STATE OF IDAHO
DEPARTMENT OF WATER RESOURCESTransfer No. 85636

DEC 17 2021

WATER RESOURCES
WESTERN REGIONMINIMUM REQUIREMENTS CHECKLIST
TO BE SUBMITTED WITH APPLICATION FOR TRANSFER

An application for transfer must be prepared in accordance with the minimum requirements listed below to be acceptable for processing by the Department. Incomplete applications will be returned. The instructions, fee schedule, Part 2A reports and additional Part 2B forms are available from any Department office or on the Department's website at idwr.idaho.gov.

Name of Applicant(s) Nampa & Meridian Irrigation District**Check whether each item below is *attached* (Yes) or *not applicable* (N/A) for the proposed transfer.****Yes N/A** * Means the item is always required and must be included with the application.

- ☒ * Completed Application for Transfer of Water Right form, Part 1.
- ☒ * Signature of applicant(s) or applicant's authorized representative on Application for Transfer Part 1. Include evidence of authority labeled Attachment #3 (see below) if signed by representative.
- ☒ * Application for Transfer Part 2A. Attach a [Part 2A](#) report describing each water right in the transfer as currently recorded.
- ☐ ☒ Complete and attach an Application for Transfer [Part 2B](#) for each water right for which only a portion is proposed to be changed through this transfer application.
- ☒ * Application for Transfer Part 3A is always required (see Attachment #7a below); Parts 3B and 3C must be completed for transfer applications proposing to change the nature of use of the water right(s) or proposing changes to supplemental right(s).
- ☒ * Correct fee submitted with transfer application form. ([Fee schedule](#) is on website and instructions for application for transfer.)

Attachments to Application - Label each attachment with the corresponding number shown below as Attachment #1-10.

- ☐ ☒ #1 If the applicant is a business, partnership, organization, or association, and not currently registered in the State of Idaho as a business entity, attach documentation identifying officers authorized to sign or act on behalf of right holder. (See Part 1.)
- ☐ ☒ #2a Water Right ownership documentation if Dept. records do not show the applicant as the current water right owner. **
- ☐ ☒ #2b If the ownership of the water right will change as a result of the proposed transfer to a new place of use, attach documentation showing land and water right ownership at the new place of use. Include documentation for all affected land and owner(s).**
** Additional fee(s) required for water right ownership changes; see fee schedule.
- ☐ ☒ #3 Documentation of authority to make the change if the applicant is not the water right owner.
- ☐ ☒ #4 Power of Attorney or documentation providing authority to sign or act on the applicant's behalf. (See Part 1.)
- ☐ ☒ #5 If the transfer application proposes to change the point of diversion for a water right affecting the Eastern Snake Plain Aquifer (ESPA), attach the results of an ESPA analysis and a detailed mitigation plan to offset any depletions to hydraulically connected reaches of the Snake River. ESPA transfer spreadsheet and model grid labeled cells are available on the Department's website at idwr.idaho.gov/water-rights/transfers/resources.html.
- ☐ ☒ #6 Notarized statement of agreement or a statement on official letterhead signed by an authorized representative from each lien holder or other entity with financial interest in the water right(s) or land affected by the proposed transfer. (See Part 1.5.c.)
- ☒ * #7a Attach a map identifying the proposed point(s) of diversion, place(s) of use, and water diversion and distribution system details as described on the application. Include legal description labels. If only a portion of the right is proposed to be changed, identify the current location of the part of the existing right(s) proposed to be changed. (See Part 3A.)
- ☒ ☐ #7b If the transfer application proposes to change the place or purpose of use of an irrigation right attach a Geographic Information System ([GIS](#)) shape file, or an aerial photo or other image clearly delineating the location and extent of existing acres and changes to the place of use. If some or all of any right is leased to the Water Supply Bank, you must also show the the specific location and/or acres to be idled at the new, proposed place of use to satisfy lease requirements.
- ☐ ☒ #8a If the transfer application proposes to change the nature of use or period of use for one or more rights, provide documentation describing the extent of historic beneficial use for the water rights proposed to be transferred and document how enlargement will be avoided. (See Part 3B.) Additional fee required for proposed changes to nature of use; see [fee schedule](#).
- ☐ ☒ #8b If the transfer application proposes to change the place of use of a supplemental irrigation right, provide documentation regarding the historic use of the supplemental right(s) and availability or reliability of the primary right(s) being supplemented, both before and after the proposed change. (See Part 3C.)
- ☐ ☒ #9 Water Supply Bank information for all rights proposed for transfer and currently leased to the Bank. ([Attachment WSB](#))
- ☒ ☐ #10 Other. Please describe: NMID Annexation Agreement with Danskin Cattle, LLC (Attachment 10) and Part 1.4.B.f (Attachment 11)

APPLICATION FOR TRANSFER OF WATER RIGHT

PART 1 Continued

B. DESCRIPTION OF RIGHTS AFTER THE REQUESTED CHANGES. IF THE RIGHTS ARE BEING SPLIT, DESCRIBE PORTIONS TO BE CHANGED AS THEY WOULD APPEAR AFTER THE REQUESTED CHANGES.

1.	Right Number	Amount (cfs/ac-ft)	Nature of Use	Period of Use	Rock Cr. trib to SF Boise R. (proposer Source & Tributary)	
					Boise R. trib. to Snake R.	Mores Cr. trib. to Snake R.
☒ ☐	63-198AJ	0.4 cfs	Irrigation	3/15 to 11/15		
☒ ☐	63-199B	169.6 cfs	Irrigation	3/1 to 11/15		same as above
☐ ☐		1.6 cfs	Industrial	3/15 to 11/15		
☐ ☐		5.11 cfs	Groundwater Recharge	3/1 to 11/15		
☒ ☐	63-200B	361.94 cfs	Irrigation	3/15 to 11/15		same as above
☐ ☐		3.4 cfs	Industrial	3/15 to 11/15		
☐ ☐		10.89 cfs	Groundwater Recharge	3/15 to 11/15		
☒ ☐	63-30181	0.2 cfs	Irrigation	3/15 to 11/15		same as above
☐ ☐				to		

Total authorized under rights 532.14 cfs and/or _____ acre-feet.

2. Total amount of water proposed to be transferred or changed 1.55 cubic feet per second and/or _____ acre-feet per year.

3. Point(s) of Diversion:

- ☐ No changes to point(s) of diversion are proposed - the following chart is therefore not completed. (Proceed to #4.)
- ☐ Attach Eastern Snake Plain Aquifer analysis if this transfer proposes to change a point of diversion affecting the ESPA. Label it **Attachment #5**.

New ?	Lot	¼	¼	¼	Sec	Twp	Rge	County	Source	Local name or tag #
Y			NE	NW	14	1N	7E	Elmore	Rock Creek	
N	8		NW	NE	4	2N	3E	Ada	Boise River	
N	6		NW	SW	29	3N	3E	Ada	Boise River	
N			SW	NE	35	5N	4E	Boise	Mores Creek	

4. Place of use: (If irrigation, identify with number of acres irrigated per ¼ ¼ tract.)

- ☐ No changes to place of use are proposed - the following chart is therefore not completed. (Proceed to #5.)

Twp	Rge	Sec	NE ¼				NW ¼				SW ¼				SE ¼				Acre Totals
			NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	
												L4	L8	L7					71.55
1N	7E	10										18.25	39.9	13.4					
				L1	L4		L2												
1N	7E	15		37	13.3		32.9												83.2

Total Acres (for irrigation use) *69,649.75

*Proposed place of use includes the current 69,495-acre service area plus an additional 154.75 acres described above.

Above acres reflect actual size of each proposed government lot per the Public Land Survey GIS shape file.

