RENTAL AGREEMENT CONDITIONS OF ACCEPTANCE

1. The use of water under this agreement shall be subject to the provisions of Idaho Code § 42-1766.
2. Rental of the specified right from the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other department application process.
3. Use of water under this agreement does not constitute a dedication of the water to renter's place of use, and upon expiration of this agreement, the points of diversion and place of use of the water shall revert to those authorized under the water right and/or again be available to rent from the bank.
4. Use of water under this agreement shall not prejudice any action of the Department in its consideration of an application for transfer or permit filed by the applicant for this same use.
5. Renter agrees to comply with all applicable state and federal laws while using water under this agreement.
6. Renter agrees to hold the Board, the Director and the state of Idaho harmless from all liability on account of negligent acts of the renter while using water.

8. Failure of the renter to comply with the conditions of this agreement is cause for the Director to rescind approval of the rental agreement.
9. This rental does not authorize the construction of a well.
10. Use of water under this right may be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, the water right is within State Water District No. 37.
11. The right holder shall maintain a measuring device and lockable controlling works of a type approved by the Department in a manner that will provide the watermaster suitable control of the diversion(s).

4. RENTAL REQUESTS FOR SPECIFIC WATER RIGHTS

A. Are you requesting to rent specific water rights?

Yes ☐ No ☒

If yes, specify below the elements of the water rights you are requesting to rent. If no, continue to Question 4B.

Important Information: Diversion rates and volumes sought for rent must be proportionate to the per acre diversion rates and per acre volume limits of the water right under lease contract to the Water Supply Bank. Prior to completing this section, applicants should review all water right lease contracts and any active rental agreements to determine which elements of a water right are available to satisfy a rental request. Lease and rental documents are searchable via [IDWR's website](#).

Water rights identified below must either already be leased to the Bank or a lease proposal should accompany this rental request. **Rental requests for water rights not yet leased to the Bank will be returned if companion lease applications are not provided with the rental request.** For leased rights featuring combined limits, rentals must be consistent with combined diversion rate, volume or acre limits. Combined limits should be listed on a row below water right numbers.

Water Right Elements Leased to Water Supply Bank					Leased totals, minus water right elements involved in active rental agreements, equals water right elements available for rent	Water Supply Bank Rental Request		
Water Right Number (leave blank if sub-total of combined limits)	Nature of Use	Diversion Rate (CFS)	Volume (AF)	Acres (AC)		Diversion Rate (CFS)	Volume (AF)	Acres (AC)
Any	Available	GW	Right			0.02	4.2	1.2
Applicants must ensure the requested rate per acre and volume per acre do not exceed the rate per acre and volume per acre limits of water rights leased to the Water Supply Bank					TOTAL	0.02	4.2	1.2
						CFS	AF	AC

**Attach multiple copies of this page if space above is insufficient to list all water rights requested to be rented on this application.*

B. If water right conditions, combined limits, or the sum of all water right elements being requested provide an unconventional duty of water (e.g., an unusually low rate per acre or volume per acre for irrigation use), explain how your proposed rental will sufficiently accomplish your intended purposes. Attach a separate page if space is insufficient and label it **Attachment 4B**:

N/A.

C. Does your rental request propose to change the nature of use for any water right(s) being rented?

Yes ☐ No ☒

If yes, explain how the water right(s) will be converted to new uses. Include the historic, consumptive use amounts for the water right being rented if you have it, as well as the new consumptive use amount for your proposed beneficial use. MEMORANDUM FOR AGREEMENT # 570

To: Water Supply Bank Rental Application 2067
From: Remington Buyer
Date: July 28, 2021
Re: Review & Analysis of Application to Rent Water from the State Water Supply Bank

PURPOSE/NARRATIVE: On April 28th, 2021, IDWR received from the Amara R. Hecht Revocable Trust, through Zach Latham of Brockway Engineering, a request to rent ground water rights for the irrigation of 1.2 acres of the applicant's 2.6 acre property, located north of Ketchum, in Blaine County. A domestic water right exists on the property, however it appears as many as 1.7 acres might be under active irrigation. Hence, this 1.2 acre rental will authorize the irrigation of the acres beyond the 0.5 acres authorized under their domestic water right.

The only ground water right available to be rented in 2021 is water right 37-22019, which authorizes irrigation of lands located in South Hailey. That water right is leased to the Bank from 2021-2025. Rental application 2067 requests a five year rental authorization, through to 2025.

Relocating a portion of water 37-22019 to the rental location will change the timing, magnitude and location of impacts to the Idaho Water Resource Board's (IWRB's) 189 cfs minimum streamflow on the Big Wood River, established pursuant to water rights water rights 37-7919 & 37-8307. This rental can be approved as subordinate to the MSF water rights (see Injury to Other Water Rights below for further explanation).

AUTHORITY TO FILE: The property where rental water will be used is co-owned by Amara Rose Hecht. No concerns about authority to file.

WATER RIGHT VALIDITY: Water right 37-22019 is valid and available for rental from the Bank.

INJURY TO OTHER WATER RIGHTS: Water right 37-22019 authorizes diversions of Wood River Valley Aquifer ground water at a location south of Hailey. The rental location is approximately 16 miles north of Hailey. The pumping of ground water under this rental will result in an increased depletion of surface water from the Big Wood River, which will impact the Idaho Water Resource Board's (IWRB's) 189 cfs minimum streamflow on the Big Wood River, established pursuant to water rights water rights 37-7919 & 37-8307.

The IWRB has established that ground water rentals in the Wood River Valley that result in an increased depletion of Big Wood River water should be considered as an unacceptable impact to its minimum streamflow water rights. To avoid injury to the IWRB's minimum streamflow water rights, a condition will be added to this rental, to limit ground water diversions to only those times when more than 189 cfs is flowing in the Big Wood River, as measured at the Hailey Gage.

ENLARGEMENT OF USE: Water right 37-22019 authorizes the irrigation of land with a duty of water equivalent to 0.019 cfs/ac and 3.5 afa/ac, which is effectively same duty of water requested under the rental. No concerns about water right enlargement.

LOCAL PUBLIC INTEREST: staff are not aware of any information that indicates this rental is contrary to or inconsistent with any local public interests.

BENEFICIAL USE/CONSERVATION OF WATER RESOURCES: Irrigation is a beneficial use. The rental appears consistent with the conservation of water resources in Idaho.

DEPARTMENT STAFF OR WATERMASTER COMMENTS: Review comments were requested from IDWR's Southern Region and Water District 37 on 7/28/2021.

WATER SUPPLY BANK RECOMMENDATION: Staff recommend this rental be approved.
