Rob,

Thank you for circulating the report. It appears the pump test was successful, and the report provides valuable information about the hydraulic connection between the well and the spring. I have asked Christina to schedule a meeting with HLOPOA and IDFG in mid-December to discuss the report. There is not a contested case, so the meeting is not a pre-hearing conference. Rather, it is an informal meeting to discuss injury concerns. I would like to explore whether daily or annual volume limits could be included on the permit to minimize the impact to the spring. The application proposes a daily diversion limit of 7,500 gpd. I would also like to discuss alternatives to mitigate for any reduction in spring flow such as holding water right 21-4061 unused. In 2017, HLOPOA proposed to update the ownership records for water right 21-4061. At the time, HLOPOA did not provide sufficient documentation to update ownership records. I would like to discuss whether it is possible to clear up the ownership questions for water right 21-4061.

Christina will be contacting you in the coming days seeking your availability in mid-December.

All:

Attached is the completed evaluation of the study performed by Tom Wood as part of Henry's Lake Overlook Property Owner's Association, Inc.'s water right permit application. If you would like a regular copy mailed to you, please let me know.

Thanks,