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES

APPLICATION FOR TRANSFER OF WATER RIGHT PART 1 Continued

5. General Information:

- a. Describe the complete diversion system, including how you will accommodate a measuring device and lockable controlling works should they be required now or in the future:
No changes to the existing diversion system are proposed. Measuring devices and lockable controlling works will be accommodated per items 3, 4 and 10 of the Annexation Agreement included as Attachment 10.
- b. Who owns the property at the point(s) of diversion? Danskin Cattle, LLC
 If other than the applicant, describe the arrangement enabling the applicant to access the property for the diversion system:
See item 17 of the Annexation Agreement included as Attachment 10.
- c. Are the lands from which you propose to transfer the water right subject to any liens, deeds of trust, mortgages, or contracts?
 If yes, ☐ attach a notarized statement from the holder of the lien, deed of trust, mortgage or contract agreeing to the proposed changes on official letterhead signed by an authorized representative. Label it **Attachment #6**. List the name of the entity and type of lien: _____

 It is the applicant's responsibility to provide notice to lien holder, trustee, mortgagor, or contract holder of the proposed changes that may impact or change the value of the water rights or affected real property. Any misrepresentation of legal encumbrance on this application may result in rejection of the application or cancellation of an approval.
- d. Are any of the water rights proposed for transfer currently leased to the Water Supply Bank?
 If yes, ☐ complete Attachment WSB.
- e. Describe the effect on the land now irrigated if the place or purpose of use is changed pursuant to this transfer:
Water rights proposed for transfer are from lands no longer irrigated with NMID water supplies. These water rights have been made available for transfer through exclusion of said lands from the irrigation district. See Section 2 of the enclosed annexation agreement.
- f. Describe the use of any other water right(s) for the same purpose or land, or the same diversion system as right(s) proposed to be transferred at both the existing and proposed point(s) of diversion and place(s) use:
See explanation (Attachment 11).
- g. To your knowledge, has/is any portion of the water right(s) proposed to be changed:
Yes No
☐ ☒ undergone a period of five or more consecutive years of non-use,
☐ ☒ currently leased to the Water Supply Bank,
☐ ☒ currently used in a mitigation plan limiting the use of water under the right, or
☐ ☒ currently enrolled in a Federal set-aside program limiting the use of water under the rights?

If yes, describe:

Exhibit F
Petition for Annexation of Lands

PETITION FOR ANNEXATION OF LANDS

TO THE BOARD OF DIRECTORS OF NAMPA & MERIDIAN IRRIGATION DISTRICT:

The petition of Danskin Cattle, L.L.C. respectfully represents:

That your petitioner owns the lands situated in Elmore, County, Idaho, described as follows:

Township 1 North, Range 7 East, Boise Meridian

- Section 10
 - Government Lot 4, 18.25 acres
 - Government Lot 7, 13.40 acres
 - Government Lot 8, 39.90 acres
- Section 15
 - Government Lot 1, 37.00 acres
 - Government Lot 2, 32.90 acres
 - Government Lot 4, 13.30 acres

Totaling 154.75 acres, more or less.

Your petitioner desires that said lands, together with the other lands, if any, hereinafter described, be annexed to and be included within the boundaries of said District, and made liable for the payment of the assessments of the lands of said District the same as other lands within the said District. The other lands which petitioner desires to be annexed to said District and which are within the same body of lands as those owned by the petitioner and hereinbefore described, are situated in _____ County, Idaho, and described as follows: NONE

That irrigation water may be delivered to petitioner by way of an existing diversion and pipeline from Rock Creek, said point of diversion being located in the northeast quarter of the northwest quarter of Section 14, Township 1 North, Range 7 East, Boise Meridian.

That the said lands owned by your petitioner constitute one-half (1/2) or more of the body of lands last hereinbefore described.

WHEREFORE, the undersigned petitions that said described lands be annexed to and be included within the boundaries of Nampa & Meridian Irrigation District.

PETITIONER:

DANSKIN CATTLE, L.L.C.,
an Idaho limited liability company

Robert Baker, Manager

STATE OF IDAHO)
)ss.
County of Ada)

On this 30th day of November, 2021, before me
Deborah L. Long, personally appeared Robert Baker, known or
identified to me (or proved to me on the oath of _____), to be
the manager of the limited liability company of Danskin Cattle, L.L.C., that such entity is
the petitioner named in the within and foregoing Petition for Annexation of Land, that he
has read the within and foregoing Petition for Annexation of Land, knows the contents
thereof and believes the facts therein stated to be true.

SUBSCRIBED AND SWORN to before me this 30th day of November, 2021.

Notary Public for the State of Idaho
Residing at Boise, Idaho
By Commission Expires: 10/10/2025

Attachment 11

Part 1.B.5.f. Describe the use of any other water right(s) for the same purpose or land, or the same diversion system as right(s) proposed to be transferred at both the existing and proposed point(s) of diversion and place(s) use:

There are currently four water rights associated with the proposed point of diversion (63-115, 63-31290A, 63-31290B, 63-31296), two of which are associated with the proposed place of use (63-115, 63-31290A). After annexation and transfer approval, the place of use will be irrigated with the NMID rights identified in Part 1.B.1. Associated portions of 63-115 and 63-31290A will be conveyed to NMID for use within the proposed place of use or within the entire place of use of NMID upon the completion of an approved transfer. See Section 16 of the enclosed annexation agreement. 63-19756 is also associated with the place of use but is a sub-irrigation spring right and is therefore not part of the annexation or transfer.

Subject: Application for Transfer - NMID

Dear Scott,

Enclosed on behalf Nampa and Meridian Irrigation District (NMID) is an *Application for Transfer* proposing an expansion to their service area boundary and adding a point of diversion at Rock Creek, a tributary to the South Fork Boise River.

Check No. 16303 for \$580 is enclosed for the filing fee. This amount was calculated based on Section IV, Part D of Transfer Processing Memo No. 23 as follows:

NMID combined water right irrigation flow rate: 532.14 cfs and 69,495 acres

Additional area to include: 154.75 acres

Fee amount: $154.75 \text{ acres} / 69,495 \text{ acres} \times 532.14 \text{ cfs} = 1.18 \text{ cfs} = \580

Similarly, the annexation agreement contemplates a maximum diversion rate of 1.55 cfs from the new point of diversion (Section IV, Part E Memo No. 23). The fee for a 1.55 cfs diversion rate is also \$580.

The signature page on the enclosed application has been scanned. The original ink signature page will be mailed to your office from Sawtooth Law next week. Thank you for your consideration and assistance in this matter. Please call me if you have any questions.

Sincerely,

Terry M. Scanlan, P.E., P.G.

Conditions of Approval:

1. Prior to March 1 of each year the right holder shall report to the department the number and location of acres to be irrigated by right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion and shall also report the maximum rate of flow to be diverted for industrial and ground water recharge purposes at the Surprise Valley diversion. Use of water under those rights each year shall not exceed the reported amounts.
2. R05 Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 63.
3. This right when combined with Right Nos. 63-199B, 63-200B, 63-2392B, 63-2968, 63-30181 and 63-32695 can be used to irrigate up to 69,495 acres within the boundary of the Nampa Meridian Irrigation District.
4. The Right holder shall be responsible for measuring and recording the rate of flow diverted from the Green Ranch diversion on a weekly basis during the authorized irrigation season and shall provide the diversion records upon request to the watermaster or the department.
5. Prior to diversion of water under transfer approval 5273 and 69594, the right holder shall provide a means of measurement and lockable controlling works from all authorized points of diversion that is acceptable to the watermaster and will provide suitable control of the diversions.
6. The number of acres available for irrigation under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion each year shall be reduced from a maximum of 1300 by at least the number resulting from the total rate of flow to be diverted for industrial and ground water recharge purposes divided by 0.02 cfs/acre.
7. When the authorized diversion of water under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B is reduced at the Ridenbaugh Canal, excluding reductions for canal maintenance, the diversion of water under those rights at the Surprise Valley diversion and the Green Ranch diversion must also be reduced by an equivalent proportion.
8. 155 This right shall receive 100 percent of its decreed quantity until the natural flow of the waters of the Boise River shall decrease so that all rights containing this condition cannot receive 100 percent of their decreed quantities, at which time this right and the other rights containing this condition shall first be cut to 75 percent of their decreed quantities, as the natural flow of the river decreases, beginning with the latest rights containing this condition and proceeding to the earliest rights containing this condition in the order of their priority dates, and after all of the rights containing this condition shall have been reduced to 75 percent of their decreed quantities, should the natural flow of the waters of the river decrease below the amount necessary to supply 75 percent of those decreed quantities, then this right and the other rights containing this condition, beginning with the latest and proceeding to the earliest, shall be reduced to 60 percent of their decreed quantities.
9. K06 This right is limited to the irrigation of 40 acres within the authorized place of use.
10. T19 Pursuant to Idaho Code § 42-1412(6), this water right is subject to such general provisions necessary for the definition of the rights or for the efficient administration of water rights as determined by the Snake River Basin Adjudication court in the final unified decree entered 08/26/2014.
11. The rate of flow diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B at the Green Ranch Diversion shall not exceed a combined total of 0.72 cfs.

