Narrative to Support Application

The Sunnyside Ranch Revocable Trust

Water rights 35-7720 and 1-7017 are currently appurtenant to 29.1 acres of the PT Elliot LLC property. Rights 35-7720 from ground water and 1-7017 from the Snake River were developed as fully overlapping at the described place of use. The ground water right 35-7720 is diverted from a well and a pond. Water right 1-7017 is diverted directly from the Snake River at the Tomchak B #1 pump, then conveyed through mainline for delivery into the sprinkler system.

Right 1-7017, having a junior priority date of 1978, is seldom available for diversion during the irrigation season. The ground water right 35-7720 has been used as a primary water right historically due to curtailment of 1-7017. It is proposed that the overlapping portion of 1-7017, in amounts described below, be abandoned upon approval of this transfer:

1-7017 for 2.0 acres and 0.03 cfs

1. Property Purchased. Seller hereby agrees to sell to Buyer, and Buyer agrees to buy from Seller, on the terms and conditions herein specified, the following-described portion of the Water Right:

Quantity (Volume):	8.0 acre-feet per annum
Place of Use (Acreage):	2.0 acres of the 29.1 authorized acres identified on Exhibit 2.

The above-described portion of the Water Right is referred to hereafter as the "Purchased Water Right."

2. Property Retained. Other than the Purchased Water Right, Seller reserves and retains unto Seller any other water rights that may be appurtenant to the authorized place of use for the Water Right. No land, easements, or other property interests, other than the Purchased Water Right, are included in this Agreement.
3. Purchase Price. The purchase price for the Purchased Water Right is [REDACTED] (Item 12a).
4. Earnest Money Deposit. Contemporaneous with the execution of this Agreement, Buyer shall deliver to Seller earnest money in the amount of [REDACTED] (the "Earnest Money"). The Earnest Money shall be applied towards the Purchase Price at closing, or otherwise disposed of as provided herein. A check for earnest money should be made to "Pioneer Title" who will hold said monies until closing.
5. Transfer Application. Within 30 days after both Parties sign this Agreement, Buyer will file with IDWR an *Application for Transfer of Water Right* (the "Transfer") to amend and move the Purchased Water Right to Buyer's desired location(s) for use in a pond and/or for small irrigation. The Parties will cooperate in obtaining IDWR approval of the Transfer and will provide and execute any necessary documents requested by IDWR. Buyer will be responsible for the costs to file the Transfer, including all attorney fees, consultant fees, and filing fees associated with preparation of the Transfer and/or defending against a protest to the Transfer. In the event this Agreement is terminated pursuant to paragraph 6 of this Agreement, Buyer shall at its sole expense take such action as may be required to void or reverse the Transfer in order to return the Purchased Water Right to the condition it existed on the Effective Date, upon completion of which the Earnest Money will be returned by Buyer within 14 days of such completion.
6. Transfer Contingencies.
 - (a) Unstacking of Water Rights. While Water Right No. 1-7017 is stacked with the Purchased Water Right and the historical use should allow IDWR to "unstack" these water rights, this Agreement shall be null and void and of no further effect if IDWR does not unstack the Purchased Water Right from Water Right No. 1-7017.

- (b) No Protests. If no protests or other objections to the Transfer are filed with IDWR, but the Transfer is (i) denied, (ii) approved by IDWR for less than 2.0 acres or the converted portion for the pond as proposed in the application, or (iii) approved by IDWR with conditions that materially devalue the Purchased Water Right for Buyer's intended use thereof; then Buyer may terminate this Agreement within 14 days after the date of the IDWR approval notice by providing written notice of termination to Seller. Within 14 days of receipt of the notice of termination, Seller shall refund the Earnest Money to Buyer. If Buyer does not terminate this Agreement as provided herein, the Parties shall proceed to Closing as set forth in paragraph 7.
- (c) Protest Filed. If a protest or other objection to the Transfer is filed with IDWR, then Buyer may terminate this Agreement within 180 days after the protest is filed with IDWR. If Buyer does elect to terminate this Agreement, Seller shall refund the Earnest Money to Buyer within 14 days of receipt of the notice of termination.
- (d) Option Agreement. If Seller is unable to obtain title to the Water Right through the exercise of Seller's option to purchase the Water Right because of a breach by the other party to the Option Agreement, Seller may elect to terminate this Agreement within 180 days of the breach. In such event, Closing on this Agreement shall be stayed for said 180 days pending resolution of the dispute over the Option Agreement or termination by Seller.

