4. GENERAL INFORMATION

- A. Is the diversion works or system owned or managed by an irrigation district or water delivery company? Yes ☐ No ☒
If yes, provide written consent from the company, corporation or irrigation district authorizing the proposed sale or lease (Attachment 4A).

- B. Please provide a description of the current water diversion and delivery system.
The right has been in the water bank since 2003.

- C. Describe any other water rights used for the same purpose at the same place of use as the water right being offered to the Bank. No rights are "used" at the place of use as the rights describing the place of use (POU) have been in the WSB since 2003. Rights that describe the same POU as 37-00026 are as follows: 37-00027, 37-23128, 37-23129, 37-23130, 37-23131. Other owners are not authorized to irrigate the POU.

- E. Will the present place of use continue to receive water from any other source? Yes ☐ No ☒
If yes, explain the relationship between the different water sources and how enlargement of the authorized use will not occur if this water right is leased.

- G. Has any portion of this water right undergone a period of five or more consecutive years of non-use? Yes ☐ No ☒

Subject: Ownership Change

Cherie, Clay,

There is a worksheet in the file "Warrants/xlsx" titled "Three Way Rental" in which you can see the further consider the math below. (N:\WRDocs\WSB\WSB PROCESSING DOCUMENTS\2015 Lease-Rentals\2015 Warrants). I drafted this to determine how to split the Sligar, BLM, Thornton rental payments for 37-26 and 37-27. Through review this morning, it appears MV Property is in fact no longer an owner of the property/water rights and can be removed from the records in our database.

The following is my analysis of the ownership changes documentation:

- 1) Property sold by JRJ Development to Harry Rinker in 2004 (ownership change filed with IDWR in 2006),
- 2) Sometime between 2004 and 2006, property seems to have been sold to David McDonald (MV Property),
- 3) In 2008, MV Property sells the property to The WRLT. At this time the water rights (in cfs) are as follows:

	Divertible	Mitigation	Actual
37-26	4.05	0.45	4.5
Proportions	90%	10%	100%
Percent Original			
37-27	1.8	0.2	2
Proportions	90%	10%	100%
Percent Original			
Stack	5.85	0.65	6.5
Proportions	90%	10%	100%
Percent Original			

- 4) WRLT files water right ownership change form (in 2010 along) with documentation regarding the portions of water rights owned by WRLT. WRLT now holds 10 % of the original right:

Original Water Rights	WRLT Portion	Water Right Remaining
-----------------------	--------------	-----------------------

37-26 Proportions Percent Original	Divertible	Mitigation	Actual	Divertible	Mitigation	Actual	Divertible	Mitigation	Actual
	4.05	0.45	4.5	0.1	0.011	0.111	3.95	0.439	4.389

	90%	10%	100%	90%	10%	100%	90%	10%	100%

5) In 2009, MV Property conveys thirty percent (of the remaining irrigation component) of the water rights to Thornton and seventy percent (of the irrigation component) to Sligar. The ownership assignment document erred however on the 30%/70% split of the mitigation component and left a sliver of the mitigation component unassigned. Per the legal deed, Sligar and Thornton now holds the following amounts:

	Water Right Remaining			Sligar (70% remaining)			Thornton (30% remaining split)			Remaining Unleased		
	Divertible	Mitigation	Actual	Divertible	Mitigation	Actual	Divertible	Mitigation	Actual	Divertible	Mitigation	Actual

6) In 2012, WRLT sells the property to BLM and BLM executes an agreement with all water right owners to correct the previously erroneous proportioned amounts of the water rights. All parties (BLM, WRLT, Sligar, Thornton and MV Property) sign off on the ownership change documentation submitted by BLM to IDWR in 2012. The water rights are now as follows:

	Original Water Rights			WRLT/BLM			Sligar			Thornton

So, MV Property is no longer an owner of these rights and IDWR's ownership records should be updated.