12. SD1 This right originated as all or part of right no. 65 in the Stewart Decree and the historic Boise River Water Masters records.
13. Water shall not be diverted under this right at the Green Ranch diversion if such diversion would cause injury to rights senior in priority to November 20, 2001 that are authorized to divert from Mores Creek and its tributaries.
14. S45 Diversion for irrigation under this water right prior to April 1 and after October 31 shall occur only as authorized by the Water District 63 Water Master and only when water is being released for flood control by the United States from the Lucky Peak Dam outlet under procedures and requirements for the Memorandum of Agreement between the U.S. Department of the Army and the U.S. Department of the Interior for Flood Control Operations of the Boise River Reservoirs, dated November 20, 1953, the Water Control Manual for Boise River Reservoirs dated April 1985 and any future amendments or revisions made thereto pursuant to state or federal procedures or law; provided that any such use of this water right prior to April 1 and after October 31 shall be subordinated to water rights for storage in Lucky Peak Reservoir, Lake Lowell, Arrowrock Reservoir, and/or Anderson Ranch Reservoir, as decreed in SRBA Case No. 39576.
15. The rate of flow diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B at the Surprise Valley Diversion shall not exceed a combined total of 26.0 cfs.
16. 135 The boundary encompassing the place of use for this water right is described with a digital boundary as defined by I.C. Section 42-202B(2) and authorized pursuant to I.C. Section 42-1411(2)(h). The data comprising the digital boundary are incorporated herein by reference and are stored on a CD-ROM disk issued in duplicate originals on file with the SRBA District Court and the Idaho Department of Water Resources. A map depicting the place of use is attached hereto to illustrate the place of use described by the digital boundary.
17. The amount of water diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Green Ranch diversion for irrigation purposes shall be calculated at a diversion rate of 0.0156 cfs per acre to be irrigated, and when combined with any other rights those rights shall provide no more than 0.02 cfs per acre nor more volume than can be beneficially used for irrigation purposes. This condition shall not be construed as a requirement for the right holder to regulate water on a volumetric basis.
18. 127 Place of use is within the boundary of Nampa & Meridian Irrigation District pursuant to Section 43-323, Idaho Code.
19. The amount of water diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion for irrigation purposes shall be calculated at a diversion rate of 0.02 cfs per acre to be irrigated, and when combined with any other rights those rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation purposes. This condition shall not be construed as a requirement for the right holder to regulate water on a volumetric basis.

Place of Use: INDUSTRIAL same as IRRIGATION

Place of Use: GROUND WATER RECHARGE same as IRRIGATION

Conditions of Approval:

1. S45 Diversion for irrigation under this water right prior to April 1 and after October 31 shall occur only as authorized by the Water District 63 Water Master and only when water is being released for flood control by the United States from the Lucky Peak Dam outlet under procedures and requirements for the Memorandum of Agreement between the U.S. Department of the Army and the U.S. Department of the Interior for Flood Control Operations of the Boise River Reservoirs, dated November 20, 1953, the Water Control Manual for Boise River Reservoirs dated April 1985 and any future amendments or revisions made thereto pursuant to state or federal procedures or law; provided that any such use of this water right prior to April 1 and after October 31 shall be subordinated to water rights for storage in Lucky Peak Reservoir, Lake Lowell, Arrowrock Reservoir, and/or Anderson Ranch Reservoir, as decreed in SRBA Case No. 39576.
2. Prior to March 1 of each year the right holder shall report to the department the number and location of acres to be irrigated by right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion and shall also report the maximum rate of flow to be diverted for industrial and ground water recharge purposes at the Surprise Valley diversion. Use of water under those rights each year shall not exceed the reported amounts.
3. R05 Use of water under this right may be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 63.
4. 127 Place of use is within the boundary of Nampa & Meridian Irrigation District pursuant to Section 43-323, Idaho Code.
5. X61 The period of use for industrial use described in this approval may be extended to a beginning date of 3/1 provided that beneficial use of the water can be shown and other elements of the right are not exceeded. The use of water before 3/15 is subordinate to all water rights having no subordinated early or late use and a priority date earlier than the date of this approval.
6. 155 This right shall receive 100 percent of its decreed quantity until the natural flow of the waters of the Boise River shall decrease so that all rights containing this condition cannot receive 100 percent of their decreed quantities, at which time this right and the other rights containing this condition shall first be cut to 75 percent of their decreed quantities, as the natural flow of the river decreases, beginning with the latest rights containing this condition and proceeding to the earliest rights containing this condition in the order of their priority dates, and after all of the rights containing this condition shall have been reduced to 75 percent of their decreed quantities, should the natural flow of the waters of the river decrease below the amount necessary to supply 75 percent of those decreed quantities, then this right and the other rights containing this condition, beginning with the latest and proceeding to the earliest, shall be reduced to 60 percent of their decreed quantities.
7. When the authorized diversion of water under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B is reduced at the Ridenbaugh Canal, excluding reductions for canal maintenance, the diversion of water under those rights at the Surprise Valley diversion and the Green Ranch diversion must also be reduced by an equivalent proportion.

8. Each year the amount of water available for irrigation at the Surprise Valley diversion shall be reduced by the amount of water to be diverted for industrial and ground water recharge purposes under right nos. 63-199B and 63-200B.
9. The rate of flow diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B at the Green Ranch Diversion shall not exceed a combined total of 0.72 cfs.
10. This right when combined with Right Nos. 63-198AJ, 63-199B, 63-2392B, 63-2968, 63-30181 and 63-32695 can be used to irrigate up to 69,495 acres within the boundary of the Nampa Meridian Irrigation District.
11. 172 The boundary encompassing the place of use for this water right is described with a digital boundary as authorized by Idaho law. The data comprising the digital boundary are stored in the electronic document management system of the Department and are incorporated into this approval by this reference. A map depicting the place of use is attached to this approval document to illustrate the place of use described by the digital boundary.
12. The number of acres available for irrigation under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion each year shall be reduced from a maximum of 1300 by at least the number resulting from the total rate of flow to be diverted for industrial and ground water recharge purposes divided by 0.02 cfs/acre.
13. R43 The right holder shall maintain a measuring device and lockable controlling works of a type approved by the Department in a manner that will provide the watermaster suitable control of the diversion(s).
14. T08 Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
15. Diversion and use of water for industrial purposes under right nos. 63-199B and 63-200B shall not be more consumptive nor more depletive of water flowing in the Boise River than an equivalent diversion and use of water for irrigation purposes under those rights.
16. T19 Pursuant to Idaho Code § 42-1412(6), this water right is subject to such general provisions necessary for the definition of the rights or for the efficient administration of water rights as determined by the Snake River Basin Adjudication court in the final unified decree entered 08/26/2014.
17. Water shall not be diverted under this right at the Green Ranch diversion if such diversion would cause injury to rights senior in priority to November 20, 2001 that are authorized to divert from Mores Creek and tributaries.
18. The Right holder shall be responsible for measuring and recording the rate of flow diverted from the Green Ranch diversion on a weekly basis during the authorized irrigation season and shall provide the diversion records upon request to the watermaster or the department.
19. The annual volume of water used for industrial and ground water recharge purposes under right nos. 63-199B and 63-200B shall be measured using separate totalizing measuring devices and the right holder shall report the totals to the department by Dec. 31 of each year.
20. The rate of flow diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B at the Surprise Valley Diversion shall not exceed a combined total of 26.00 cfs.
21. SD1 This right originated as all or part of right no. 67 in the Stewart Decree and the historic Boise River Water Masters records.
22. T07 The right holder shall accomplish the change authorized by this transfer within one year of the date of this approval.
23. The place of use for industrial and ground water recharge purposes under right nos. 63-199B and 63-200B is limited to the lands served by the Surprise Valley diversion.
24. The amount of water diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion for irrigation purposes shall be calculated at a diversion rate of 0.02 cfs per acre to be irrigated, and when combined with any other rights those rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation purposes. This condition shall not be construed as a requirement for the right holder to regulate water on a volumetric basis.

