WATER SUPPLY BANK LEASE CONTRACT No. 1455

5. While a water right is in the bank, forfeiture provisions are stayed pursuant to Idaho Code § 42-223(5).
6. Rental of water under this right is subject to the limitations and conditions of approval of the water right.
7. Failure of the right holder to comply with the conditions of acceptance is cause for the Director to rescind acceptance of the lease.
8. Acceptance of a right into the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other Department application process.
9. In accordance with Idaho Code § 42-248 and § 42-1409(6), all owners of water rights are required to notify the Department of any changes in mailing address or change in ownership of all or part of a water right. Notice must be provided within 120 days of the change.
10. If a water right leased into the Water Supply Bank is sold or conveyed during the lease term, and if the leased right was rented, the rental proceeds will be disbursed in the following manner regardless of any arrangements between the buyer(s) and seller(s) to the contrary:
 - a. Rental payments will go to the lessor(s) of record at the beginning of the rental season, even if the Department processes a Notice of Change in Water Right Ownership during the rental season.
 - b. New lessor(s) of record will receive payment for any subsequent rental seasons.
11. The water right(s) is leased to the bank subject to all prior water rights and shall be administered in accordance with Idaho law and applicable rules of the Department of Water Resources.
12. A portion of this right provides conveyance for other right holders in the shared delivery of water through the Irrigation District #45 canal. To prevent injury to other water right holders, the watermaster shall deliver 20% or 0.065 cfs of the leased portion of this right into the Irrigation District #45 Canal whether it is rented or not.
13. Use of water under this right may be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 37.

Narrative: The Department received these applications of 9-01-2021 for the 2022 season. These rights were decreed in 2010 and were accepted into the Wood River Basin Enhancement Water Supply Bank for the 2012 season. These rights have been in the Department's WSB since 2017. There are no issues with forfeiture. The current POU for these rights are the roadways, easements and other non-irrigated areas of Bellevue Subdivision owned and/or maintained by the application. These rights are delivered through the Wood River Irrigation District 45 canal. Consent was provided with a 20% holdback in the system. There are several private rights in this subdivision but none overlap these rights. These rights are currently within WD 37.
