- the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 65.
2. 185 The right holder shall contact the watermaster by June 15 each year for authorization to continue diverting and using water. The right holder shall not divert water after June 15 each year unless the watermaster authorizes continued diversion and use of water under this water right. When the watermaster informs the right holder that water is not available to fill this right, the right holder shall cease diversion, shall rent water from the Payette River Rental Pool, or shall otherwise mitigate for the depletion of water caused by this water use. The department may amend the contact date listed in this administrative provision to more closely coincide with the date when water is not available to fill this water right.
 3. 219 This right authorizes a total annual storage volume of 2.1 acre-feet, 1.6 acre-feet to be used for the initial filling or carryover storage of the pond and 0.5 acre-feet for the replacement of losses caused by evaporation.
 4. 220 The pond established by the storage of water under this right shall not exceed a total capacity of 1.6 acre-feet or a total surface area of 0.4 acres.
 5. 218 Water shall not be diverted from fire protection storage except to fight or repel an existing fire.
 6. 103 When ordered by the Director, the right holder shall provide mitigation acceptable to the Director to offset depletion of lower Snake River flows needed for migrating anadromous fish. The amount of water required for mitigation, which is to be released into the Snake River or a tributary for this purpose, will be determined by the Director based upon the reduction in flow caused by the use of water pursuant to this right. Any order of the Director issued in accordance with this paragraph shall be in conformance with applicable rules allowing the right holder due process as the need for mitigation and the amount of mitigation are determined.