Page _____ of _____

25.

The amount of water diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Green Ranch diversion for irrigation purposes shall be calculated at a diversion rate of 0.0156 cfs per acre to be irrigated, and when combined with any other rights those rights shall provide no more than 0.02 cfs per acre nor more volume than can be beneficially used for irrigation purposes. This condition shall not be construed as a requirement for the right holder to regulate water on a volumetric basis.

Decreed Date: 3/30/2011

**IDAHO DEPARTMENT OF WATER RESOURCES
APPLICATION FOR TRANSFER OF WATER RIGHT
PART 2A**

Current Water Right No.: 63-200b

Current Owner: NAMPA & MERIDIAN IRRIGATION DISTRICT
Priority Date: 8/20/1888
Origin: Water Right
Status: Active

Place of Use: INDUSTRIAL same as IRRIGATION

Place of Use: GROUND WATER RECHARGE same as IRRIGATION

Conditions of Approval:

1. The amount of water diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Green Ranch diversion for irrigation purposes shall be calculated at a diversion rate of 0.0156 cfs per acre to be irrigated, and when combined with any other rights those rights shall provide no more than 0.02 cfs per acre nor more volume than can be beneficially used for irrigation purposes. This condition shall not be construed as a requirement for the right holder to regulate water on a volumetric basis.
2. The rate of flow diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B at the Surprise Valley Diversion shall not exceed a combined total of 26.00 cfs.
3. This right when combined with Right Nos. 63-198AJ, 63-199B, 63-2392B, 63-2968, 63-30181 and 63-32695 can be used to irrigate up to 69,495 acres within the boundary of the Nampa Meridian Irrigation District.
4. Each year the amount of water available for irrigation at the Surprise Valley diversion shall be reduced by the amount of water to be diverted for industrial and ground water recharge purposes under right nos. 63-199B and 63-200B.
5. Diversion and use of water for industrial purposes under right nos. 63-199B and 63-200B shall not be more consumptive nor more depletive of water flowing in the Boise River than an equivalent diversion and use of water for irrigation purposes under those rights.
6. S45 Diversion for irrigation under this water right prior to April 1 and after October 31 shall occur only as authorized by the Water District 63 Water Master and only when water is being released for flood control by the United States from the Lucky Peak Dam outlet under procedures and requirements for the Memorandum of Agreement between the U.S. Department of the Army and the U.S. Department of the Interior for Flood Control Operations of the Boise River Reservoirs, dated November 20, 1953, the Water Control Manual for Boise River Reservoirs dated April 1985 and any future amendments or revisions made thereto pursuant to state or federal procedures or law; provided that any such use of this water right prior to April 1 and after October 31 shall be subordinated to water rights for storage in Lucky Peak Reservoir, Lake Lowell, Arrowrock Reservoir, and/or Anderson Ranch Reservoir, as decreed in SRBA Case No. 39576.
7. Water shall not be diverted under this right at the Green Ranch diversion if such diversion would cause injury to rights senior in priority to November 20, 2001 that are authorized to divert from Mores Creek and tributaries.
8. The annual volume of water used for industrial and ground water recharge purposes under right nos. 63-199B and 63-200B shall be measured using separate totalizing measuring devices and the right holder shall report the totals to the department by Dec. 31 of each year.
9. R05 Use of water under this right may be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 63.

10. When the authorized diversion of water under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B is reduced at the Ridenbaugh Canal, excluding reductions for canal maintenance, the diversion of water under those rights at the Surprise Valley diversion and the Green Ranch diversion must also be reduced by an equivalent proportion.
11. The rate of flow diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B at the Green Ranch Diversion shall not exceed a combined total of 0.72 cfs.
12. R43 The right holder shall maintain a measuring device and lockable controlling works of a type approved by the Department in a manner that will provide the watermaster suitable control of the diversion(s).
13. The place of use for industrial and ground water recharge purposes under right nos. 63-199B and 63-200B is limited to the lands served by the Surprise Valley diversion.
14. SD1 This right originated as all or part of right no. 106 in the Stewart Decree and the historic Boise River Water Masters records.
15. The amount of water diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion for irrigation purposes shall be calculated at a diversion rate of 0.02 cfs per acre to be irrigated, and when combined with any other rights those rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation purposes. This condition shall not be construed as a requirement for the right holder to regulate water on a volumetric basis.
16. 172 The boundary encompassing the place of use for this water right is described with a digital boundary as authorized by Idaho law. The data comprising the digital boundary are stored in the electronic document management system of the Department and are incorporated into this approval by this reference. A map depicting the place of use is attached to this approval document to illustrate the place of use described by the digital boundary.
17. T19 Pursuant to Idaho Code § 42-1412(6), this water right is subject to such general provisions necessary for the definition of the rights or for the efficient administration of water rights as determined by the Snake River Basin Adjudication court in the final unified decree entered 08/26/2014.
18. X61 The period of use for irrigation, industrial, and ground water recharge uses described in this approval may be extended to a beginning date of 3/1 provided that beneficial use of the water can be shown and other elements of the right are not exceeded. The use of water before 3/15 is subordinate to all water rights having no subordinated early or late use and a priority date earlier than the date of this approval.
19. 155 This right shall receive 100 percent of its decreed quantity until the natural flow of the waters of the Boise River shall decrease so that all rights containing this condition cannot receive 100 percent of their decreed quantities, at which time this right and the other rights containing this condition shall first be cut to 75 percent of their decreed quantities, as the natural flow of the river decreases, beginning with the latest rights containing this condition and proceeding to the earliest rights containing this condition in the order of their priority dates, and after all of the rights containing this condition shall have been reduced to 75 percent of their decreed quantities, should the natural flow of the waters of the river decrease below the amount necessary to supply 75 percent of those decreed quantities, then this right and the other rights containing this condition, beginning with the latest and proceeding to the earliest, shall be reduced to 60 percent of their decreed quantities.
20. T08 Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
21. The Right holder shall be responsible for measuring and recording the rate of flow diverted from the Green Ranch diversion on a weekly basis during the authorized irrigation season and shall provide the diversion records upon request to the watermaster or the department.
22. 127 Place of use is within the boundary of Nampa & Meridian Irrigation District pursuant to Section 43-323, Idaho Code.

Page _____ of _____

23. The number of acres available for irrigation under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion each year shall be reduced from a maximum of 1300 by at least the number resulting from the total rate of flow to be diverted for industrial and ground water recharge purposes divided by 0.02 cfs/acre.
24. T07 The right holder shall accomplish the change authorized by this transfer within one year of the date of this approval.
25. Prior to March 1 of each year the right holder shall report to the department the number and location of acres to be irrigated by right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion and shall also report the maximum rate of flow to be diverted for industrial and ground water recharge purposes at the Surprise Valley diversion. Use of water under those rights each year shall not exceed the reported amounts.

Conditions of Approval:

1. Prior to March 1 of each year the right holder shall report to the department the number and location of acres to be irrigated by right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion and shall also report the maximum rate of flow to be diverted for industrial and ground water recharge purposes at the Surprise Valley diversion. Use of water under those rights each year shall not exceed the reported amounts.
2. P32 This right is former right no. 63-120J.
3. This right when combined with Right Nos. 63-198AJ, 63-199B, 63-200B, 63-2392B, 63-2968 and 63-32695 can be used to irrigate up to 69,495 acres within the boundary of the Nampa Meridian Irrigation District.
4. The rate of flow diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B at the Green Ranch Diversion shall not exceed a combined total of 0.72 cfs.
5. The amount of water diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Green Ranch diversion for irrigation purposes shall be calculated at a diversion rate of 0.0156 cfs per acre to be irrigated, and when combined with any other rights those rights shall provide no more than 0.02 cfs per acre nor more volume than can be beneficially used for irrigation purposes. This condition shall not be construed as a requirement for the right holder to regulate water on a volumetric basis.
6. T19 Pursuant to Idaho Code § 42-1412(6), this water right is subject to such general provisions necessary for the definition of the rights or for the efficient administration of water rights as determined by the Snake River Basin Adjudication court in the final unified decree entered 08/26/2014.
7. 135 The boundary encompassing the place of use for this water right is described with a digital boundary as defined by I.C. Section 42-202B(2) and authorized pursuant to I.C. Section 42-1411(2)(h). The data comprising the digital boundary are incorporated herein by reference and are stored on a CD-ROM disk issued in duplicate originals on file with the SRBA District Court and the Idaho Department of Water Resources. A map depicting the place of use is attached hereto to illustrate the place of use described by the digital boundary.
8. SD1 This right originated as all or part of right no. 1 in the Stewart Decree and the historic Boise River Water Masters records.
9. The rate of flow diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B at the Surprise Valley Diversion shall not exceed a combined total of 26.0 cfs.
10. 127 Place of use is within the boundary of Nampa & Meridian Irrigation District pursuant to Section 43-323, Idaho Code.

