3. 004 The issuance of this right does not grant any right-of-way or easement across the land of another.
4. R66 This right when combined with all other rights shall provide no more than 0.03 cfs per acre nor more than 3.0 afa per acre at the field headgate for irrigation of the lands above.

Comments:

1. kwalker 4/21/2003 System Capacity
Permit holder submitted a pump curve with his proof of beneficial use. The pump curve shows the system capable of producing between 18 and 118 gpm. Since examiner only conducted a theoretical calc which came up to 0.05 cfs and then a bucket measurement which came up to 0.06 cfs, I recommend using the pump curve for licensing this permit. Allow 0.20 cfs for fire protection and 0.10 cfs for irrigation purposes as permitted.
