Re: Return of Temporary Change Applications No. TC-37-88 and TC-37-89

Dear Al,

On July 7 and 12, 2021, you submitted two applications for temporary change of water rights to the Idaho Department of Water Resources ("Department"); one application on behalf of South Valley &/ Galena Ground Water District ("TC-37-88") and the other on behalf of John Flood ("TC-37-89"). The Department requested additional information regarding the two applications, which was not provided. Given the proposed duration of both applications is not passed, the Department is returning TC-37-88 and TC-37-89 (enclosed).

TC-37-88 requested to temporarily change portions of water rights 37-2493, 37-2576, 37-2649A, 37-2649B, 37-2681, 37-7644, 37-23090, 37-23091, 37-23092, and 37-23093 from irrigation to mitigation by delivery. The diversion point and place of use for all of the irrigation water use authorized under the 10 water rights previously listed was temporarily changed in the approvals issued for three other temporary change applications: TC-37-85, TC-37-86, and TC-37-87. Therefore, there was no irrigation use available under these water rights to retire to allow for the change in nature of use proposed within TC-37-88. See *Review Memo Temporary Change Applications TC-37-85, TC-37-86, and TC-37-87* for details (copy of memo enclosed).

TC-37-89 requested to temporarily change the point(s) of diversion for John Flood's water right 37-7014. Water right 37-7014 has a combined diversion rate limit with water rights 37-2649A and 37-2649B. It was the Department's understanding, John Flood filed TC-37-89 to make additional water available under water rights 37-2649A and 37-2649B to facilitate the processing of TC-37-88. To accomplish that objective, Mr. Flood would've had to reduce his use under water right 37-7014 not simply change the point of diversion. The Department corresponded with you regarding that fact (copy of emails enclosed), to which you responded by requesting the Department "pause" processing of TC-37-89.

The Department did not receive the information necessary to complete processing of TC-37-88 or TC-37-89. The proposed end date for TC-37-88 was September 1, 2021. The proposed end

date for TC-37-89 was November 1, 2021. Therefore, Department is returning both applications. Please contact me at (208) 287-4951 if you have any questions regarding this action.

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Temporary Change Application No. _____, and said application is hereby _____, subject to the following limitations and conditions:

Temporary Change Expiriation Date _____

Signed this _____ day of _____, _____.

For the Director

Memorandum in Support of Temporary Transfer for Mitigation by Deliver to Water Users On the Little Wood River Upstream of Station 54

Water from 155 acres not being irrigated this year will be provided from portions of water rights 37-23090, 37-23091, 37-23092 and 37-23093 not currently being used. The place of use for these 4 water rights has been reshaped this year with over 200 acres not being irrigated that are within the place of use of these 4 water rights. The lands have been identified through the overlay of a sketch map with the current place of use of the water rights, copy attached. A more precise mapping can be prepared of the idle acres if needed as time permits.

About 893 acres covered by ground water rights are not being irrigated this year by John Stevenson. Also, Lakeside Industries is not irrigating 100 acres covered by ground water right 37-2493.

Up to 2.5 cfs of ground water will be diverted from wells shown on this Temporary Change Application for mitigation by delivery to Little Wood River water users upstream of Station 54. This 2.5 cfs will be for mitigation by deliver of up to 2 cfs at Station 10 on the Little Wood River. The additional diversion rate is to account for expected losses in delivering the water to this station but is less than the combined allowable diversion rate for the rights being transferred under this transfer and the General Transfer submitted as part of the same settlement agreement.

As a change in nature of use this transfer must be evaluated to ensure no enlargement of water use occurs. The diversion of up to 272.7 AF for the deliver of 2 cfs at Station 10 from July 8 through September 1, 2021 amounts to 0.56 AF/acre of assumed depletion for the 484.6 acres remaining to be transferred under the water rights associated with the water rights included in this transfer. The Picabo AgriMet shows the minimum annual depletion of all crops grown in the area is 19.4 inches/acre or 1.62 AF/acre. For the purposes of this transfer the applicant requests IDWR consider the 484.6 acres being fallowed this year sufficient to provide 272.7 AF of mitigation by delivery as requested by this transfer.

The places of use for the water being transferred are along the Little Wood River downstream of Station 10.

The RF shown on the Application, for the wells without a well log, is the response function taken from the support files accompanying Jennifer Sukow's May 17, 2021 Memorandum titled "Predicted hydrologic response in Silver Creek and the Little Wood River to curtailment of groundwater use in 2021, Basin 37 Administrative Proceeding, AA-WRA-2021-001." The response function is the fraction of the diverted water estimated to appear in Silver Creek by the end of September 2021.

1.	065	The right holder shall make full beneficial use of all surface water rights available to the right holder for irrigation of the lands authorized to be irrigated under this right. The right holder shall limit the diversion of ground water under this right to those times when the surface water supply is not available or the surface water supply is not reasonably sufficient to irrigate the place of use authorized under this right.
2.	R05	Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 37-M.
3.	E56	The rights listed below are limited to the irrigation of a combined total of 521.1 acres in a single irrigation season. Combined Right Nos.: 37-118, 37-2576, 37-2681 and 37-7644.
4.	C18	This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.
5.	R43	The right holder shall maintain measuring devices at the points of injection into and rediversion from Patton Creek and shall maintain lockable controlling works of a type approved by the Department in a manner that will provide the watermaster suitable control of the diversion.
6.	X35	Rights 37-7644, 37-2649A, 37-2649B and 37-7014 when combined shall not exceed a total diversion rate of 7.44 cfs.

7.	X36	Rights 37-2649A, 37-2649B and 37-7014 are also diverted through the points of diversion described above.
8.	104	If the surface water rights appurtenant to the place of use is sold, transferred, leased or used on any other place of use, this right to divert groundwater shall not be used without an approved transfer pursuant to Section 42-222, Idaho Code, or approval of the Department if a transfer is not required.
9.	X56	The portion of Right 37-7644 used for conveyance losses is 0.04 cfs.
10.	X59	Point of diversion is locally known as The Lucke Well.
11.	WB7	This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor exceed a combined annual maximum diversion volume of 488.3 af at the field headgate for the lands above.
12.		Water diverted under this right is injected into Patton Creek then rediverted from Patton Creek to the place of use. The amount of water rediverted from Patton Creek under this right shall not exceed 98% of the amount of water injected into Patton Creek.