11. 155 This right shall receive 100 percent of its decreed quantity until the natural flow of the waters of the Boise River shall decrease so that all rights containing this condition cannot receive 100 percent of their decreed quantities, at which time this right and the other rights containing this condition shall first be cut to 75 percent of their decreed quantities, as the natural flow of the river decreases, beginning with the latest rights containing this condition and proceeding to the earliest rights containing this condition in the order of their priority dates, and after all of the rights containing this condition shall have been reduced to 75 percent of their decreed quantities, should the natural flow of the waters of the river decrease below the amount necessary to supply 75 percent of those decreed quantities, then this right and the other rights containing this condition, beginning with the latest and proceeding to the earliest, shall be reduced to 60 percent of their decreed quantities.
12. Water shall not be diverted under this right at the Green Ranch diversion if such diversion would cause injury to rights senior in priority to November 20, 2001 that are authorized to divert from Mores Creek and tributaries.
13. The Right holder shall be responsible for measuring and recording the rate of flow diverted from the Green Ranch diversion on a weekly basis during the authorized irrigation season and shall provide the diversion records upon request to the watermaster or the department.
14. S45 Diversion for irrigation under this water right prior to April 1 and after October 31 shall occur only as authorized by the Water District 63 Water Master and only when water is being released for flood control by the United States from the Lucky Peak Dam outlet under procedures and requirements for the Memorandum of Agreement between the U.S. Department of the Army and the U.S. Department of the Interior for Flood Control Operations of the Boise River Reservoirs, dated November 20, 1953, the Water Control Manual for Boise River Reservoirs dated April 1985 and any future amendments or revisions made thereto pursuant to state or federal procedures or law; provided that any such use of this water right prior to April 1 and after October 31 shall be subordinated to water rights for storage in Lucky Peak Reservoir, Lake Lowell, Arrowrock Reservoir, and/or Anderson Ranch Reservoir, as decreed in SRBA Case No. 39576.
15. Prior to diversion of water under transfer approval 5273 and 69594, the right holder shall provide a means of measurement and lockable controlling works from all authorized points of diversion that is acceptable to the watermaster and will provide suitable control of the diversions.
16. The amount of water diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion for irrigation purposes shall be calculated at a diversion rate of 0.02 cfs per acre to be irrigated, and when combined with any other rights those rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation purposes. This condition shall not be construed as a requirement for the right holder to regulate water on a volumetric basis.
17. The number of acres available for irrigation under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion each year shall be reduced from a maximum of 1300 by at least the number resulting from the total rate of flow to be diverted for industrial and ground water recharge purposes divided by 0.02 cfs/acre.
18. R05 Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 63.
19. When the authorized diversion of water under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B is reduced at the Ridenbaugh Canal, excluding reductions for canal maintenance, the diversion of water under those rights at the Surprise Valley diversion and the Green Ranch diversion must also be reduced by an equivalent proportion.

Attachment 10
Annexation Agreement

AGREEMENT OF TERMS AND CONDITIONS FOR ANNEXATION

AGREEMENT OF TERMS AND CONDITIONS FOR ANNEXATION, made and entered into this 07 day of December, 2021, by and among NAMPA & MERIDIAN IRRIGATION DISTRICT, an irrigation district organized and existing under and by virtue of the laws of the State of Idaho, hereinafter referred to as the "NMID", and

DANSKIN CATTLE, L.L.C., an Idaho limited liability company,
Whose address is: c/o Robert C. Baker, 5789 W. Willowtree Ct., Nampa, Idaho 83687,
hereinafter referred to as "Danskin",

W I T N E S S E T H:

WHEREAS, Danskin owns approximately 1,100 acres of real property located in Elmore County, Idaho, generally known as the Danskin Cattle Ranch; and,

WHEREAS, Danskin filed the Petition for Annexation of Lands attached hereto as **Exhibit F** pursuant to Idaho Code Section 43-1001 with the board of directors of NMID requesting annexation of 155 acres, more or less, within the Danskin Cattle Ranch and which is legally described in **Exhibit A** attached hereto and by this reference incorporated herein (hereinafter, the "Annexed Lands"); and,

WHEREAS, the NMID and Danskin wish to establish terms and conditions for the proposed annexation of said lands to NMID,

NOW, THEREFORE, for and in consideration of the premises and of the covenants, agreements and conditions hereinafter set forth, the parties agree as follows:

1. **Description of proposed annexation and uses.** Upon completion of the statutory annexation process in Title 43, Chapter 10, Idaho Code, NMID's boundaries will be changed to add the Annexed Lands. Danskin seeks annexation to receive water from NMID for use in irrigation of the Annexed Lands. Water will be diverted from the existing diversion works from Rock Creek, which is tributary to the South Fork of the Boise River, and through the existing pipeline and irrigation system utilized by Danskin for irrigation purposes on the Annexed Lands (hereinafter referred to as the "Danskin diversion") under NMID's Ridenbaugh Canal natural flow water rights (hereinafter referred to as "Ridenbaugh Natural Flow Water Rights" which are more particularly described in the attached **Exhibit B**, attached hereto and by this reference made a part hereof) and a proportional amount of NMID's Ridenbaugh supplemental storage water rights (hereinafter referred to as "Storage Water Rights" which are more particularly set forth in **Exhibit C**, attached hereto and by this reference made a part hereof).

2. **Water Rights for Annexed Lands.** Water is available for the Annexed Lands as

a result of exclusions exceeding 155 acres of land from NMID pursuant to Title 43, Chapter 11 of the Idaho Code. The total quantity of water previously apportioned and delivered to the excluded lands under the Ridenbaugh Natural Flow Water Rights, and available for delivery to the Annexed Lands, is 1.55 cfs or 77.5 miner's inches (the District is apportioning .5 miner's inches per acre for the Annexed Lands). The total quantity of Storage Water Rights apportioned and available for delivery to the Annexed Lands is 161.2 Ridenbaugh acre feet of storage water, as further specified in Sections 5 and 6(c) hereto. Delivery and use of the Ridenbaugh Natural Flow Water Rights and the Ridenbaugh Storage Water Rights to the Annexed Lands shall be in accordance with the terms set forth below.

3. **Danskin Diversion.** Danskin shall not order and divert more water than can be put to beneficial use. Danskin will be responsible for compliance with all reporting requirements associated with its diversion and use of NMID water. Danskin shall designate a person to report to NMID's water superintendent the quantity of water which will be ordered at the beginning of the irrigation season, and thereafter to report on a weekly basis the measurements and/or flow meter data or readings to NMID. NMID will report the measurements and flow readings to the Watermaster for Water District 63 as necessary. NMID shall continue to have the right to divert through its diversion for the Ridenbaugh Canal any portion of the water rights which are apportioned to the Annexed Lands and is not ordered and diverted by Danskin to the Annexed Lands.

4. **Delivery and Measurement.** Danskin's diversion of water from NMID shall be from the Danskin diversion as defined in Section 1. As provided in paragraph 9 below, Danskin shall be responsible for the operation, maintenance and repair of the Danskin diversion and thus Danskin shall be responsible for any agreements, authorization or permission for the Danskin diversion, including, but not limited to any permits or rights-of-way from the United States Forest Service ("USFS") or any other government entity or private party to utilize the Danskin diversion. NMID and Danskin specifically acknowledge that the Danskin diversion and a portion of the pipeline is on the property of the USFS, that Danskin has a special use permit for the diversion works and irrigation system and it shall continue to be Danskin's responsibility and obligation to comply with said permit. Danskin shall indemnify, defend and hold harmless NMID from any claims, assertions or complaints related to or arising from the diversion, use, operation, maintenance or repair of the Danskin diversion or irrigation system. Notwithstanding and without waiving the foregoing, Danskin shall install and maintain a measurement device, flow meter or other device approved by NMID, which shall be available for NMID to inspect, regulate, measure and confirm the amount of water Ridenbaugh Natural Flow Rights and Storage Water Rights diverted by Danskin to the Annexed Lands pursuant to Section 17 hereto.