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES
**INSTRUCTIONS FOR FILING A
NOTICE OF CHANGE IN WATER RIGHT OWNERSHIP**

This form has been prepared to assist all claimants and owners of water rights to comply with the requirements of Sections 42-248 and 42-1409(6), Idaho Code. All persons owning or claiming ownership of a water right or claim are required to provide notice to the Department of Water Resources (IDWR) of any change in ownership of any part of the water right or claim or of any change in the owner's mailing address within 120 days of the change. Forms to report ownership changes and/or to update an address are available on IDWR's website at www.idwr.idaho.gov. In addition, all new owners of water rights within a pending general adjudication area must inquire whether a notice of claim has been filed and, if not, shall file a notice of claim if necessary.

A notice is required for changes in ownership from one individual to another, from an individual to a business entity (even if the business is owned by the individual), or from one business entity to another (even if both businesses are owned by the same individual). Adding or removing a name is considered an ownership change which requires the submission of evidence to support the change and the filing fee.

Separate brochures describing the adjudication of water rights and the ownership change notice requirement are available from IDWR. Please contact your nearest IDWR office if you would like more information or need help completing this form. A list of IDWR offices is on page 2 of these instructions, or you can call 1-800-451-4129. Water right information can be found on the department's website using the "Search Tools" and "Water Right & Adjudication Search" links at www.idwr.idaho.gov.

Please note:

- Unlike licensed or decreed water rights, which are real property, water right permits, applications for new water rights, and applications to transfer existing water rights are considered the personal property of the permit holders/applicants. Permit holders and applicants must assign their interest in a permit and/or application to the new owner. Assignment forms are available on the department's website at www.idwr.idaho.gov, or from any IDWR office. The fee for an assignment of permit is \$25. There is no charge for an assignment of application for permit or application for transfer.
- If you want to change or add a point of diversion, place of use, season of use, or purpose of use of a water right, you must file an Application for Transfer. The ownership of a water right can also be updated through the transfer process.
- The combined portions of a divided ("split") water right cannot exceed the total flow rate, volume, or period of use of the original right.
- IDWR has no jurisdiction concerning easements, rights-of-way, and zoning matters. The buyer and seller must make these provisions where necessary.

LINE INSTRUCTIONS:

1. If there are water rights associated with the property, the seller should be able to provide you with the water right or adjudication claim number(s). You may have purchased only a portion of the water right(s) held by the seller. If so, the water right(s) held by the seller may need to be divided ("split") to provide you your share of each right. Mark the box "Yes" if a division of the water right is required.

If you receive water from a municipal provider, an irrigation district or other water delivery organization, and the water rights are held by the organization, please do not use this form to record a change. Please contact the water delivery organization to determine if any action is necessary.

If you or the seller believes there are water rights for the property but you do not know the numbers, you may contact IDWR for assistance in identifying the water rights for the property in question. If adjudication claims for the rights are required and have not been filed, IDWR will so advise you.

2. Fill in the name of the current water right holder/claimant.
3. Fill in each name as listed on the conveyance document and complete the current contact information. For water rights, IDWR will update the ownership to the individual(s)/entities listed on the conveyance document. For active adjudication claims, IDWR will update the claimant information to match the conveyance document unless the new claimant provides good cause for the variance.
4. You may have acquired only a portion of the water right(s) held by the seller. If you did not acquire the entire water right/property, please check the appropriate box. Water rights are often conveyed as an appurtenance to the land where they are used, and the conveyance document for the land often does not have specific language regarding the water right. Please read your deed or other conveyance document carefully to be sure. When the conveyance document does not specifically address water rights, it will be assumed that the water rights are to be split proportionate to the amount of land acquired.