7. Closing.

- (a) Closing Date. If (1) the Water Right is unstacked as provided in paragraph 6(a); and (2) no protest to the Transfer is filed with IDWR; or (3) IDWR issues a transfer approval acceptable to Buyer without the conditions of paragraph 6(c) present, then Closing on the Purchased Water Right shall occur within 30 days after the date all the above items are satisfied. If a protest or other objection to the Transfer is filed with IDWR, or there is a dispute over the Option Agreement, and Buyer does not elect to terminate the Agreement as set forth in paragraph 6(d) of this Agreement, the Closing shall occur within 14 days after the 180-day termination period expires. Notwithstanding the above, the Parties may mutually agree to another date for the Closing.
- (b) Closing Location. The Closing shall occur at the offices of Pioneer Title Company, 1655 Elk Creek Drive Suite 100, Idaho Falls, ID 83404, or at another location mutually agreed by the Parties.
- (c) Documents to be Delivered at Closing.
 - (1) At Closing, Buyer shall deliver the Purchase Price less the Earnest Money plus brokerage fee [REDACTED]
 - (2) At Closing, Seller shall deliver to Buyer the Special Warranty Deed (the "Deed") substantially in the form attached to this Agreement as **Exhibit 3** for the Purchased Water Right, and any

All other expenses not specifically referenced in this Agreement but related to the Transfer and incurred by Seller or Buyer with respect to this transaction shall be borne and paid exclusively by the Party incurring the same, without reimbursement.
8. Default. In addition to either Party's failure to perform any material term or condition of this Agreement or a Party's breach of any of such Party's representations or warranties (in which event the non-defaulting party may pursue any available remedy, including equitable relief), Buyer shall be deemed in default hereof if Buyer files a petition in bankruptcy or is adjudicated bankrupt or insolvent, Buyer makes an assignment for the benefit of its creditors, or consents to the appointment of a receiver of itself or of its property, or institutes proceedings for its reorganization, in which case, in addition to any other remedies or rights Seller might have, Seller shall have the power and authority to notify the Department that the Application for Transfer has been withdrawn.
9. Seller's Representations and Warranties. Seller hereby represents and warrants to Buyer, as of the Effective Date and again as of the Closing as follows:

The undersigned Buyer has received, read and understand the Agency Disclosure Brochure (prepared by the Idaho Real Estate Commission). The undersigned Buyer understands that the brokerage involved in this transaction may be providing agency representation to both the Buyer and the Seller. The undersigned Buyer understands that, as an agent for both Buyer/client and Seller/client, a brokerage will be a limited dual agent of each client and cannot advocate on behalf of one client over another, and cannot legally disclose to either client certain confidential client information concerning price negotiations, terms, or factors motivating the Buyer/client to buy or the Seller/client to sell without specific written permission of the client to whom the information pertains. The specific duties, obligations, and limitations of a limited dual agent are contained in the Agency Disclosure Brochure as required by § 54-2085, Idaho Code. The undersigned Buyer understands that a limited dual agent does not have a duty of undivided loyalty to either client. The undersigned Buyer further acknowledges that, to the extent the brokerage firm offers assigned agency as a type of agency representation, individual sales associates may be assigned to represent each client to act solely on behalf of the client consistent with applicable duties set forth in § 54-2087, Idaho Code. In an assigned agency situation, the designated Broker (the broker who

- (c) Buyer Notification and Consent to Release from Conflicting Agency Duties. Buyer acknowledges that Broker as named above has disclosed the fact that at times Broker acts as agent(s) for other buyers and for sellers in the sale of the property. Buyer has been advised and understands that it may create a conflict of interest for Broker to introduce Buyer to a Seller client's property because Broker could not satisfy all of its client duties to both Buyer client and Seller client in connection with such a showing or any transaction which resulted. **Based on the understandings acknowledged, Buyer makes the following election.** (Make one election only.)