5. **Storage Water Use.** This Agreement apportions a portion of NMID's Ridenbaugh Storage Water Rights to the Annexed Lands and allows Danskin to supplement the Ridenbaugh Natural Flow Water Rights with NMID's Storage Water Rights when NMID's Ridenbaugh Natural Flow Water Rights are reduced by the Watermaster for Water District 63. Danskin shall have no right to order or call for the delivery of NMID's Storage Water Rights to the Danskin diversion or for delivery to the Annexed Lands when Storage Water Rights are not otherwise being diverted into the Ridenbaugh Canal. Instead, Danskin shall be allowed to supplement its deliveries of Ridenbaugh Natural Flow Water Rights with NMID's Storage Water Rights only when NMID

is calling for or ordering Storage Water Rights at the Ridenbaugh Canal. For example, if NMID is supplementing its Ridenbaugh Natural Flow Water Rights with its Storage Water Rights at the Ridenbaugh Canal then Danskin shall also be entitled to divert and use its proportional amount of NMID's Storage Water Rights at the Danskin diversion. Once NMID ceases diverting NMID's Storage Water Rights at the Ridenbaugh Canal then Danskin's right to divert NMID's Storage Water Rights shall also cease. Danskin shall be further responsible for allocating water use within the Danskin diversion to ensure that Danskin is diverting/receiving only its proportional share of NMID's Storage Water Rights when available and such water is not being diverted by or delivered to Annexed Lands which have not been apportioned any of NMID's Storage Water Rights, if any.

6. **Period of Diversion.** Diversion of water through the Danskin diversion by Danskin pursuant to the Ridenbaugh Natural Flow Water Rights shall begin no sooner during any irrigation season than NMID begins to divert water through its diversion for the Ridenbaugh Canal, and shall end no later than NMID ceases diverting water through its Ridenbaugh Canal diversion. Diversion of water by Danskin shall be as follows:

- a. Annually, and prior to any diversion of water through the Danskin diversion, Danskin shall contact NMID's water superintendent to determine when NMID intends to begin diverting water through the Ridenbaugh Canal. NMID's water superintendent shall then notify Danskin when NMID intends to begin diverting water through the Ridenbaugh Canal and confirm when Danskin may also begin diverting water through the Danskin diversion. Danskin may then begin diverting its proportionate amount of water through the Danskin diversion at the same time as NMID begins diverting water through the Ridenbaugh Canal and such right shall continue until NMID ceases diverting water through the Ridenbaugh Canal. In other words, Danskin's period of use and diversions shall be the same period or irrigation season as NMID diverts water through the Ridenbaugh Canal. As provided in paragraph 3 above, Danskin shall report to NMID's water superintendent on a weekly basis the measurements and/or flow meter data or readings for the Danskin diversion to NMID and NMID may report said information to the Watermaster for Water District No. 63;
- b. During the irrigation season for the Ridenbaugh Natural Flow Water Rights, the diversion through the Danskin diversion shall be reduced as directed by NMID's water superintendent and/or the Watermaster for Water District No. 63 in the same proportion that diversions are reduced by the Watermaster for Water District No. 63 through the Ridenbaugh Canal diversion in accordance with NMID's Ridenbaugh Natural Flow Water Rights (hereinafter referred to as "Diversion Allocation"). NMID shall notify Danskin of any diversion reductions as soon as practical, but in any event no later than twenty-four (24) hours from the time NMID receives notice of a Diversion Allocation; and
- c. Once NMID's water superintendent notifies Danskin of the Diversion Allocation, the water superintendent shall also notify Danskin of NMID's intent to call for or order NMID's Storage Water Rights at the Ridenbaugh Canal to supplement NMID's Ridenbaugh Natural Flow Water Rights. While NMID is calling for or

ordering NMID's Storage Water Rights then Danskin shall be entitled to divert and deliver its proportionate amount of NMID's Storage Water Rights at the Danskin diversion. NMID's water superintendent shall subsequently notify Danskin when NMID shall cease ordering NMID's Storage Water Rights at the Ridenbaugh Canal and Danskin's right to NMID's Storage Water Rights shall also cease. Any out of priority diversions by Danskin, except those authorized herein while NMID is ordering storage water, shall not result in an additional diminishment or reduction of NMID's Storage Water Rights and it shall be the obligation of Danskin to mitigate for any out of priority diversions.

7. **Existing Landowners Not Affected.** This annexation will not affect the apportionment of NMID's water rights or the delivery of water pursuant to such apportionment to the lands within NMID prior to annexation. Those lands will continue to receive the benefits previously apportioned when water is available. Danskin will be equally entitled to receive its 1.55 cfs portion of the Ridenbaugh Natural Flow Water Rights and its portion of the Storage Water Rights, consistent with I.C. § 43-1010 and this Agreement.

8. **Status of Annexed Lands.** Pursuant to I.C. § 43-1010, upon recording of the order changing NMID's boundaries pursuant to this annexation, the Annexed Lands shall be a part of NMID as though they had been included in the original organization of NMID and subject to the levies and assessments of NMID. Thereafter, all landowners within NMID, including the owners of the Annexed Lands, shall be entitled to the same consideration and treatment in the delivery of NMID's water so far as may be consistent with the terms and conditions of annexation, NMID's apportionment of benefits, and the priority of the Ridenbaugh Natural Flow Water Rights and the use and contract entitlements to the Storage Water Rights as recognized and protected by the Constitution of the State of Idaho.

9. **Ownership, Operation, and Maintenance of Facilities.** Danskin shall construct, install, own, operate, maintain, repair and in every respect be responsible for:

- a. all diversion works that are part of the Danskin diversion, including measurement devices,
- b. all delivery facilities from the Danskin diversion to the Annexed Lands,
- c. all facilities necessary for the drainage of surface water from the Annexed Lands, and
- e. all facilities necessary for the discharge of water used on or within the Annexed Lands.

NMID will not own, control, operate, maintain or have any rights in, or in any way be responsible for such facilities. Provided, however, NMID shall have the right to inspect, regulate, measure the Ridenbaugh Natural Flow Water Rights and Storage Water Rights delivered to the Annexed Lands pursuant to this Agreement.

10. **Diversion, Drainage, and Discharge.** Danskin shall be solely responsible for the diversion and delivery of water from the Danskin diversion to the Annexed Lands, groundwater recharge and surface drainage within the Annexed Lands, and the discharge of water used within the Annexed Lands. NMID will not control, use, operate, or maintain, or in any way be responsible for such diversion, delivery, drainage, and discharge. Danskin does not, by this annexation or any term or condition hereof, assume any responsibility, liability or authority for any portion of NMID's irrigation works or NMID's water diversion, use, drainage or discharge, except for the voting rights and assessment obligations of any other NMID landowner whose lands have been apportioned Ridenbaugh Natural Flow Water Rights and Storage Water Rights. Danskin further acknowledges that irrigation water is not always reliable. Irrigation water may not be available due to drought, harsh weather conditions, governmental actions or other causes, including, but not limited to operation and maintenance of the facilities described in paragraph nine (9) herein and/or the availability and flows in Rock Creek, and NMID shall have no liability under this Agreement for the lack of water for the reasons described above, over and above those that are otherwise established by Idaho law.

11. **Conditions Precedent to the Apportionment of Benefits.** NMID shall not apportion benefits to the Annexed Lands until and unless an Application for Transfer of Ridenbaugh Natural Flow Water Rights, if required, is approved by Idaho Department of Water Resources ("IDWR") with terms and conditions acceptable to NMID and Danskin, and all judicial and administrative appeals are exhausted (hereinafter referred to as "Final Approval").