5. Indicate the date the water rights and/or adjudication claims were conveyed to you. This may be the date of closing in the case of a real estate transaction, the date a contract was signed, or the date of a court order.
6. If you are unsure about the status of your water right in the Water Supply Bank, go to:
www.idwr.idaho.gov/apps/ExtSearch/WSBSearch/WSBSearch.aspx, input your water right number and click "Search." If you find your water right is in the Water Supply Bank and you want to release it so you can use it, you can download the Request to Release form from the forms portion of our website: www.idwr.idaho.gov. Your water right may not be available for immediate release if rented by another water user.
7. **ATTACHMENTS:**

IDWR cannot process this change without **documentation of ownership**. The documentation may be in the form of a deed, court decree or other conveyance document. If you are submitting a quitclaim deed and the grantor's name does not match the water right holder of record, you will need to provide a chain of title that goes back to the water right holder/claimant of record. You may obtain this information from the assessor's office in the county where the property is located. Items that are **not** conveyance documents are deeds of trust, mortgages, purchase and sales agreements, and property tax notices.

Submit a **plat map, survey map, or aerial photograph** of the place of use for each water right or claim listed in item #1 (if necessary to clarify division of water rights or complex property descriptions). If your right(s) and/or adjudication claim(s) is for ten or more acres of irrigation, you must submit a USDA Farm Service Agency or equivalent aerial photograph with the irrigated acres outlined and point(s) of diversion clearly marked. You also have the option of printing a map using the Create a Map tool on IDWR's website at: maps.idwr.idaho.gov/mapall. It is not necessary to obtain a new survey for purposes of this form before contacting IDWR.

The Idaho Legislature has waived the fee to file a Notice of Change in Water Right Ownership for any water right pending in a general water right adjudication such as the Snake River Basin Adjudication or the Northern Idaho Adjudication. This waiver ends when a partial decree is issued for the water right that has been claimed. For water rights not pending in a general adjudication, the **filing fee** is \$25 per water right, except for those water rights that will be divided as a result of the change in ownership. The filing fee for division of a water right is \$100 per water right.

8. One of the new owner(s) must sign the form in the space(s) provided. If someone other than the owner signs the notice, evidence of authority to sign for the owner must be attached. If the new owner is a corporation or other organization, the person signing the notice must be an officer of the corporation or otherwise have authority to sign for the organization and must include their title with the signature.

When you have completed the Notice of Change in Water Right Ownership, retain a copy and **file the original form, necessary attachments, and filing fee with the IDWR office nearest you.**

error. In addition, the Land Trust executed an additional Warranty Deed recorded March 26, 2009, as Blaine County Instrument No. 566054 ("Instrument No. 566054"), which appears to be intended to correct Instrument No. 555373, but that deed is in error, as well. If Instrument No. 554221 had contained a statement that water rights were excluded from all appurtenances to the Property, then Instrument No. 555373 and Instrument No. 566054 would not have been necessary.

6. Subsequently, MV Property executed a Warranty Deed intending to transfer part, but not all the water rights appurtenant to the Property to the Land Trust, which was a Warranty Deed recorded February 4, 2008, as Blaine County Instrument No. 555373 ("Instrument No. 555373"). However, Instrument No. 555373 contained multiple errors. MV Property executed a Warranty Deed recorded February 26, 2009, as Blaine County Instrument No. 565218 ("Instrument No. 565218") and a Warranty Deed recorded March 3, 2009, as Blaine County Instrument No. 565306 ("Instrument No. 565306"), both of which were intended to correct Instrument No. 555373, but both Instrument No. 565218 and Instrument No. 565306 also contained errors. As a result, Instrument No. 554221 is corrected; but only amended by this Correction Warranty Deed, as set out below. Instrument No. 555373, Instrument No. 565218 and Instrument No. 565306 are all corrected and replaced by this Correction Warranty Deed, which relates back to February 4, 2008, the date MV Property recorded Instrument No. 555373, as set out below.

THIS CORRECTION WARRANTY DEED CORRECTS AND AMENDS the Warranty Deed recorded December 21, 2007, as Blaine County Instrument No. 554221, by adding this statement, "Any and all water rights are excluded from the appurtenances."