Eastern Snake Plain Aquifer Modeling Analysis and Narrative

Transfer Application of WR# 35-7720

The Applicant requires 2 acres at the proposed place of use for pond storage and landscape irrigation. This application proposes to transfer water from water right nos. 35-7720 that will cover the acres required.

Data Input Values

The TO Well location is one point of diversion that will be created after the approval of the transfer. Since the proposed POU is outside of the ESPAM grid, the closest model cell was used which is identified as R78 C180.

The FROM Well location is two points of diversion located within the same model cell R59 C165. The model cell is identified as R59 C165. Figure 1 shows the locations of the points of diversion used in the modeling scenario.

Figure 1. ESPAM Model Grid

The standard consumptive use volume of 3.0 afa/acre for a total of 6.0 afa, or 2.0 af/trimester, was used to calculate a volume for modeling. This is an overestimate of the volume that will actually be used at the TO location, since evapotranspiration values will be less at the proposed location.

Results

Using ESPAM 2.2 through the Enhanced Ground Water Rights Transfer Spreadsheet 3.4 to simulate the depletions of transferring 2 acres to the proposed place of use, the affects do not exceed the threshold of 2.0 af/trimester. No mitigation is required. Figures 2-4 include excerpts from the model simulation.

Conversion of Nature of Use

The Sunnyside Ranch Revocable Trust

Applicant proposes to develop a new pond that will be approximately 0.8 acres in surface area and up to 12' deep. Ground water at this site is very shallow and is no more than 2 feet below ground surface year round. This application proposes to transfer an existing water right to provide for the consumptive components of the new pond and a small portion of irrigation.

Storage

The proposed pond will be located in the south portion of the applicant's property. Volume of the pond is calculated to be 2.8 acre-feet, as determined by the following equation:

$$V = 0.8 \text{ acres} \times 12' \times 0.4 = 3.8 \text{ af}$$

Due to the shallow ground water, the pond will fill naturally with ground water. First-time fill of the pond will be mitigated through water rented from the Water Supply Bank, which is being submitted simultaneously as this transfer application for Spring of 2022.

Evaporation

Applicant proposes to convert a portion of existing water rights 35-7720 from irrigation to be used for maintenance of evaporation. Using IDWRs Pond Loss Calculation Spreadsheet, evaporation of the 0.8-acre pond is calculated to be 1.0 afa, based upon the precipitation deficit from ET Idaho 2017 of Open Water – Shallow Systems from the Swan Valley 1W (NWS—USC00108937) Station. Excerpts of the spreadsheet and the ET values from ET Idaho 2017 are included in Figure 1 and 2.

It is proposed that to mitigate for the 1.0 afa increase in consumption, a portion of water right 35-7720 will be converted from irrigation to pond storage. Historically, 35-7720 has been used to irrigate grain. Using ET Idaho 2017, and based upon information gathered at the Roberts station (AM/INL -- ROBI), spring grain has a precipitation deficit of 630 mm/year, or 2.07 af/year, for the growing season. It is calculated to require 0.5 acre of 35-7720 to be converted for pond maintenance, as shown in the equation below

$$\text{Acres to Retire for Mitigation} = 1.0 \text{ afa} / 2.07 \text{ ft/yr} = 0.5 \text{ acre}$$

Since 2.0 acres of 35-7720 are proposed to be transferred to the new place of use, and 0.5 acres are required for maintenance of the pond, the total remaining irrigable acres will be 1.5 acres.

Summary of Proposal

A new 0.8 acre unlined pond is proposed to have a depth of up to 12' and a volume of 3.8 acre feet. The pond will fill naturally with ground water and be maintained through a new well. First-time fill of the pond will be mitigated through water rented from the Water Supply Bank. Evaporation is expected to be 1.0 acre feet per year, requiring 0.5 acres of water right 35-7720 to be converted for pond maintenance.