12. **Exclusion of Annexed Lands.** If the Conditions Precedent in paragraph 11 are not satisfied, and NMID has not already annexed Danskin's lands, the Terms and Conditions of Annexation are terminated automatically. If the Conditions Precedent in paragraph 11 are not satisfied, and NMID has already annexed Danskin's lands, then Danskin shall file a written petition to exclude the lands described in Exhibit A from NMID. Danskin and NMID agree that, without Final Approval, the lands described in Exhibit A will not be benefitted by NMID's water rights or receive any other benefits from NMID. NMID shall grant Danskin's petition to exclude the lands described in Exhibit A because the lands are not susceptible of irrigation from NMID's water system. NMID agrees that there is no necessity to survey the land described in Exhibit A which will be the subject of the exclusion petition, and that the exclusion will not diminish NMID's existing O&M revenues. NMID agrees that Danskin will only pay the fees incurred under paragraph 19 and the actual cost of the exclusion process. The balance of any exclusion fee which may accompany the exclusion petition in excess of such costs shall be returned to Danskin.

13. **Annexation Fee.** Danskin shall make a one-time annexation fee payment to NMID of Four Hundred Dollars (\$400.00) at the time of the execution of this Agreement. This annexation fee is non-refundable and shall not be reimbursed to Danskin even if the Conditions Precedent are not met and/or this Agreement is subsequently terminated.

14. **Apportionment of Benefits.** Upon payment of the annexation fee, and Final Approval of the Conditions Precedent provided in paragraph 11, NMID shall proceed to apportion benefits to the Annexed Lands. The apportionment to lands annexed for irrigation use shall be equivalent to the apportionment to the lands which have been excluded from NMID and Danskin will be assessed as other landowners of NMID based upon apportionment of benefits provided

herein. There will be no apportionment of benefits for NMID's functions as a drainage district.

15. **Compliance with Law.** Danskin shall comply with the approved water right transfer and all federal, state, or other local laws, rules, regulations, and requirements regarding the diversion, delivery, use, drainage or discharge of NMID water. Danskin shall not suffer or permit the delivery of NMID water to any lands not identified in Exhibit A, and shall install and maintain such devices as may be required by NMID to monitor and ensure that such delivery does not occur.

16. **Existing Water Rights.** Danskin currently owns Water Right Nos. 63-115 and 63-31290A to divert water from Rock Creek via the existing Danskin diversion for irrigation of portions of the Danskin Cattle Ranch (hereinafter collectively referred to as the "Rock Creek Rights").¹ The Rock Creek rights are used to irrigate areas within the Annexed Lands and additional areas that are outside the Annexed Lands. Upon the apportionment of benefits by NMID to the Annexed Lands, Danskin shall convey the proportionate share of the Rock Creek Rights attributable to irrigation of the Annexed Lands by Water Right Deeds to NMID, retaining for its own ownership and use the proportionate share of the Rock Creek Rights used to irrigate areas outside of the Annexed Lands. After conveyance, NMID, in its sole discretion and subject to IDWR approval, may determine how to and whether to utilize its share of the Rock Creek Rights on the Annexed Lands or other lands, including, but not limited to, allowing Danskin to continue to utilize NMID's share of the Rock Creek Rights on the Annexed Lands, transferring its share of the Rock Creek Rights to other lands, NMID's Ridenbaugh Diversion, conveying or selling its share of the Rock Creek Rights, or placing its share of the Rock Creek Rights in the Idaho Water Supply Bank for lease. After IDWR approval of a transfer of the proportionate share of the Rock Creek Rights away from the Annexed Area, Danskin shall no longer utilize those portions of the Rock Creek Rights. The parties agree that the Water Right Deeds should allocate the Rock Creek Rights as reflected in **Exhibit E** hereto.

17. **Easement to Access the Danskin Diversion.** Danskin hereby grants, confirms and acknowledges an easement or right-of-way to NMID and its necessary personnel and staff, including vehicles, across the Danskin Cattle Ranch to access the Danskin diversion for the purpose of inspecting, regulating or measuring the Danskin diversion. Said easement shall endure for so long as the Annexed Lands are within NMID and shall automatically terminate upon an approved and recorded exclusion of the Annexed Lands from NMID. Said easement shall be located in the same location as the existing roadways or access on the Danskin Cattle Ranch which Danskin utilizes to access the Danskin diversion and pipe, generally depicted on **Exhibit D** hereto. To the extent either the diversion works or pipe are located on USFS property, the parties agree that NMID is akin to a contractor or business invitee of Danskin that would not normally require assignment of Danskin's Special Use Permit or other approvals from USFS. However, to the extent that further approvals are required from USFS in order for NMID to access the diversion works and pipe, the parties agree to cooperate on any necessary applications or communications with USFS. NMID agrees to provide reasonable advance notice to Danskin prior to accessing or inspecting the Danskin diversion and to the extent possible to coordinate a mutually agreeable time

¹ The Rock Creek Rights for purposes of this Agreement do not include water rights diverted from sources other than existing Rock Creek diversion, including, but not limited to, Water Right No. 63-19756.

and date with Danskin, so that Danskin may accompany NMID on the inspection as the holder of the Special Use Permit. Danskin shall remain responsible for maintenance of the easement area in order to preserve access to the Danskin diversion. However, NMID acknowledges and agrees that it has observed and evaluated the existing access to the Danskin diversion, and that said existing access to the Danskin diversion in its present condition is adequate for NMID's purposes. Further, NMID shall use reasonable care when accessing the Danskin diversion in order to avoid damage to any Danskin property, equipment, or infrastructure.

18. **Danskin Indemnification.** Danskin agrees to indemnify, defend and hold NMID harmless from all claims against NMID arising from: (1) the apportionment of benefits and/or delivery of NMID water to Danskin's land annexed into NMID; (2) the diversion, delivery, use, or discharge of NMID water by Danskin; (3) any environmental matters relating to the diversion, delivery, use or discharge of NMID water by Danskin; and (4) the ownership, operation, maintenance, and repair of facilities described in paragraph nine (9) herein.

19. **Costs and Fees.** Danskin agrees to pay all reasonable costs and attorney fees charged by NMID's attorney in connection with the preparation of this agreement, the annexation of Danskin's lands into NMID, and the review, filing, and obtaining final approval of the application to transfer the point of diversion and place of use of 1.55 cfs of the District's Ridenbaugh Natural Flow Water Rights. Danskin shall, at its own expense, prepare the initial draft of the transfer application for NMID's review. Billings by NMID's attorney shall be made directly to NMID, and then NMID shall submit those monthly billings to Danskin for reimbursement. All reasonable amounts billed shall be paid prior to the Apportionment of Benefits. If at any time prior to the apportionment of benefits to the Annexed Lands Danskin determines that the costs of the annexation process exceed its value to Danskin, Danskin may terminate this Agreement without penalty upon written notice of its desire to terminate this Agreement. Provided, however, Danskin shall remain responsible to pay any costs and attorney fees charged or incurred prior to Danskin providing written notice and for any costs or fees which are reasonably necessary to withdraw the application for transfer and/or complete the termination of this Agreement.

20. **Assignment.** Danskin shall have no right, power or authority to assign this Agreement or any privileges or obligations hereunder to any person or entity prior to the apportionment of benefits without prior written approval of NMID. After the apportionment of benefits, the Annexed Lands will be within NMID, and no approval is necessary or required for the benefits of this Agreement to accrue to subsequent owners of the Annexed Lands.

21. **Notice.** Any notice given under this Agreement is sufficient if delivered in writing, directed as follows:

TO NMID:
NAMPA & MERIDIAN IRRIGATION DISTRICT
1503 FIRST STREET SOUTH
NAMPA, ID 83651

Attention: Secretary/Treasurer

TO DANSKIN:
5789 W. Willowtree Ct.
NAMPA, IDAHO 83687

Attention: Robert C. Baker

22. **Covenants, Conditions and Agreements.** This Agreement shall be recorded in the records of Elmore County, Idaho and the covenants, conditions and agreements contained herein shall constitute covenants to run with, and running with, all of the lands identified in **Exhibit A** of this Agreement attached hereto, and shall be binding on each of the parties hereto and on all parties and all persons claiming under them or either of them, and the advantages hereof shall inure to the benefit of each of the parties hereto and their respective successors and assigns.

IN WITNESS WHEREOF, NMID has hereunto caused its corporate name to be subscribed by its officers first hereunto duly authorized by resolution of its Board of Directors and Danskin has caused its name to be subscribed, all as of the day and year herein first above written.