Grantor does hereby covenant to and with Grantee, that Grantor is the owner in fee simple of said premises; that they are free from all encumbrances except as described above; and that Grantor will warrant and defend the same from all lawful claims.

1. The parties stipulate and agree that WRLT owns a portion of water right numbers 37-00026 and 37-00027 as follows:

a. 37-00026: 0.100 cubic feet per second (cfs) of the irrigation component of the Idaho Department of Water Resources ("IDWR") water right number 37-00026, and 0.011 cfs of the mitigation component of the same right, for a total quantity of 0.111 cfs; and

b. 37-00027: 0.100 cubic feet per second (cfs) of the irrigation component of IDWR water right number 37-00027, and 0.011 cfs of the mitigation component of the same right, for a total quantity of 0.111 cfs;

c. Zero percent (0%) interest in 37-20945; and

d. Zero percent (0%) interest in shares held by the Association for the acres described as a place of use for 37-00026, 37-00027 and 37-20945 even though shares may be appurtenant to the land.

2. The parties stipulate and agree that Jeanie Sligar owns approximately seventy percent (70%) interest in water rights 37-00026, 37-00027 and 37-20945 as follows:

a. 37-00026: 2.765 cubic feet per second (cfs) of the irrigation component of the IDWR water right number 37-00026, and 0.307 cfs of the mitigation component of the same right, for a total quantity of 3.072 cfs;

b. 37-00027: 1.190 cubic feet per second (cfs) of the irrigation component of the IDWR water right number 37-00027, and 0.132 cfs of the mitigation component of the same right, for a total quantity of 1.322 cfs;

c. 37-20945: Seventy percent (70%) interest in 37-20945 or 1.05 cfs; and/or

d. Seventy percent (70%) interest in shares held by the Association for the acres described as a place of use for 37-00026, 37-00027 and 37-20945.

3. The parties stipulate and agree that Matthew Thornton owns approximately thirty percent (30%) interest in water rights 37-00026, 37-00027 and 37-20945 as follows:

a. 37-00026: 1.185 cubic feet per second (cfs) of the irrigation component of the IDWR water right number 37-00026, and 0.132 cfs of the mitigation component of the same right, for a total quantity of 1.317 cfs;

b. 37-00027: 0.510 cubic feet per second (cfs) of the irrigation component of the IDWR water right number 37-00027, and 0.057 cfs of the mitigation component of the same right, for a total quantity of 0.567 cfs; and

c. 37-20945: Thirty percent (30%) interest in 37-20945 or 0.45 cfs; and/or

d. Thirty percent (30%) interest in shares held by the Association for the acres described as a place of use for 37-00026, 37-00027 and 37-20945.

4. The parties stipulate and agree that WRLT, as owner of the land described as a place of use for water right numbers 37-00026, 37-00027 and 37-20945 shall not be liable for assessments by the Association for shares that may be appurtenant to the aforementioned land.

5. The parties stipulate and agree that severance of a portion of the appurtenant water rights or shares from the place of use described in 37-00026, 37-00027 and 37-20945 shall not allow Percentage Water Owners to resume use of their water interests/shares on the place of use no longer owned by them. Furthermore, the parties stipulate and agree that a place of use which Percentage Water Owners own shall have to be established by administrative transfer with the IDWR pursuant to Idaho Code §42-222, if and when their interests are ever removed from the Water Supply Bank. Therefore, the parties stipulate and agree that the following condition shall be imposed on water right numbers 37-00026, 37-00027 and 37-20945:

