Re: Transfer Proposal

Application proposes changing the points of diversion and place of use for three ground water rights with a total of 0.08 cfs used for commercial/stockwater purposes, that are currently diverted at a CAFO facility approximately 29.6 to 29.8 miles east and 12.4 to 12.6 miles south of the city center of Jerome. The application proposes moving the rights to a new place of use and diverting them from two existing wells at an existing CAFO facility located approximately 2.8 to 3.3 miles north and 1.2 to 1.7 miles east of the city center of Jerome.

Water right transfer is within the Eastern Snake Plain Aquifer and the applicant's consultant ran the ESPA model. Results indicated no mitigation would be required as a result of transferring the rights to the new place of use. Department staff ran the ESPA model analysis utilizing the same parameters and verified the consultant's findings.

Ownership of the water rights will not change as a result of processing this transfer as a contract of agreement was provided that specifies that the original owner will retain ownership of the water rights at the new location.

All PODs and POUs are within Water District 130 and Watermaster comments will be solicited.