NAMPA & MERIDIAN IRRIGATION DISTRICT

RE: Transfer No. 85636
Water Right Nos. 63-198AJ, 63-199B, 63-200B, 63-30181

Dear Applicant:

The Department of Water Resources has received your water right transfer application. Please refer to the transfer number referenced above in all future correspondence regarding this transfer.

A legal notice of the application has been prepared and is scheduled for publication in the IDAHO STATESMAN, IDAHO WORLD, MOUNTAIN HOME NEWS on 2/17/2022 and 2/24/2022. Protests to this application may be submitted for a period ending ten (10) days after the second publication.

If the application is protested, you will be sent a copy of each protest. All protests must be resolved before the application can be considered for approval. If the protest(s) cannot be resolved voluntarily, the Department will conduct a conference and/or hearing on the matter.

If the application is not protested, the Department will process your application and notify you of any action taken on the application. If your application is approved, the Department will send you a copy of the approval document.

Please contact this office if you have any questions regarding the application.

Sincerely,

Denise Lauerman
Administrative Assistant

Good afternoon,

This will be my last Legal Notice email to you as I am moving on to a different position with the State of Idaho.
Please email any responses after 02.11.2022 to: westerninfo@idwr.idaho.gov

Please see the attached ad for publication on 02/16/2022 and 02/23/2022.

Please publish the enclosed legal notice on the dates indicated (once a week for two consecutive weekly issues). If you cannot publish the notice on the proposed dates, please contact us immediately.

An affidavit of publication must be submitted to the Department along with the publication bill. Please send the affidavit and bill to this office before 03/07/2022. Your cooperation is appreciated.

Please confirm this is okay to publish as shown and send confirmation and all other correspondence to this email.

Thanks much!
Denise

**NOTICE OF PROPOSED CHANGE OF WATER RIGHT
TRANSFER NO. 85636**

NAMPA & MERIDIAN IRRIGATION DISTRICT, C/O SAWTOOTH LAW OFFICES PLLC

ATTN BRYCE FARRIS

PO BOX 7985, BOISE, ID 83707 has filed Application No. 85636 for changes to the following water rights within ADA, **BOISE, ELMORE County(s): Right No(s). 63-198AJ, 63-199B, 63-200B, 63-30181**; to see a full description of these rights and the proposed transfer, please see <https://research.idwr.idaho.gov/apps/waterrights/querynewtransfers>. The purpose of the transfer is to change a portion of the above rights as follows:

This transfer proposes an expansion to the Nampa and Meridian Irrigation District service area boundary and adding a point of diversion approximately 5.5 miles southwest of Prairie, Idaho. The proposed place of use is 154.75 acres located in NWSW, SWSW, and SESW Section 10, T01N, R07E and NWNE, SWNE, and NENW Section 15, T01N, R07E. The transfer proposes diverting 1.55 cfs from the proposed point of diversion on Rock Creek, a tributary to the South Fork Boise River, and is located in NENW Section 14, T01N, R07E.

Permits will be subject to all prior water rights. For additional information concerning the property location, contact Western Region office at (208)334-2190; or for a full description of the right(s), please see

<https://idwr.idaho.gov/apps/ExtSearch/WRAApplicationResults/>. Protests may be submitted based on the criteria of Idaho Code Sec. § 42-203A and/or §42-222. Any protest against the approval or proposed change of the application must be filed with the Director, Department of Water Resources, Western Region, 2735 W AIRPORT WAY, BOISE ID 83705-5082 together with a protest fee of \$25.00 for each application on or before 3/7/2022. The protestant must also send a copy of the protest to the applicant.

WATER RESOURCES
WESTERN REGIONSTATE OF IDAHO
DEPARTMENT OF WATER RESOURCES

Transfer No. _____

MINIMUM REQUIREMENTS CHECKLIST
TO BE SUBMITTED WITH APPLICATION FOR TRANSFER

An application for transfer must be prepared in accordance with the minimum requirements listed below to be acceptable for processing by the Department. Incomplete applications will be returned. The instructions, fee schedule, Part 2A reports and additional Part 2B forms are available from any Department office or on the Department's website at idwr.idaho.gov.

Name of Applicant(s) Nampa & Meridian Irrigation District**Check whether each item below is attached (Yes) or not applicable (N/A) for the proposed transfer.****Yes N/A** * Means the item is always required and must be included with the application.

- ☒ * Completed Application for Transfer of Water Right form, Part 1.
- ☒ * Signature of applicant(s) or applicant's authorized representative on Application for Transfer Part 1. Include evidence of authority labeled Attachment #3 (see below) if signed by representative.
- ☒ * Application for Transfer Part 2A. Attach a Part 2A report describing each water right in the transfer as currently recorded.
- ☐ ☒ Complete and attach an Application for Transfer Part 2B for each water right for which only a portion is proposed to be changed through this transfer application.
- ☒ * Application for Transfer Part 3A is always required (see Attachment #7a below); Parts 3B and 3C must be completed for transfer applications proposing to change the nature of use of the water right(s) or proposing changes to supplemental right(s).
- ☒ * Correct fee submitted with transfer application form. (Fee schedule is on website and instructions for application for transfer.)

Attachments to Application - Label each attachment with the corresponding number shown below as Attachment #1-10.

- ☐ ☒ #1 If the applicant is a business, partnership, organization, or association, and not currently registered in the State of Idaho as a business entity, attach documentation identifying officers authorized to sign or act on behalf of right holder. (See Part 1.)
- ☐ ☒ #2a Water Right ownership documentation if Dept. records do not show the applicant as the current water right owner. **
- ☐ ☒ #2b If the ownership of the water right will change as a result of the proposed transfer to a new place of use, attach documentation showing land and water right ownership at the new place of use. Include documentation for all affected land and owner(s).**
** Additional fee(s) required for water right ownership changes; see fee schedule.
- ☐ ☒ #3 Documentation of authority to make the change if the applicant is not the water right owner.
- ☐ ☒ #4 Power of Attorney or documentation providing authority to sign or act on the applicant's behalf. (See Part 1.)
- ☐ ☒ #5 If the transfer application proposes to change the point of diversion for a water right affecting the Eastern Snake Plain Aquifer (ESPA), attach the results of an ESPA analysis and a detailed mitigation plan to offset any depletions to hydraulically connected reaches of the Snake River. ESPA transfer spreadsheet and model grid labeled cells are available on the Department's website at idwr.idaho.gov/water-rights/transfers/resources.html.
- ☐ ☒ #6 Notarized statement of agreement or a statement on official letterhead signed by an authorized representative from each lien holder or other entity with financial interest in the water right(s) or land affected by the proposed transfer. (See Part 1.5.c.)
- ☒ * #7a Attach a map identifying the proposed point(s) of diversion, place(s) of use, and water diversion and distribution system details as described on the application. Include legal description labels. If only a portion of the right is proposed to be changed, identify the current location of the part of the existing right(s) proposed to be changed. (See Part 3A.)
- ☒ ☐ #7b If the transfer application proposes to change the place or purpose of use of an irrigation right attach a Geographic Information System (GIS) shape file, or an aerial photo or other image clearly delineating the location and extent of existing acres and changes to the place of use. If some or all of any right is leased to the Water Supply Bank, you must also show the specific location and/or acres to be idled at the new, proposed place of use to satisfy lease requirements.
- ☐ ☒ #8a If the transfer application proposes to change the nature of use or period of use for one or more rights, provide documentation describing the extent of historic beneficial use for the water rights proposed to be transferred and document how enlargement will be avoided. (See Part 3B.) Additional fee required for proposed changes to nature of use; see fee schedule.
- ☐ ☒ #8b If the transfer application proposes to change the place of use of a supplemental irrigation right, provide documentation regarding the historic use of the supplemental right(s) and availability or reliability of the primary right(s) being supplemented, both before and after the proposed change. (See Part 3C.)
- ☐ ☒ #9 Water Supply Bank information for all rights proposed for transfer and currently leased to the Bank. (Attachment WSB)
- ☒ ☐ #10 Other. Please describe: NMID Annexation Agreement with Danskin Cattle, LLC (Attachment 10) and Part 1.4.B.f (Attachment 11)
