WATER RESOURCES
WESTERN REGION

To: Idaho Department of Water Resources
From: Xavier Ries
For: Protest to Additional Point of Diversion (POD) for Transfer No. 85517 and Water Right No. 65-12465 in the name of Bruno.

This protest is to try and obtain additional clarity and understanding to the reason for this request.

To my knowledge, this is a new proposed Point of Diversion in Lot One and it is marked in Para 5 of the application with a "No" that it is not new. Miss Bruno has been using this location as her primary POD for the last two years. According to Miss Bruno's Water Rights, she has a POD in the SW/SE quadrant on the Payette River that is sufficient to meet the quantity/volume for the Water Rights. Also, Miss Bruno has an Easement issued by the Bureau of Reclamation in the SE portion of her property extending to the Payette River as a POD or supplemental if needed. If this were to be approved, Miss Bruno would have three POD's and I do not understand why she requires three POD's.