This water right is currently not being used at the described place of use, but is in the Idaho Water Resource Board's water supply bank pursuant to Idaho Code §42-1761, *et seq.* No resumption of use shall be allowed at the place of use described under this right for portions of this water right owned by persons who do not own the land described by the place of use for this water right. If this water right, or portion thereof, is removed from the water supply bank, then non-land owner water interest holders shall have to establish a place of use via an administrative transfer proceeding pursuant to Idaho Code §42-222. A title holder to any portion of this water right, for which the water title holder does not own the land described by the place of use, agrees that denial of permission by the land owner at the place of use to use water on the land owner's property shall not be construed to be a taking, in whole or part, of the water right. Should the owners of the water rights seek to transfer all or part of any of the appurtenant water rights from

the land, the owner of the property shall cooperate and give permission for the transfer, should that permission be required from the State of Idaho, or its agencies. Furthermore the owners of the land shall not object to the owners of the water rights reapplying to the State of Idaho to keep their water rights in the State Water Bank.

6. Should Sligar and/or Thornton ever seek to transfer all or part of any of the appurtenant water rights from the land, the owner of the property shall cooperate and give permission for the transfer, should that permission be required from the State of Idaho, or its agencies. Furthermore, should Sligar and/or Thornton ever be required to reapply to the State of Idaho to keep their water rights in the State Water Bank, the owners of the land shall give their permission, should that permission ever be required from the State of Idaho, or its agencies.

7. This Agreement shall run with the land and shall be binding upon and inure to the benefit of the heirs, personal representatives, administrators, successors and assigns of the parties hereto.

8. This Agreement may be recorded by any of the parties.

Please let me know if you have any comments or concerns with the attached leases. The BLM water rights are splits from 37-26 & 37-27. BLM submitted their lease applications with the filing fee separate of the others. Fritz Haemmerle submitted the other lease applications from Sligard-Shakstad/Thornton and David McDonald and Rain McDonald with one fee. They were given the opportunity to separate the water rights on individual contracts, but no word or additional filing fee was received.

Water Rights 37-26 & 37-27 are the parents of the other rights and have been in the Bank since before they were decreed.

Thank you.

13 Narrative: These applications were received on September 23, 2021. These rights were split from 37-26 & 37-27. The parents of these rights have been in the Bank since 2003 and were decreed in 2008. There are no issues of forfeiture. Water rights 37-26, 37-27, 37-23128-23131 share the same POU as these rights and are limited, with rights 37-23348 & 37-23349 to 171 acres. Those water rights were conveyed without land and have been offered to the Bank. BLM is the current owner of the land. These rights will need to be rented with the lease contracts for water rights 37-26, 37-27, 37-23128-37-23131 due to the acre limit. These rights are currently within WD 37. The mitigation portion of these rights is water charged for river channel loss and are not subject to be leased.

Subject: Water Supply Bank Lease Applications for 37-26 & 37-27

First, let me apologize for the time it has taken to get these Water Supply Bank (WSB) Lease applications processed.

Earlier this year, questions arose about why the Department did not split off Bureau of Land Management (BLM's) portion of the water right when the Notice of Change in Water Right Ownership was processed in 2013. The assumption was because of the way the current owners were listed on the water rights, that instead of splitting off BLM's portion, they should be added to the water rights as a current owner with the amounts they were entitled to as a comment on the water rights. The ownership documents were sent to our legal staff, and it was concluded that we could split off BLM's portion to their owner water right numbers. Several things occurred, and the Water Supply Bank Lease applications were placed back in the queue for Bank processing.

I am working on splitting water rights 37-26 & 37-27 into two new water rights that will have the current owner of the BLM. When that is complete, the Department will need lease applications from the BLM to place their portion of the water rights in the Bank. There are a couple of options on how to proceed with the WSB Lease applications that were filed by Mr. Haemmerle and the BLM applications.

- Option 1- If the intent is everyone to have their own contract, the Department will need a filing fee from David McDonald and Rain McDonald and BLM of \$500 each.
- Option 2- If we proceed and place all the rights on the same contract, the \$500 filing fee that has been received is sufficient.

Please let me know how to proceed with the WSB applications.
