Dear Parties,

During the pre-hearing conference held earlier this week, I agreed to send out this email summarizing some of the next steps for the contested case. The parties have agreed to each prepare a technical analysis of the impacts to the flow of the Big Wood River resulting from the proposed water right changes. In addition to preparing a technical analysis, the parties agreed to each prepare a statement of position on the question of whether water right 37-8409 has been lost and forfeited through non-use. The technical analyses and statements on forfeiture will be exchanged prior to December 31, 2021.

A status conference is scheduled for January 13, 2022 at 9:00 am. The status conference will be conducted by telephone. I will send out a notice for the status conference sometime next week.
