Bank Rental Request		
Water Right Number (leave blank if sub-total of combined limits)	Nature of Use	Diversion Rate (CFS)	Volume (AF)	Acres (AC)		Diversion Rate (CFS)	Volume (AF)	Acres (AC)
29-7622	Irrigation	0.6	100	3		0.6	10.0	3
Applicants must ensure the requested rate per acre and volume per acre do not exceed the rate per acre and volume per acre limits of water rights leased to the Water Supply Bank					TOTAL	0.6 CFS	10.0 AF	3 AC

**Attach multiple copies of this page if space above is insufficient to list all water rights requested to be rented on this application.*

B. If water right conditions, combined limits, or the sum of all water right elements being requested provide an unconventional duty of water (e.g., an unusually low rate per acre or volume per acre for irrigation use), explain how your proposed rental will sufficiently accomplish your intended purposes. Attach a separate page if space is insufficient and label it **Attachment 4B**:

C. Does your rental request propose to change the nature of use for any water right(s) being rented?

Yes ☐ No ☒

If yes, explain how the water right(s) will be converted to new uses. Include the historic, consumptive use amounts for the water right being rented if you have it, as well as the new consumptive use amount for your proposed beneficial use. If space below is insufficient, attach a separate page and label it **Attachment 4C**:

**RE: APPLICATION TO RENT WATER FROM THE WATER SUPPLY BANK
WATER RIGHT NO(S). 29-13892 AGREEMENT 604**

*****TIME SENSITIVE RESPONSE REQUIRED*****

Dear Applicant:

The Department of Water Resources acknowledges receipt of your application to rent water from the Water Supply Bank. **I have enclosed a Water Supply Bank Rental Agreement for your review and signature.** Upon signature and return of the original agreement, together with the rental fee described below, the Department will also sign the original agreement and return an executed copy to you. Execution of the agreement and compliance with the conditions of approval authorize diversion and use of water as provided in the agreement.

A rental fee of \$200.00 per year was calculated based on the current rental rate of \$20.00 per acre-foot times a diversion volume of 10.0 acre-feet.

Please send a check for \$200.00 for 2022 made payable to the Idaho Department of Water Resources, **together with the signed rental agreement, within 14 days** so I can complete processing. An annual payment shall be received by the Department prior to the execution of this agreement and prior to January 1 in all subsequent years for the duration of the rental period. The agreement will be void if payment is not received prior to the due date in a given year. If you would like to terminate the agreement prior to the end of the rental period, you must submit written notice of your intent to the Department at least 30 days prior to the rental fee due date.

Pursuant to the Water Supply Bank Rules, 90% or \$180.00 of the rental fee will be paid to the lessor(s) and 10% or \$20.00 will be retained by the Department to offset administrative costs for **2022**.

If you have any questions, please contact this office at bank@idwr.idaho.gov or (208) 287-4800.

MEMORANDUM FOR RENTAL APPLICATION # 2159

To: Water Right no. 29-13892
From: Dave Betts
Date: January 27, 2022
Re: Review & Analysis of Application to Rent Water from the State Water Supply Bank

PURPOSE/NARRATIVE: On October 6, 2021, Springfield-Sterling Cemetery ("applicant") submitted an application to rent water. This application is for the same quantity of water per year and the same place of use as the applicant's previous rental agreement (no. 496) which expired on December 31, 2021.

The applicant has an existing water right (no. 35-11066) which authorizes 3.0 acres of irrigation from ground water. The applicant needs an additional 2.4 acres of irrigation in order to be able to irrigate the entire cemetery. The applicant requested a rental term of five years while they seek to purchase a water right to transfer to the place of use as a permanent water source.

The applicant proposed renting water from water right no. 29-7622, which is only available for two more years (through 2023). On December 7, 2021, I spoke with Tod Woods by phone. Mr. Woods signed the application to rent on behalf of Springfield-Sterling Cemetery. We discussed the limited number of years from requested water right no. 29-7622. Mr. Woods said that the applicant is okay with a two-year rental, but they would prefer a five-year rental if a different water right were available to rent. Following that discussion, I found water right no. 29-13892 which can provide sufficient water for the requested 5-year rental term.

This application required modeling of the movement of ground water within the Eastern Snake Plain aquifer (ETRAN) to evaluate the potential risks of injury to other water rights. The data entry for the ETRAN modeling provided by the applicant was incorrect. I completed the ETRAN modeling using water right no. 29-13892 for the evaluation of the proposed rental agreement.

AUTHORITY TO FILE: The application was signed by Tod Woods. Bingham County records identify Mr. Woods as a current office holder for Springfield-Sterling Cemetery District. Authority to file is not a concern.

WATER RIGHT VALIDITY: The portion of the place of use for the leased water right (no. 29-13892) was last irrigated in 2019. This right was reviewed for lease in 2021. Validity of the leased right is not a concern. Satellite imagery indicates that the place of use was idled as required for the 2021 season.

INJURY TO OTHER WATER RIGHTS: Modeling the relocation of ground water within the ESPA is required for the proposed rental. ESPA transfer tool (ETRAN) modeling suggests that no injury is apparent to the Snake River through the relocation of 10.0 acre-feet annually from the leased location of 29-13892 to the rental location.

ENLARGEMENT OF USE: In order to match the diversion rate of the applicant's existing water right, this review proposes renting 2.5 acres of irrigation from water right 29-13892 to provide 2.4 acres of irrigation at the rental place of use. No enlargement is apparent under the rental at the proposed place of use.

LOCAL PUBLIC INTEREST: Review staff has no information to suggest this application is inconsistent with the local public interest.

BENEFICIAL USE/CONSERVATION OF WATER RESOURCES: The rental appears consistent with the conservation of water resources in Idaho.

DEPARTMENT STAFF OR WATERMASTER COMMENTS: The location for the rental point of diversion is subject to Water District 120. I requested comments from the water district, and Eastern Regional staff (IDWR). On Jan. 11, 2022, the watermaster for WD 120 replied that he did not have any concerns with the proposed rental. No other comments were received.
