RECITALS

1. The Board is authorized under chapter 17, title 42, Idaho Code to operate a water supply bank and to contract with lessors to act as an intermediary in facilitating the rental of water.
2. The Lessor has filed a completed application to lease water rights described below into the Water Supply Bank on forms supplied by the Idaho Department of Water Resources and received by the Department on January 08, 2021.
3. The Director of the Idaho Department of Water Resources has reviewed the application for compliance with the Water Supply Bank rules and has approved the Lease subject to conditions listed below.

NOW, THEREFORE, in consideration of the mutual covenants and contracts herein contained, and other good and valuable consideration, the receipt of which is hereby acknowledged, the parties hereto agree as follows:

1. **WATER RIGHTS:** The Lessor shall lease and the Board shall accept into the Bank the Applicant's water rights described as follows:

Summary of Water Rights or Portions Leased to the Bank

Water Right No.	Priority Date	Source	Diversion Rate (CFS)	Diversion Volume (AF)	Acres (AC)

Combined Lease Totals			0.32	81.1	20.3

2. **COMPENSATION:** The Lessor shall accept and the Board shall pay compensation determined by the amount of water rented under the following rental rate during such times as the water is rented from the Bank over the term of this Lease.

Minimum Payment Acceptable: Current Rental Rate

3. **TERM OF LEASE:** The term of this lease shall be January 1, 2021 to December 31, 2025. This Lease shall bind the parties and take effect when both parties have signed it.

5. **CHANGE OF WATER RIGHT:** This lease specifies water right elements including but not limited to: diversion rates; diversion volumes; number of acres authorized to be irrigated; places of use; points of diversion; beneficial uses; and seasons of use. During the term of this lease, if a water right is administratively changed due to a water right split and renumbering, this lease may be reduced by an equal amount to reflect the water right elements as legally defined under the water right. If a lease contract cannot be reduced sufficient to reflect the legal definition of a water right as amended through a water right split and/or water right transfer, the Board may release the water right from the Water Supply Bank.
6. **ASSIGNMENT OF CONTRACT:** This lease is between the Board and the Lessor, who is the recognized owner or designated representative of the recognized owners of water rights described herein. Should ownership of any part of a water right herein described change during the term of this lease, either through a water right split, a water right transfer, sale of property to which the water right is appurtenant, or through any other recognized water right reassignment, the lease benefits and obligations to the conditions of acceptance for any such water rights will be assigned to the new owners.

3. While a right is in the bank, the lessor may not use the right without approval of the Department even if the right is not rented from the bank. It does not preclude the opportunity for review of the validity of this water right in any other Department application process.

WATER SUPPLY BANK LEASE CONTRACT No. 1371

9. In accordance with Idaho Code § 42-248 and § 42-1409(6), all owners of water rights are required to notify the Department of any changes in mailing address or change in ownership of all or part of a water right. Notice must be provided within 120 days of the change.
10. If a water right leased into the Water Supply Bank is sold or conveyed during the lease term, and if the leased right was rented, the rental proceeds will be disbursed in the following manner regardless of any arrangements between the buyer(s) and seller(s) to the contrary:

 - b. New lessor(s) of record will receive payment for any subsequent rental seasons.
11. The water right(s) is leased to the bank subject to all prior water rights and shall be administered in accordance with Idaho law and applicable rules of the Department of Water Resources.
12. The unleased portions of right 36-2412C shall not exceed a total diversion rate of 4.82 cfs, a total annual maximum diversion volume of 1,207 af at the field headgate, and the irrigation of 301.7 acres for the period of this lease

Memorandum

To: Water Right 36-2412C
From: Justin Ferguson
Date: April 20, 2021
Re: Water Supply Bank Lease Application 1942

Purpose/Narrative: The Department received an application to Lease or Sell a Water Right to the Water Supply Bank January 8, 2021 on behalf of 2+ Ranch LLC from their representatives at Brockway Engineering offering portions of water right 36-2412C for lease to the Bank through the end of 2025. The application is effectively a continuation of their prior contract from 2015 through the end of 2019 protecting the acreage from forfeiture and making the volume available for rent.

Authority to File: The application was prepared by the applicant's representative at Brockway Engineering PLLC and signed by Mr. Ken Boer. Review of the Idaho Secretary of State information affirms Mr. Boer as an authorized agent for 2+ Ranch. No concerns at this time.

Water Right Validity/Forfeiture Evaluation: Initially the water right was decreed in 1997 and, per the previous review, portions appear to have been irrigated through 2014 while the full volume used in approximately 2010. As the right was released from the Bank in 2019, 2020 would constitute the sixth year of non-use. Further, as noted in the enlargement section of this review, there does not appear to have been irrigation on these specific acres in 2020 as the total amount of acreage observed irrigated corresponds to the total volume of ground water used. Per administrative memo "*Multiple Programs Memo No. 2 – Forfeiture Review Period*", a water right holder would have to take action on the year *after* a five year period of non-use elapsed, to prevent a water right from becoming subject to forfeiture. Because this would constitute the sixth year of non-use and an action was taken to protect the unused portions of 36-2412C being offered for lease, the right can be considered as valid.

Injury Evaluation: No injury is apparent through the lease as the intent is to idle acreage that would otherwise be irrigated. Additionally, because the water right has been rented during the time it had been leased to the Bank, the volume associated has been put to beneficial use. As such, there does not appear to be a cause for injury both in leasing the right to the Bank and, if it were subject to a rental request.

Enlargement of Use: Because the water right had been released from the Bank further analysis was necessary to determine whether a portion of the right had become comingled with shares from the North Side Canal Company. Review of the data captures within the Water Management Information System found that, between the two points of diversion used by 2+ Ranch, an approximate total of 505 acre-feet of water has been used in 2020. Spatially, approximately 380 acres appears to have been irrigated in the 2020 season. Using the area consumptive use divided by the field headgate standard ((3 af/annually) / (4 af/annually)) approximately 380 acres should be observed as irrigated. As such, it does not appear surface water has been used to irrigate and the water right can be leased to the Bank as a primary water right.

Local Public Interest: Staff are unaware of any local public interests that are averse to the lease.

Beneficial Use/Conservation of Water Resources: The lease appears consistent with the conservation of water resources in Idaho.

Department/Watermaster Comments: Comments were requested from IDWR's Southern Region as well as the Watermaster for District 130 on April 20, 2021
